Schedule CRP Sheet 1
CHARGE READY PROGRAM

APPLICABILITY

This Schedule is applicable to Customer Participants, as defined in Special Condition 1.a, who elect to participate in the Charge Ready Program (CRP). Except as specified in Special Condition 2, Customer Participants must purchase, install, own and/or maintain qualified Electric Vehicle Supply Equipment (EVSE) used to charge Eligible Vehicles as defined in Special Condition 1.d and connected to the electric Infrastructure as defined in Special Condition 1.f.

Eligible Customer Participants must own, lease, manage, or be the customer of record for the Charging Site where the EVSE are installed. Customer Participants, if not the owner of the Charging Site at which the EVSE are to be installed, must obtain written consent from the property owner to participate in this Schedule. To participate in this Schedule and be eligible for Rebate Payment, Customer Participants must (1) purchase and install qualified EVSE for the Eligible Vehicles in the quantity approved by SCE and specified in Special Condition 2 – Programs and Rebates; and (2) agree to maintain and operate the charging equipment for at least ten years.

Participation in this Schedule is subject to available funding as approved by the California Public Utilities Commission (Commission or CPUC), and SCE's application screening, including site specific cost and design criteria established by SCE, and site prioritization process.

TERRITORY

Within the entire territory served by SCE.

RATES

All usage registered on the meter(s) serving the EVSE must be served on an applicable General Service (GS) Time-of-Use (TOU) rate for the full Term of Service.

SPECIAL CONDITIONS

1. Definitions: Except as otherwise defined in SCE's Rule 1, capitalized terms utilized in the context of this Schedule are defined below and applicable to Customers participating in this Schedule.

    a. Customer Participant: The non-residential entity, including Multi-Family Properties (also referred to as Multi-Unit Dwellings), electing to participate on this Schedule that owns, leases, manages, or is the customer of record of the Charging Site where the EVSE are to be installed. The Customer Participant must provide SCE with the rights of way across public or private property (as applicable) and permits satisfactory to SCE, including easements at participating Charging Site without cost to or condemnation by SCE. Customer Participants who elect to participate in this Schedule must comply with all obligations, terms and conditions set forth in this Schedule and the applicable Charge Ready Participation Agreement.

(Continued)

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS

1. Definitions (Continued)

b. Charging Site: The Premises, as defined in SCE's Rule 1, where the EVSE will be installed.

c. Charging Station: See Electric Vehicle Supply Equipment (EVSE).

d. Eligible Vehicles: Light-duty plug-in electric vehicles.

e. Electric Vehicle Supply Equipment (EVSE): The equipment that interconnects the electricity grid at a Charging Site to the Eligible Vehicle, whether using alternating current (AC) or direct current (DC), but not including the Make-Ready or other charging Infrastructure. EVSE is sometimes referred to as Charging Station. All charging equipment installed under the Charge Ready Program must be selected from SCE's Approved Product List (APL) or otherwise approved by SCE for installation under this Program, in the quantity approved by SCE.

i. Level 1 (L1) Charging: Charging station capable of charging at 120 volts.

ii. Level 2 (L2) Charging: Charging station capable of charging at 240 volts.

iii. Direct Current Fast Charging (DCFC): Charging station that rapidly charges a vehicle battery by connecting it directly to a higher power, direct current source.

f. Infrastructure: All work and facilities necessary for participation in this Schedule, as determined by SCE, in SCE's sole discretion and in accordance with its applicable tariffs and design standards, including utility distribution Infrastructure (e.g., any new transformers, services, and meters) and Infrastructure installed on the Customer Participant's side of the meter (e.g., any new panels, stepdown transformers, conduits, wires, connectors, and any other hardware installed as part of this Schedule deployment). Infrastructure located on the utility and Customer Participant's side of the meter is sometimes referred to as the Make-Ready.

g. Make-Ready: See Infrastructure.

h. Multi-Family Properties: See Multi-Unit Dwelling.

(Continued)

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

1. Definitions (Continued)

i. Multi-Unit Dwelling (MUD): An apartment building, duplex, or any group of permanent residential dwellings located on a single premise. This does not include hotels, motels, residential hotels, guest or resort ranches, marinas, recreational vehicle parks, campgrounds, halfway houses, rooming houses, boarding houses, institutions, dormitories, rest or nursing homes, military barracks, or any enterprise that includes or rents to either transient tenants or transient accommodations. Also referred to as Multi-Family Properties.

j. Rebate: Financial reimbursement to eligible Customer Participant, or its designee, pursuant to this Schedule to reimburse a portion of the costs associated with the purchase of approved EVSE used to charge Eligible Vehicles described in Special Condition 1.d, and/or for reimbursement of a portion of the costs associated with Programs and Rebates described in Special Condition 2.

