SCHEDULE VGI

ELECTRIC VEHICLE GRID INTEGRATION PILOT PROGRAM

APPLICABILITY

This Schedule is applicable to customers charging an Electric Vehicle that is:

1. a currently registered Motor Vehicle, as defined by the California Motor Vehicle Code, which is a battery electric vehicle (BEV) or plug-in hybrid electric vehicle (PHEV), and
2. charged through either SDG&E owned and operated Electric Vehicle-Grid Integration Pilot Program (VGI Pilot Program) facilities located at applicable sites, defined as workplaces, multi-unit dwellings (MUD), or sites serving MUD (Applicable Sites), or Electric Vehicle-Grid Integration Extension Program (VGI Extension Program) facilities located at Applicable Sites. T T T T

At the election of the Applicable Site hosting the VGI Program Facilities (Site Host) and the eligibility requirements of the VGI Pilot Program and VGI Extension Program, this schedule is applicable to either the individual electric vehicle customer charging through the VGI Program Facilities (Billed to Driver), or the Site Host providing charging through the VGI Program Facilities (Billed to Host). T T

A Site Host or individual electric vehicle customer participating in Direct Access (DA), Transitional Bundled Service (TBS) and/or Community Choice Aggregation (CCA) for their business or residence are eligible to take service under Schedule VGI for electric vehicle charging. The Base Rate, Commodity Base Rate, and Distribution Base Rate, as defined below, will all apply to the electric vehicle charging through the VGI Program Facilities. Schedule VGI is not subject to any Demand Response participation rules/incentives.

Depending on the pre-qualified vendor the customer selects to provide VGI charging services, customers may use enabling technology, such as an internet connection or smart phone, to facilitate decision-making on when to charge their BEV or PHEV through VGI Program Facilities.

Effective discounts for California Alternative Rate for Energy (CARE), Family Electric Rate Assistance (FERA) and Schedule DE do not apply to service under Schedule VGI, which is for BEV and PHEV charging only.

TERRITORY

Within the entire territory served by the Utility.

RATES

Total hourly charges for customers on this hourly dynamic schedule will be calculated using the rates below. Charges will consist of:

1. an hourly Base Rate;
2. an hourly Commodity Base Rate with an adjustment based on the California Independent System Operator (CAISO) day-ahead hourly price, an adder to reflect the system's top 150 system peak hours; and
3. an hourly Distribution Base Rate with an adder to reflect the top 200 annual hours of peak demand for the individual circuit feeding the VGI charging stations.

(Continued)

SCHEDULE VGI

ELECTRIC VEHICLE GRID INTEGRATION PILOT PROGRAM

RATES (Continued)

Base Rate:

The hourly Base Rate will be charged on a volumetric (per kWh) basis.

Base Rate		
Transmission	0.04260	
Public Purpose Programs (PPP)	0.01840	
Nuclear Decommissioning (ND)	0.00000	
Competition Transition Charge (CTC)	(0.00007)	
Local Generation Charge (LGC)	0.00883	
Reliability Services (RS)	0.00005	
DWR Bond Charge (DWR-BC) + Wildfire Fund Non-Bypassable (WF-NBC)	0.00591	
Subtotal Base Rate	0.07572	

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of $(0.00304) per kWh and the Transmission Access Charge Balancing Account Adjustment (TACBAA) of $(0.00993) per kWh. PPP Energy charges include Low Income PPP rate (LI-PPP) $0.01175/kWh, and Non-low Income PPP rate (Non-LI-PPP) $0.00659/kWh.

Commodity Rate:

The hourly Commodity Rate will be charged on a volumetric (per kWh) basis.

Commodity Rate		
Commodity Base Rate	0.10628	I
CAISO day-ahead hourly price	updated daily, day-ahead	
VGI day-ahead Generation Capacity Component Hourly Adder	0.89314	I

Prior day CAISO Commodity Rates will be used if CAISO market data is delayed beyond 5:00 pm for the day ahead market.

The VGI Generation Capacity Component Hourly Adder is added to the top 150 system peak hours on a day-ahead basis based on CAISO day-ahead demand forecast.

