SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

APPLICABILITY

Applicable to street lighting service on dedicated thoroughfares, on private streets under General Special Condition 6 and to individuals under General Special Condition 7. T T

TERRITORY

Within the entire territory served by the utility.

RATES

TOTAL RATE FOR UNBUNDLED AND BUNDLED CUSTOMERS - $ PER LAMP PER MONTH

Lamp Watts	Lamp Lumens	Avg. Energy Use kWh/Lamp/Mo.	Distr.	Total UDC[1]	*Unbundled Customers (Total UDC + WF-NBC + DWR-BC)[2]*	*Bundled Customers on EECC (Total UDC + WF-NBC + DWR-BC + EECC)*
Mercury Vapor, Class A, Reactor Ballast[3]						
175	7,000	67	12.65	15.42	15.82	24.09
Mercury Vapor, Class A, Regulator Ballast						
175	7,000	73	12.94	15.96	16.39	25.40
400	20,000	160	20.30	26.91	27.86	47.61

200	22,000	85	12.61	16.12	16.62	27.12
250	30,000	109	14.09	18.60	19.24	32.70
400	50,000	165	16.48	23.30	24.28	44.65
HPSV, Class B, 1-Lamp, Reactor Ballast						
70	5,800	29	9.89	11.09	11.26	14.84
100	9,500	41	10.80	12.49	12.73	17.79
150	16,000	59	11.28	13.71	14.06	21.34
HPSV, Class B, 1-Lamp, Regulator Ballast						
200	22,000	85	12.80	16.31	16.81	27.31
250	30,000	109	14.94	19.45	20.09	33.55
400	50,000	165	17.60	24.42	25.40	45.77

1. Total UDC = Distribution + (Non-Distribution UDC energy rates x Avg. Energy Use)
2. Direct Access, Community Choice Aggregation and Transitional Bundled Service Customers pay the applicable Vintaged Power Charge Indifference Adjustment (PCIA). Bundled PCIA is embedded within the bundled generation rates.
3. Closed to new installations as of June 10, 1979.

SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

RATES

Rate Components

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Ongoing Competition Transition Charges (CTC), (6) Local Generation Charge (LGC), (7) Reliability Services (RS), and (8) the Total Rate Adjustment Component (TRAC).

Utility Distribution Company (UDC) Total Rate shown above excludes any applicable commodity charges associated with Schedule EECC, Schedule WF-NBC (Wildfire Fund Non-Bypassable Charge) and Schedule DWR-BC (Department of Water Resources Bond Charge).

Certain Direct Access customers are exempt from the TRAC component, as defined in Rule 1 – Definitions.

Franchise Fee Differential

A Franchise Fee Differential of 5.78% will be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

(Continued)

SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

GENERAL SPECIAL CONDITIONS

1. Facilities and Rates

a. Class A Service

(1) Utility-owned Installations: The Class A rates are applicable to conventional street lighting equipment mounted on wood poles in standard positions and supplied from overhead lines. Underground-fed installations served on this schedule prior to September 22, 1972 will be billed on the Class A rates.

a. Reactor Ballast. * Where reactor ballasts are furnished for mercury vapor lamps, the rates stated in this schedule for the standard regulator ballast installations will be reduced by $1.05 per lamp per month for the 175-watt lamp size and by $0.39 per lamp per month for the 250-watt lamp size.

(2) Jointly-owned Installations: Class A rates apply to utility-owned and maintained conventional luminaires mounted on standards and brackets owned and maintained by the Customer, where the Customer provides and maintains the underground service conductor from the utility's point of service to the luminaire. Closed to new installations as of September 1, 1989.

a. Class B and Class C rates are applicable to the utility's street light installations where standard electroliers and service are installed. The developer of the subdivision or development will be required to perform all trenching and backfilling at his expense. The utility's standard electrolier consists of a concrete aggregate pole with six-foot bracket supporting a conventional street lighting luminaire.

