SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

APPLICABILITY

This schedule covers Schedules DS, DT, and DT-RV with the following applicabilities:

Schedule DS: applicable to service for domestic lighting, heating, cooking, water heating, and power service supplied to multi-family accommodations other than in a mobile home park through one meter on a single premise and submetered to all individual tenants in accordance with the provisions of Rule 19. This schedule was closed to new installations on December 13, 1981, as defined in Decision 05-05-026. Any building constructed for or converted to residential use prior to December 13, 1981 or served on Schedule DM prior to December 13, 1981, or any non-residential building converted to residential use after December 13, 1981 for which the conversion did not require a building permit, shall be eligible to take service under this Schedule if submeters are installed in the building. Any building constructed for residential use or converted to residential use for which a building permit was required on or after July 1, 1982, must be separately metered by the Utility and is not eligible for service under this Schedule.

Schedule DT: applicable to service for domestic lighting, heating, cooking, water heating, and power service supplied to multi-family accommodations in a mobile home park through one meter on a single premise and submetered to all individual tenants in accordance with the provisions of Rule 19. This schedule is closed to new mobile home park or manufactured housing communities for which construction was commenced after January 1, 1997.

Schedule DT-RV: applicable to service for domestic lighting, heating, cooking, water heating, and power service supplied to qualifying residents of recreational vehicle (RV) parks and residential marinas through one meter on a single premises and submetered to all RV park and residential marina tenants in accordance with the provisions of Rule 19.

The rates for CARE and Medical Baseline customers are identified in the rates tables below.

Customers taking service on one of these schedules may also qualify for a semi-annual California Climate Credit $(49.36) per Schedule GHG-ARR.

TERRITORY

Within the entire territory served by the Utility.

RATES (Continued)

Base Services Charge (BSC)

The BSC is a daily charge to recover certain fixed UDC costs and does not vary with customer usage. The total monthly BSC amount is calculated as the BSC multiplied by the number of days in the billing cycle. There are four BSCs (Base Services Charge, Base Services Charge – DRAH, Base Services Charge – FERA, and Base Services Charge – CARE). BSC placement will be determined by participation in CARE, FERA, and/or successfully meeting the deed-restricted affordable housing (DRAH) requirement. All other customers will receive the Base Services Charge.

Rate Components

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Ongoing Competition Transition Charges (CTC), (6) Local Generation Charge (LGC), (7) Reliability Services (RS), and (8) Total Rate Adjustment Component (TRAC).

Certain Direct Access customers are exempt from TRAC, as defined in Rule 1-Definitions.

Customers on Schedule DS receive a per dwelling unit discount ($/day) that will be limited in any monthly bill to the distribution rate portion of the customer's bill.

Customers on Schedule DT receive a per dwelling space discount ($/day) that will be limited in any monthly bill to the distribution rate portion of the customer's bill.

Customers that are eligible and receive both CARE and medical baseline will be given the additional medical baseline allotment for which they qualify and will receive the CARE and Medical Baseline discounts identified in Schedule E-CARE and Schedule E-MEDICAL, respectively.

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

RATES (Continued)

CARE Discount

Customers taking service under this schedule may be eligible for a CARE discount on their bill. Qualification is based on participation in certain public assistance programs or by income guidelines. In addition, qualified CARE customers are exempt from paying the CARE surcharge. Please refer to Schedule E-CARE for applicability requirements. Customers receiving service under this schedule shall comply with the provisions of Public Utilities Code 739.5 in providing service to their submetered tenants.

Franchise Fee Differential

A Franchise Fee Differential of 5.78% will be applied to the monthly billings calculated under these schedules for all customers within the corporate limits of the City of San Diego. Such Franchise Fee Differential shall be indicated and added as a separate item to bills rendered to such customers.

(Continued)

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

GENERAL SPECIAL CONDITIONS T

All special conditions are applicable to Schedules DS, DT, and DT-RV, unless otherwise noted.