(Continued)

SCHEDULE VGI

ELECTRIC VEHICLE GRID INTEGRATION PILOT PROGRAM

RATES (Continued)

Distribution Rate:

The hourly Distribution Rate will be charged on a volumetric (per kWh) basis.

Distribution Rate		
Distribution Base Rate	0.07378	R
VGI day-ahead Distribution Capacity Component Hourly Adder	0.85306	R

The VGI Distribution Capacity Component Hourly Adder is added to the top 200 annual hours of the circuit feeding the VGI charging stations on a day-ahead basis when the forecasted load exceeds a threshold level established based on historic load.

Total Base Rate:

The hourly Total Base Rate will be charged on a volumetric (per kWh) basis.

Total Base Rate		
Subtotal Base Rate	0.07572	
Commodity Base Rate	0.10628	I
Distribution Base Rate	0.07378	R
Total Base Rate	0.25578	I

Rate Components

The rates shown above are comprised of the following components:

1. Subtotal Base Rate consisting of: (1) Transmission, (2) Public Purpose Program (PPP) Charges, (3) Nuclear Decommissioning (ND) Charge, (4) Ongoing Competition Transition Charges (CTC), (5) Local Generation Charge (LGC), (6) Reliability Services (RS), (7) Department of Water Resources Bond Charge (DWR-BC), (8) Wildfire Fund Non-Bypassable Charge (WF-NBC).
2. Total Commodity Rate consisting of: (1) Commodity Base Rate, (2) CAISO day-ahead hourly price, (3) VGI day-ahead Generation Capacity Component Hourly Adder, and
3. Total Distribution Rate consisting of: (1) Distribution Base Rate, and (2) VGI day-ahead Distribution Capacity Component Hourly Adder.
4. Total Base Rate consisting of: 1) Subtotal Base Rate; 2) Commodity Base Rate, and 3) Distribution Base Rate

RATES (Continued)

Taxes and Franchise Fee Differential

Any applicable taxes and franchise fees differentials associated with service under this Schedule will be based on the location of the VGI Program Facilities where the charging occurred.

A Franchise Fee Differential of 5.78% will be applied to the monthly billings calculated under this Schedule for all customers charging their vehicle within the corporate limits of the City of San Diego. This Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

SPECIAL CONDITIONS

1. Definitions: The definitions of terms used in this Schedule are found either herein or in Rule 1

   a.. VGI Program Facilities: VGI Program Facilities are electric vehicle charging facilities that are installed, owned and operated by SDG&E pursuant to Decision (D.) 16-01-045 or electric vehicle charging facilities that are installed pursuant to D.21-04-014. VGI Program Facilities are located at workplaces multi-unit dwellings (MUD) or sites serving MUD. T T T T

   b. Site Host: The Site Host is an applicable site that participates in the VGI Pilot Program or the VGI Extension Program. Site Hosts agree to participate in and follow the requirements of the VGI Pilot Program or the VGI Extension Program. The Site Host determines if the VGI Program Facilities on its property will be Billed to Driver or Billed to Host. T T T

   c. Billed to Driver: Billed to Driver refers to Schedule VGI charges billed to an individual electric vehicle customer charging through the VGI Program Facilities.

   d. Billed to Host: Billed to Host refers to Schedule VGI charges billed to the Site Host for employees and/or residents charging through the VGI Program Facilities. Enrollment in this billing plan requires SDG&E to approve a Load Management Plan submitted by the host.

   e. VGI Website: SDG&E also plans to provide a database that includes historic CAISO day-ahead prices for reference to VGI customers. This data will be made available during the customer engagement and enrollment process. T

SCHEDULE VGI

ELECTRIC VEHICLE GRID INTEGRATION PILOT PROGRAM

SPECIAL CONDITIONS (Continued)

2. Metering: VGI Program Facilities will record fifteen-minute interval data compatible with the Utility's VGI system's meter reading, time-of-use billing, and telecommunications systems. The meter will generate interval reads which are of billing quality. This billing data will be supplied to SDG&E by charging service vendors, or related, under contract to SDG&E, who have been qualified by SDG&E to serve charging needs and fulfill the data requirements the VGI Program. T

3. Billing: Prior day CAISO Commodity Rates will be used if CAISO market data is delayed beyond 5:00 pm for the day-ahead market. CAISO market data posted or corrected after the above cut-off times will not be used for VGI rate calculations and after-the-fact rate adjustments will not be made. Prior day VGI rate components will be used if day-ahead rate components cannot be posted to the publicly available VGI Website by 6:00 pm. T T

   A bill will not be rendered for a customer with zero billable consumption and a zero account balance for the billing period.