(1) Class B rates are applicable to service where the customer pays to the utility in advance the amount by which the estimated cost to the utility of the concrete pole street lighting system exceeds the cost to the utility of the wood pole overhead system which would otherwise be required.

(2) Class C rates are applicable to service where the customer pays to the utility, in advance, the amount by which the estimated cost to the utility of the concrete pole street light system exceeds the fixed investment of a concrete pole street light system, as determined by the utility.

Closed to new installations as of June 10, 1979.

b. Line Extensions (for wholly-owned utility service)

(1) Overhead - one span of secondary conductor.
(2) Underground - 120 feet of two #8 SIDA from the cable entrance of the electrolier.
(3) Extensions in excess of the above will be made in accordance with the utility's rules.

SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

GENERAL SPECIAL CONDITIONS (Continued)

2. Light Emitting Diode (LED) Distribution Rates: Customers taking service on LED Rate A or Rate B fixtures will pay average distribution rates by 1-lamp and 2-lamp type based on current light fixture costs. At a later date the distribution rates for these customers will be updated to reflect the cost of LED fixtures.

3. Hours of Burning: Service will be from dusk to daylight which, in accordance with the utility's switching schedule, results in approximately 4,165 burning hours per year.

4. Location of Facilities: Service will not be furnished under this schedule where, in the opinion of the utility, an undue hazard or expense would result. The installation of street lights hereunder is contingent upon the utility's obtaining satisfactory rights of way and necessary highway permits.

5. Relocation of Facilities: Relocation of Utility's Facilities at the customer's request, or because of governmental requirements, will be made providing the customer pays the actual costs incurred by the utility for such relocation.

6. Non-Dedicated Streets: Lighting of Non-Dedicated Streets may be supplied to corporations or unincorporated associations of landowners or others, organized as legal entities having a responsibility for street maintenance. This schedule is not applicable to service for the lighting of any other private property.

7. Service to Private Customers: With the utility's consent, a private individual or company may resume payment for any light under this schedule for which there is no corresponding rate under Schedule OL-1, when a governmental customer terminates service. Where an incorporated association assumes street lighting responsibility from a governmental customer, it may take service on this schedule.

8. Contract: A Contract for a period of not less than one year and not more than five years may be required for service under this schedule and will remain in effect from year to year thereafter until cancelled.

9. Shut-off for Non-Payment: If a customer's street lights are shut off due to non-payment of the monthly energy bill, the customer will be subject to a turn-on fee of $10.00 per light, with a minimum charge of $50.00. This is in addition to the Service Re-Establishment Fee and normal credit deposits.

SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

GENERAL SPECIAL CONDITIONS (Continued)

10. Timed Auxiliary Power Device Adapter: This service is available under the terms and conditions stated below for a monthly charge of $0.81 per device plus an administrative charge of $60.00 per account per contract period plus Energy Charges billed at the rates stated in Schedule A-TC.

    a. A Standard Installation shall consist of an individual timed auxiliary power device installed on a utility-owned ornamental street lighting pole.

    b. This rate is only available to governmental agencies who are the customer of record for ornamental street lighting service. A written Service Application and Agreement is required for service in conjunction with utility-owned ornamental street lighting poles.

    c. The utility will install the requested timed auxiliary power adapter and the installed timed auxiliary power adapter shall remain the sole property of the utility.

    d. The installation of the applicant's timed auxiliary power adapter shall be in accordance with utility's specifications.

    e. The provisions of this service shall be in accordance with the utility's Rule 14.1, Prohibitions and Curtailment Provisions, Section B.1.a.

    f. The applicant shall specify the number of timed auxiliary power adapters required. Billing will be based on the per-unit decoration wattage and hours of operation specified by the applicant in the Service Application and Agreement. The per-unit decoration wattage shall not exceed the manufacturers' 300-watt rating for each device.

    g. At the time of installation of the timed auxiliary power adapter and monthly thereafter until such timed auxiliary power adapter has been removed, the customer will be required to pay the monthly charge.

    h. In no case shall the granting of permission to install lighted holiday decorations for use with a timed auxiliary power adapter device on the utility's ornamental poles give the applicant any additional rights.

SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

GENERAL SPECIAL CONDITIONS (Continued)

11. Billing: A customer's bill is first calculated according to the total rates and conditions listed above. The following adjustments are made depending on the option applicable to the customer:

    a. **UDC Bundled Service Customers** receive supply and delivery services solely from the Utility. The customer's bill is based on the Total Rates set forth above. The EECC component is determined by multiplying the EECC price for this schedule during the last month by the customer's total usage.

    b. **Direct Access (DA) and Community Choice Aggregation (CCA) Customers** purchase energy from a non-utility provider and continue to receive delivery services from the Utility. The bills for a DA and CCA Customer will be calculated as if they were a UDC Bundled Service Customer, then crediting the bill by the amount of the EECC component, as determined for a UDC Bundled Customer, and including the appropriate Cost Responsibility Surcharge (CRS), if applicable.

    Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

SCHEDULE LS-1

LIGHTING - STREET AND HIGHWAY - UTILITY-OWNED INSTALLATIONS

EECC SPECIAL CONDITIONS

1. Definitions: The definitions of principle terms used in this schedule are found either herein or in Rule 1, Definitions.

2. Service Restrictions: Service under this schedule is restricted to the entire load served by single meters. The electric load of a single meter may not be partitioned among services rendered under this schedule and services rendered by a non-utility party under Direct Access or Community Choice Aggregation (CCA).

3. Terms of Service: A customer receiving optional service under this Schedule may elect to change to another applicable rate schedule, but only after receiving service on this Schedule for at least 12 consecutive months, except as specified in EECC Special Condition 4. If a customer elects to discontinue service on this Schedule, the customer will not be permitted to return to this Schedule for a period of one year, unless returning to service from a Direct Access Provider or a Community Choice Aggregator (CCA) in less than one year. T

4. Early Termination: An eligible customer may elect to take commodity from a Direct Access provider or from a CCA during its Term of Service granted it has complied with all other applicable tariff requirements, including, but not limited to the terms and conditions set forth in Rules 25.1 and 27, respectively.

5. TOU Period Grandfathering: Pursuant to D.17-01-006 and D.17-10-018 TOU Period Grandfathering permits certain eligible behind-the-meter solar customers to continue billing under grandfathered TOU period definitions after new TOU Periods are implemented, for a specific period of time.

   TOU Period Grandfathering Eligible Customer Generator (Non-Residential): A non-residential customer with an on-site solar system, who has filed an initial interconnection application by January 31, 2017. The on-site solar system must be designed to offset at least 15% of the customer's current annual load. For Public Agency customers, defined here as public schools, colleges and universities; federal, state, county and city government agencies; municipal utilities; public water and/or sanitation agencies; and joint powers authorities, the non-residential account must have filed an initial interconnection application by December 31, 2017.

   TOU Period Grandfathering Term (Non-Residential): Upon SDG&E's implementation of updated TOU periods adopted in D.17-08-030, TOU Grandfathering Eligible Customer Generators will continue to be billed under prior existing TOU periods and resulting rates for the remainder of their applicable TOU Grandfathering Term, which begins upon issuance of a permission to operate customer's on-site solar system and continues for 10 years. In no event shall the duration of a customer's grandfathering term extend beyond July 31, 2027 (December 31, 2027 for schools). Upon expiration of a customer's TOU Period Grandfathering Term, the customer will be billed using his otherwise applicable TOU periods and associated rates beginning with the customer's next billing cycle.

6. PCIA Recovery in Bundled EECC Rates: Bundled Service customers on Schedule EECC rates include an amount to recover the above-market portion of SDG&E's generation portfolio. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service customers' bills under the Breakout of Current Charges panel and embedded in Electric Generation charges.
