Schedule LS-2 AD

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED ANCILLARY DEVICE INSTALLATIONS

APPLICABILITY

Applicable for street lighting service in conjunction with a utility approved metering control module and open to governmental agencies and lighting districts for the use of ancillary devices atop street light poles, located on highways and other thoroughfares, and available to other corporate agencies for ancillary devices located on street light poles on non-dedicated streets which are accessible to the public, where the Customer owns the entire installation, including underground lines from a central point of connection with utility facilities.

Customers eligible for this schedule are not eligible for Net Energy Metering(NEM) or any variation of Net Energy Metering or Virtual Net Metering (VNM).

Effective discounts or credits for California Alternative Rate for Energy (CARE) and Local Government Renewable Energy Self-Generation Bill Credit Transfer (RES-BCT) do not apply to service under Schedule LS-2 AD.

Only ancillary devices typically allowed for attachment to street light poles, e.g., cell phone repeaters, security cameras, etc., are eligible for this schedule and actual street light load is not to be captured under this schedule. Please refer to Schedule LS-2 DS for street lights.

Small Business Customers, as defined in Rule 1 and not identified by the California Air Resources Board as Emission Intensive, Trade-Exposed Entities (EITE), qualify for a semi-annual California Climate Credit of $(49.36), which will display as a separate line item per schedule GHG-ARR.

TERRITORY

Within the entire territory served by the Utility.

RATES

TOTAL RATES FOR UNBUNDLED AND BUNDLED CUSTOMERS		
All Customers		
Monthly Service Fee	**$/Month**	3.73
Unbundled Customers (Total UDC + WF-NBC + DWR-BC)[1]		
Total Energy Rates	**$/kWh**	0.17900
Bundled Customers on EECC (Total UDC + WF-NBC + DWR-BC + EECC)		
Total Energy Rates	**$/kWh**	
Summer: On-Peak		0.52892
Summer: Off-Peak		0.39234
Summer: Super Off-Peak		0.27047
Winter: On-Peak		0.36584
Winter: Off-Peak		0.28450
Winter: Super Off-Peak		0.26050

1. Direct Access, Community Choice Aggregation and Transitional Bundled Service Customers pay the applicable Vintaged Power Charge Indifference Adjustment (PCIA). Bundled PCIA is embedded within the bundled generation rates.

RATES (Continued)

DETAILED UDC RATES		
Monthly Service Fee	**$/Month**	
Distribution		
Base Distribution Rate		3.18
Implementation Cost Rate		0.10
Ongoing Maintenance (O&M) Cost Rate		0.45
Energy (All Hours)	**$/kWh**	
Transmission[1]		0.04366
Distribution		0.10081
PPP[2]		0.02000
ND		0.00000
CTC		(0.00007)
LGC		0.00864
RS		0.00005

OTHER RATES		
Wildfire Non-Bypassable Charge[3]	**$/kWh**	0.00591
DWR Bond Charge[4]	**$/kWh**	0.00000
PCIA - Unbundled[5]	**$/kWh**	See Schedule DA-CRS and Schedule CCA-CRS

1. Transm. Energy charges include Transmission Revenue Balancing Account Adjustment (TRBAA) and Transmission Access Charge Balancing Account Adjustment (TACBAA):

TRBAA	$/kWh	(0.00304)
TACBAA	$/kWh	(0.00993)

2. PPP Energy charges include Low Income PPP (LI-PPP) and Non-low Income PPP (Non-LI-PPP):

LI-PPP	$/kWh	0.00000
Non-LI-PPP	$/kWh	0.00192

3. See Schedule WF-NBC for applicability.
4. See Schedule DWR-BC for applicability.
5. Direct Access, Community Choice Aggregation and Transitional Bundled Service Customers pay the applicable Vintaged Power Charge Indifference Adjustment (PCIA). Bundled PCIA is embedded within the bundled generation rates.

Rate Components

The Total Distribution Rates ($/Month) shown above are comprised of the following distribution components: (1) Base Distribution Rate; (2) Implementation Cost Distribution Rate; and (3) O&M Cost Distribution Rate.

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Ongoing Competition Transition Charges (CTC), (6) Local Generation Charge (LGC), (7) Reliability Services (RS), and (8) the Total Rate Adjustment Component (TRAC) Utility Distribution Company (UDC) Total Rate shown above excludes any applicable commodity charges associated with Schedule EECC, Schedule DWR-BC (Department of Water Resources Bond Charge and Schedule WF-NBC (Wildfire Fund Non-Bypassable Charge).