4. Meter Reads: If due to unusual conditions or reasons beyond the Utility's control, all or part of the data needed to bill a customer's charging through VGI Program Facilities is not available at the time of billing, the Utility will send a partial bill and include the remaining portion on a subsequent bill when the metering data becomes available. D T

5. Multiple/Summary Accounts: For customers with multiple accounts, summary billings, or multiple meters at a premise, the billing charges are calculated for each individual qualifying meter and applied, if applicable, to the corresponding service account.

6. Terms of Service: A Site Host electing the Billed to Host option may change to the Billed to Driver option, or vice versa, but only after receiving service on this Schedule under the Billed to Host option for at least 12 consecutive months.

7. Voltage: Service under this Schedule will be supplied at the standard lighting voltage.

8. PCIA Recovery in Bundled EECC Rates: Bundled Service customers EECC rates include an amount to recovery the above-market portion of SDG&E's generation portfolio. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service customers' bills under the Breakout of Current Charges panel and embedded in Electric Generation charges. P P

SCHEDULE VGI

ELECTRIC VEHICLE GRID INTEGRATION PILOT PROGRAM

EECC SPECIAL CONDITIONS

1. Definitions: The definitions of principle terms used in this schedule are found either herein or in Rule 1, Definitions.

2. Service Restrictions: Service under this schedule is restricted to the entire load served by single meters. The electric load of a single meter may not be partitioned among services rendered under this schedule and services rendered by a non-utility party under Direct Access or Community Choice Aggregation (CCA).

3. Terms of Service: A customer receiving optional service under this Schedule may elect to change to another applicable rate schedule, but only after receiving service on this Schedule for at least 12 consecutive months, except as specified in EECC Special Condition 4. If a customer elects to discontinue service on this Schedule, the customer will not be permitted to return to this Schedule for a period of one year, unless returning to service from a Direct Access Provider or a Community Choice Aggregator (CCA) in less than one year. T

4. Early Termination: An eligible customer may elect to take commodity from a Direct Access provider or from a CCA during its Term of Service granted it has complied with all other applicable tariff requirements, including, but not limited to the terms and conditions set forth in Rules 25.1 and 27, respectively.

5. TOU Period Grandfathering: Pursuant to D.17-01-006 and D.17-10-018 TOU Period Grandfathering permits certain eligible behind-the-meter solar customers to continue billing under grandfathered TOU period definitions after new TOU Periods are implemented, for a specific period of time.

   TOU Period Grandfathering Eligible Customer Generator (Non-Residential): A non-residential customer with an on-site solar system, who has filed an initial interconnection application by January 31, 2017. The on-site solar system must be designed to offset at least 15% of the customer's current annual load. For Public Agency customers, defined here as public schools, colleges and universities; federal, state, county and city government agencies; municipal utilities; public water and/or sanitation agencies; and joint powers authorities, the non-residential account must have filed an initial interconnection application by December 31, 2017.

   TOU Period Grandfathering Term (Non-Residential): Upon SDG&E's implementation of updated TOU periods adopted in D.17-08-030, TOU Grandfathering Eligible Customer Generators will continue to be billed under prior existing TOU periods and resulting rates for the remainder of their applicable TOU Grandfathering Term, which begins upon issuance of a permission to operate customer's on-site solar system and continues for 10 years. In no event shall the duration of a customer's grandfathering term extend beyond July 31, 2027 (December 31, 2027 for schools). Upon expiration of a customer's TOU Period Grandfathering Term, the customer will be billed using his otherwise applicable TOU periods and associated rates beginning with the customer's next billing cycle.

6. PCIA Recovery in Bundled EECC Rates: Bundled Service customers on Schedule EECC rates include an amount to recover the above-market portion of SDG&E's generation portfolio. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service customers' bills under the Breakout of Current Charges panel and embedded in Electric Generation charges.