1. Multiplier: In determination of the multiplier, it is the responsibility of the customer to advise the utility within 15 days following any change in the number of residential dwelling units wired for service or change in the number of submetered RV or residential marina accommodations and any change in qualifications for baseline allocations.

2. Miscellaneous Loads: Miscellaneous electrical loads such as general lighting, laundry rooms, general maintenance, and other similar usage incidental to the operation of the premises as a multi-family accommodation, RV park or residential marina will be considered as domestic usage.

3. Exclusions: Electric energy for non-domestic enterprises such as offices (other than an office used only for the qualifying RV or residential marina accommodations), rooming houses, boarding houses, dormitories, rest homes, military barracks, transient trailer parks, stores, restaurants, service stations and other similar establishments must be separately metered and billed under the applicable general service schedule.

4. Qualifying RV Park or Marina (only applicable to Schedule DT-RV): A Qualifying RV Park or Marina is a RV park or residential marina, or portion thereof, where all of the spaces or boat slips/berths on the same master meter are held for occupancy by tenants who may rent same on a prepaid month-to-month basis. The master meter shall not include nondomestic enterprises as described in General Special Condition 3. An RV Park or residential marina which rents spaces or boat slips/berths only on a daily or weekly basis will not be considered a Qualified RV Park or Marina.

5. Eligibility Declaration (only applicable to Rate Schedule DT-RV): An Eligibility Declaration and/or on-site verification of books, records, and facilities may be required for service under this rate schedule. If the utility's on-site inspector requires an RV park or residential marina operator's assistance, the utility shall provide reasonable advance notice of the verification visit.

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

GENERAL SPECIAL CONDITIONS (Continued) T

6. Baseline and Non-Baseline Quantities:

   a. Baseline Quantities: The customer shall receive a baseline quantity for the low-income and non-low-income single-family accommodations or RV spaces and marina slips/berths which are supplied submetered service by the customer. The total baseline quantity shall be equal to the basic allowance times the number of applicable single-family accommodations or qualifying RV spaces and marina slips/berths served through the meter plus any additional quantities as may be justified based upon load information supplied by the customer. It is the responsibility of the customer to advise the utility within 15 days following any change in loads eligible for baseline allowances. For billing purposes, the total baseline quantity shall be prorated among the CARE and regular baseline rates according to the proportion of qualifying low-income and non-qualifying single-family accommodations or RV spaces and marina slips/berths. The baseline quantity will be calculated by multiplying the applicable baseline quantities by the number of occupied submetered qualifying RV spaces and marina slips/berths.

   b. Non-Baseline Quantities: The total non-baseline quantity shall be determined by the difference between total customer sales and the total baseline quantity (low-income plus non-low income). For billing purposes, the total non-baseline quantity shall be prorated among the CARE and regular non-baseline rates according to the proportion of qualifying low-income and non-qualifying single-family accommodations or RV spaces and marina slips/berths.

7. Load Checks: The utility has the right to make load checks to verify the possession and use of appliances for which baseline quantities are being allowed. In the event that a customer is found, by load check, not to have the necessary appliances to qualify for a specific baseline quantity previously declared by the customer, the utility shall have the right to rebill the customer's previous 11 months' bills using the baseline quantities found to be appropriate.

8. Baseline Rates: Baseline rates are applicable only to separately metered residential usage including residential service within a submetered system.

(Continued)

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

GENERAL SPECIAL CONDITIONS (Continued) T

9. Baseline Usage: The following quantities of electricity are to be billed at the rates for baseline usage:

	Baseline Allowance for Climatic Zones*			
	Coastal	Inland	Mountain	Desert
Basic Allowance				
Summer (June 1 to October 31)	9.0	10.4	13.6	15.9
Winter (November 1 to May 31)	9.2	9.6	12.9	10.9
All Electric**				
Summer (June 1 to October 31)	6.0	8.7	15.2	17.0
Winter (November 1 to May 31)	8.8	12.2	22.1	17.1

---

* Climatic Zones are shown on the Territory Served, Map No. 1.

** All Electric allowances are available upon application to those customers who have permanently installed space heating or who have electric water heating and receive no energy from another source.