Franchise Fee Differential

A Franchise Fee Differential of 5.78% shall be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

Time Periods

All Time periods listed are applicable to local time

TOU Period	Weekdays		Weekends and Holidays	
	Summer	Winter	Summer	Winter
On-Peak	4 PM – 9 PM	4 PM – 9 PM	4 PM – 9 PM	4 PM – 9 PM
Off-Peak	All other hours	All other hours	All other hours	All other hours
Super Off-Peak	Midnight – 6AM; 10 AM – 2 PM	Midnight – 6AM; 10 AM – 2 PM	Midnight – 2 PM	Midnight – 2 PM

Seasons: Summer June 1 - October 31
Winter November 1 – May 31

Schedule LS-2 AD

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED ANCILLARY DEVICE INSTALLATIONS

GENERAL SPECIAL CONDITIONS:

1. Relocation of Facilities: Relocation of Utility's Facilities at the Customer's request or because of governmental requirements shall be made providing the Customer pays the actual costs incurred by the utility for such relocation.

2. Shut-off for Non-Payment: If a Customer's ancillary devices are shut off due to non-payment of the monthly energy bill, the Customer shall be subject to a turn-on fee of $10.00 per device, with a minimum charge of $50.00. This fee is in addition to the Service Re-Establishment Fee and normal credit deposits.

3. Ancillary Device Service Requirements: To be eligible for service under this schedule, the installation must include a control device (herein referred to as "node") that is approved by the Utility for the specific purpose of revenue-grade metering applications. The node must comply with the Utility's metering specifications. Additionally, customers electing to take service under this schedule must provide and accept the following:

   a. Data Send/Receive: Consumption data, defined as register reads and/or intervals, must be sent to the Utility no later than 3 a.m. the day following the recorded usage. If data is received later than this time, the Utility shall estimate consumption to fill in the missing data as described in 3(d) below.

   b. Initial Ancillary Device Inventory Setup/Establishment: Customer shall submit to the Utility inventory data that consists of Customer control module identification and required meter inventory information. This includes, but is not limited to, meter accuracy testing results and node manufacturing information. The required fields and their format are subject to change by the Utility.

   c. Ancillary Device Inventory: Inventory data fields and format are determined by the Utility's Street Light Billing and are subject to change as systems often evolve. Fields and format must be sent for proper billing account establishment. Required fields include, but are not limited to, the location of the ancillary devices and their associated meter attributes. If data does not conform to the Utility requirements, the Utility may reject the data and delay account establishment until data is corrected.

Schedule LS-2 AD

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED ANCILLARY DEVICE INSTALLATIONS

GENERAL SPECIAL CONDITIONS (Continued)

3. Ancillary Device Service Requirements: (Continued)

   d. Missing, erroneous or otherwise unusable Usage Data: If Customer data is not received, is wholly or in part missing, erroneous, or is unusable, the Utility shall estimate usage in a manner consistent with its applicable tariff rules and shall not perform any corrective billing for missing or unusable data.

   e. Control Module/Node Hardware: Only metering control modules/nodes and associated hardware that have been tested and approved by the Utility can be used under this schedule. If a node is changed out or replaced with a newer version, the newer version must be tested by the Utility before it is installed to ensure the new node complies with Utility meter specifications.

   f. Node Manufacturer: Prior to installing an approved node, the node manufacturer must perform an accuracy test and provide results of that test to the Utility.

   g. Data Requests/Random Sampling: All meters/nodes under this schedule are subject to data request in full or by random sample. Requests for data or random sample must be complied with and any excessive costs for such work shall be mutually agreed upon and paid by the Customer.

   h. Node Management: Customers under this rate schedule assume full responsibility for the accurate and timely submission of nodes installed under this rate schedule. The Utility is not responsible for billing on an existing rate should Customer or third party fail to notify the Utility of meter/node changes subject to this rate.

   i. Release of Liability: By installing any devices under this schedule, Customer releases the Utility of any liability associated with any damages or claims that result from the use of such devices. It is the Customer's sole responsibility to ensure installations are safe and properly maintained.

4. Billing Process: The following billing process shall be used for this schedule.

   a. Electronic Data Interface (EDI) is the preferred billing mechanism.
   b. Non-EDI customers shall be billed using summary billing.
   c. The bill shall be comprised of one bill account per pole (one or more streetlights or devices on a single pole location) with limited exceptions and only as approved by the Utility.
   d. The Utility shall bill all devices under the applicable unmetered schedule until notice that a node has been installed, has been received.
   e. Nodes temporarily or permanently removed are subject to billing using estimated consumption under Section 4.d. above until the Utility is advised of removal.
   f. New install, shall be billed as described in Section 4.d. until Customer provides the inventory information as outlined in Section 4.b above.

Schedule LS-2 AD

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED ANCILLARY DEVICE INSTALLATIONS

GENERAL SPECIAL CONDITIONS (Continued)

5. Transitional Period: Customer has 60 days from the time of rate transition to switch to a different rate, otherwise Customer is subject to Rule 12 for any changes in rate schedule. If Customer elects to change the rate before the end of the transitional period, Customer must communicate that to the Utility through e-mail or other mutually agreed upon method.

6. Adaptive Controlled Pilot Program Termination: This tariff replaces the Adaptive Controlled Streetlight Pilot Program approved in AL 2883-E. The pilot is terminated when this tariff takes effect.

7. Node Mandatory Data Send Requirement: If Customer installs a node that is registering electricity consumption, Customer is required to establish service under an applicable rate. If a node is installed and notification is not provided, the Utility reserves the right to disconnect devices and invoice Customer for any associated labor.

8. Definitions:

   a. Node: A node is the device that enables an ancillary device to be remotely controlled and monitored. The node is also referred to as a control module in this and other documents.

   b. Consumption Data: Device register reads and/or interval-level electricity usage that captures both the streetlight load and control module load.

   c. Inventory Data: Records that clearly identify which device numbers correspond to which nodes. This data is used for account maintenance functions.

   d. Connected Devices: Those remote controlled devices typically allowed by the customer for service or security reasons, e.g., cell phone repeaters, security cameras, etc.

Schedule LS-2 AD

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED ANCILLARY DEVICE INSTALLATIONS

EECC SPECIAL CONDITIONS

1. Definitions: The definitions of principle terms used in this schedule are found either herein or in Rule 1, Definitions.

2. Service Restrictions: Service under this schedule is restricted to the entire load served by single meters. The electric load of a single meter may not be partitioned among services rendered under this schedule and services rendered by a non-utility party under Direct Access or Community Choice Aggregation (CCA).

3. Terms of Service: A customer receiving optional service under this Schedule may elect to change to another applicable rate schedule, but only after receiving service on this Schedule for at least 12 consecutive months, except as specified in EECC Special Condition 4. If a customer elects to discontinue service on this Schedule, the customer will not be permitted to return to this Schedule for a period of one year, unless returning to service from a Direct Access Provider or a Community Choice Aggregator (CCA) in less than one year. T

4. Early Termination: An eligible customer may elect to take commodity from a Direct Access provider or from a CCA during its Term of Service granted it has complied with all other applicable tariff requirements, including, but not limited to the terms and conditions set forth in Rules 25.1 and 27, respectively.

5. TOU Period Grandfathering: Pursuant to D.17-01-006 and D.17-10-018 TOU Period Grandfathering permits certain eligible behind-the-meter solar customers to continue billing under grandfathered TOU period definitions after new TOU Periods are implemented, for a specific period of time.

   TOU Period Grandfathering Eligible Customer Generator (Non-Residential): A non-residential customer with an on-site solar system, who has filed an initial interconnection application by January 31, 2017. The on-site solar system must be designed to offset at least 15% of the customer's current annual load. For Public Agency customers, defined here as public schools, colleges and universities; federal, state, county and city government agencies; municipal utilities; public water and/or sanitation agencies; and joint powers authorities, the non-residential account must have filed an initial interconnection application by December 31, 2017.

   TOU Period Grandfathering Term (Non-Residential): Upon SDG&E's implementation of updated TOU periods adopted in D.17-08-030, TOU Grandfathering Eligible Customer Generators will continue to be billed under prior existing TOU periods and resulting rates for the remainder of their applicable TOU Grandfathering Term, which begins upon issuance of a permission to operate customer's on-site solar system and continues for 10 years. In no event shall the duration of a customer's grandfathering term extend beyond July 31, 2027 (December 31, 2027 for schools). Upon expiration of a customer's TOU Period Grandfathering Term, the customer will be billed using his otherwise applicable TOU periods and associated rates beginning with the customer's next billing cycle.

6. PCIA Recovery in Bundled EECC Rates: Bundled Service customers on Schedule EECC rates include an amount to recover the above-market portion of SDG&E's generation portfolio. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service customers' bills under the Breakout of Current Charges panel and embedded in Electric Generation charges.