Where it is established that the regular use of a medical life-support device is essential to maintain the life of a full-time resident of the household or that a full-time resident of the household is a paraplegic, quadriplegic, hemiplegic, multiple sclerosis, or scleroderma patient, or is being treated for a life-threatening illness or has a compromised immune system, the customer is eligible for a standard daily medical baseline allowance in addition to the standard daily nonmedical baseline allowance. The additional allowance shall be 16.5 kwhr per day.

Where it is established that the energy required for a life-support device (including an air conditioner or space heater) exceeds 16.5 kwhr per day, the additional allowance will be granted in increments of 16.5 kwhr per day until the estimated daily usage of the device is covered.

The utility may require certification by a state-licensed physician, nurse practitioner, physician assistant or osteopath, that a particular device is necessary to sustain the resident's life.

By granting the baseline allowances set forth above, the utility does not guarantee a continuous and sufficient supply of energy. The supply of all energy by the utility is subject to the provisions of Rule 14.

(Continued)

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

GENERAL SPECIAL CONDITIONS (Continued) T

10. Welder Service: Service under this schedule will be supplied to a welder load of 2.9 kVA or less at 240 volts, and to 0.5 kVA or less at 120 volts. Welders will be rated in accordance with Rule 2F-1.

11. Condition for Receiving Submeter Rate Discount (only applicable to Schedule DT):

The master-meter/submeter rate discount provided herein prohibits further recovery by mobile home park owners for the costs of owning, operating, and maintaining their gas/electric submetered system. This prohibition also includes the cost of the replacement of the submetered gas/electric system. The costs recovered by the mobile home park owner through the submetering discount must be consistent with those costs that the utility's line extension Rule 15 and service extension Rule 16.

This language was authorized by Ordering Paragraph 4 of Decision 95-02-090, dated February 22, 1995, and Ordering Paragraph 1 of Decision 02-09-034, dated September 19, 2002. The master-meter/submeter rate discount provided herein requires that master-meter customers who receive any rebate to distribute to, or credit to the account of each current sub-metered customer served by the master-meter customer that portion of the rebate that the amount of gas or electricity, or both, consumed by the sub-metered customer bears to the total amount of the rebate. See Public Utilities Code Section 739.5(b).

In the event a sub-meter customer (park resident) believes that a master-meter customer (park owner) has not distributed the rebate to no less than two park residents in accordance with the Public Utilities Section Code 739.5(b), the sub-metered customer may notify the master-meter customer in writing. If the master-meter customer has not corrected the problem within 30 days of receipt of the notification, the sub-metered customer may file an expedited complaint pursuant to Rule 13.2. All complaints filed under Rule 13.2 requesting the rebate shall be consolidated for purposes of the Commission's order.

If, after hearing, it is found that the master-meter customer did not distribute the rebate as required to no less than two park residents, the Commission, as part of its order, shall assess a penalty, payable to the complaining sub-metered customer(s), to be apportioned equally among the complaining sub-metered customer(s), equal to the full amount of the rebate that should have been distributed to all park residents. In addition, the master-metered customer will be ordered to tender the rebate to any other sub-metered customer that has not received payment in accordance with Public Utilities Commission Section 739.5(b).

In no event shall SDG&E be responsible to the master-meter customer or submeter customer for calculation of or return of the rebate referred to herein.

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

GENERAL SPECIAL CONDITIONS (Continued) T

12. Billing: A customer's bill is first calculated according to the total rates and conditions listed above.

The following adjustments are made depending on the option applicable to the customer:

a. **UDC Bundled Service Customers** receive supply and delivery services solely from the Utility. The customer's bill is based on the Total Rates set forth above. The EECC component is determined by multiplying the EECC price for this schedule during the last month by the customer's total usage. The DWR-BC component is determined by multiplying the DWR-BC rate by the customer's total usage.

b. **Direct Access (DA) and Community Choice Aggregation (CCA) Customers** purchase energy from a non-utility provider and continue to receive delivery services from the Utility. The bills for a DA and CCA Customer will be calculated as if they were a UDC Bundled Service Customer, then crediting the bill by the amount of the EECC component and DWR-BC component for continuous DA customers that are exempt from DWR-BC charge, as determined for a UDC Bundled Customer, and including the appropriate Cost Responsibility Surcharge (CRS), if applicable.

Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

13. Other Applicable Tariffs: Rules 21, 23 and Schedule E-DEPART apply to customers with generators. Schedules NEM, NEM-BIO, and NEM-FC apply to Net Energy Metering customers. Customers on Schedule E-DEPART are not eligible to Schedule GHG-ARR.

14. Deed-Restricted Affordable Housing Requirement: DRAH placement constitutes those customers who live in an affordable rental home that is restricted by the rules of federal or state subsidies to residents who have incomes at or below 80 percent of Area Median Income based on the statewide database of such homes maintained by the California Housing Partnership and, subject to attestation where applicable.

15. Medical Baseline Usage: For more details on the Medical Baseline allowance for residential electric rate schedules, refer to Schedule E-MEDICAL. By granting the medical rates set forth in E-MEDICAL, the utility does not guarantee a continuous and sufficient supply of energy. The supply of all energy by the utility is subject to the provisions of Rule 14.

(Continued)

SCHEDULE DS, DT, DT-RV

SUBMETERED MULTI-FAMILY SERVICE

EECC SPECIAL CONDITIONS T

1. Definitions: The definitions of principle terms used in this schedule are found either herein or in Rule 1, Definitions.

2. Service Restrictions: Service under this schedule is restricted to the entire load served by single meters. The electric load of a single meter may not be partitioned among services rendered under this schedule and services rendered by a non-utility party under Direct Access or Community Choice Aggregation (CCA).

3. Terms of Service: A customer receiving optional service under this Schedule may elect to change to another applicable rate schedule, but only after receiving service on this Schedule for at least 12 consecutive months, except as specified in EECC Special Condition 4. If a customer elects to discontinue service on this Schedule, the customer will not be permitted to return to this Schedule for a period of one year, unless returning to service from a Direct Access Provider or a Community Choice Aggregator (CCA) in less than one year. T

4. Early Termination: An eligible customer may elect to take commodity from a Direct Access provider or from a CCA during its Term of Service granted it has complied with all other applicable tariff requirements, including, but not limited to the terms and conditions set forth in Rules 25.1 and 27, respectively.

5. TOU Period Grandfathering: Pursuant to D.17-01-006 and D.17-10-018 TOU Period Grandfathering permits certain eligible behind-the-meter solar customers to continue billing under grandfathered TOU period definitions after new TOU Periods are implemented, for a specific period of time.

   TOU Period Grandfathering Eligible Customer Generator (Non-Residential): A non-residential customer with an on-site solar system, who has filed an initial interconnection application by January 31, 2017. The on-site solar system must be designed to offset at least 15% of the customer's current annual load. For Public Agency customers, defined here as public schools, colleges and universities; federal, state, county and city government agencies; municipal utilities; public water and/or sanitation agencies; and joint powers authorities, the non-residential account must have filed an initial interconnection application by December 31, 2017.

   TOU Period Grandfathering Term (Non-Residential): Upon SDG&E's implementation of updated TOU periods adopted in D.17-08-030, TOU Grandfathering Eligible Customer Generators will continue to be billed under prior existing TOU periods and resulting rates for the remainder of their applicable TOU Grandfathering Term, which begins upon issuance of a permission to operate customer's on-site solar system and continues for 10 years. In no event shall the duration of a customer's grandfathering term extend beyond July 31, 2027 (December 31, 2027 for schools). Upon expiration of a customer's TOU Period Grandfathering Term, the customer will be billed using his otherwise applicable TOU periods and associated rates beginning with the customer's next billing cycle.

6. PCIA Recovery in Bundled EECC Rates: Bundled Service customers on EECC rates include an amount to recover the above-market portion of SDG&E's generation portfolio. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service customers' bills under the Breakout of Current Charges panel and embedded in Electric Generation charges. T T