k. Rebate Payment: The payment made by SCE to Customer Participant, or its designee.

l. Program Application: An electronic form required to be completed and submitted by Customer Participant to SCE to determine initial eligibility for program participation.

m. Program Participation Agreement: A form required to be signed and submitted by Customer Participant to SCE, following SCE's acceptance of the Program Application and completion of an initial site and cost evaluation, if applicable. Customer Participant may choose to cancel its participation in this Schedule upon providing notice to SCE at any time prior to submission of a signed Program Participation Agreement.

n. Funding Reservation: The reservation of funds by SCE to cover the Customer Participant's anticipated Infrastructure costs and eligible Rebates as described in Special Condition 2. All Funding Reservations are subject to funding availability as determined by SCE.

o. Rebate Payment Instruction: Information required from Customer Participant that authorizes SCE to issue the Rebate directly to the Customer Participant or a third party designated by the Customer Participant in connection with the purchase and installation of the EVSE in this Schedule.

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

1. Definitions (Continued)

   p. Procurement Period: When applicable, Procurement Period is defined as 45 calendar days after the Program Participation Agreement is executed, during which Customer Participant is required to procure the site EVSE. Customer Participant may request an extension of the Procurement Period for a limited duration by submitting an extension request in writing prior to the expiration of the initial 45-calendar-day Procurement Period. SCE may, at its discretion, extend a Funding Reservation beyond the 45-calendar-day Procurement Period if, in SCE's sole opinion, a Customer Participant is actively seeking to complete procurement of the EVSE.

   q. Disadvantaged Communities (DAC): Census tracts in SCE's service territory with a top quartile score according to the California Environmental Protection Agency's CalEnviroScreen tool.

   r. Fortune 1000 List: Fortune 1000 companies include companies listed on the Fortune 1000 list, subsidiaries of Fortune 1000 companies, corporate stores of Fortune 1000 companies, and private and international companies with annual revenue at or above the lowest cutoff point in the Fortune 1000. (T) | | (T)

2. Programs and Rebates

   Pursuant to D.20-08-045, Programs and Rebates under this Schedule will be available for four years beginning on the official launch date of the Charge Ready Program, until program-specific port caps are reached, or program funds are depleted, whichever comes first.

   Programs and Rebates are available to eligible Customer Participants who complete a Program Application, as defined in Special Condition 1.l, and execute a Program Participation Agreement, as defined in Special Condition 1.m, subject to SCE's approval. Upon SCE's approval and subject to funding availability, Funding Reservation, as defined in Special Condition 1.n, will be made by SCE to cover the following:

   a. Make-Ready Expansion Program

      The Make-Ready Expansion Program is available to qualified Customer Participants who choose to procure, install, own, and maintain at least four L1 and/or L2 ports, and/or two DCFC ports. Rebates for DCFC ports are only available for those capable of charging at power levels of 50 kW or greater, and all DCFC installed under this Schedule must be available for public use.

(Continued)

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

2. Programs and Rebates (Continued)

a. Make-Ready Expansion Program (Continued)

Customer Participants qualify for SCE-funded installation of Infrastructure or Make-Ready. Customer Participants also qualify for EVSE rebates. The EVSE Rebate Payment will be calculated as follows:

L1, L2 and DCFC:

1) 100 percent of the base cost for Customer Participants located in a designated DAC and not on the Fortune 1000 list.
2) 50 percent of the base cost for Customer Participants who own, lease, or manage MUDs.
3) 25 percent of the base cost for all other Customer Participants not included in 1) or 2) above

The actual EVSE Rebate Payment may be reduced to ensure that, when combined with any other third-party rebates or programs, the total Rebate received by the Customer Participant does not exceed the total costs of procuring and installing the EVSE.

Customer Participant Installed and Owned Infrastructure Rebate:

Customer Participants may choose to instead design, install, own, operate and maintain the Charging Infrastructure located on the Customer Participant's side of the meter, see Special Condition 6. Under this option, Rebate Payment shall be the lesser of: (a) 80 percent of Customer Participant's actual installation cost or (b) 80 percent of SCE's average cost for installing the customer-side make-ready infrastructure. Customer Participants receiving the rebate must commit to operate and maintain the facilities consistent with the relevant national, state, and local electrical standards, for a period of not less than 10 years.

(Continued)

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

2. Programs and Rebates (Continued)

b. Own and Operate Program

The Own and Operate Program is available to qualified Customer Participants who own, lease, or manage MUDs located in a designated DAC. Under the Own and Operate Program, Customer Participants qualify for SCE-funded installation of Make-Ready Infrastructure. Customer Participants also qualify to have SCE procure, install, own, and manage the operation of L2 EVSE for a period of ten years. Alternatively, Customer Participant may elect to purchase, install, own, and operate the EVSE and receive a Rebate to offset the cost of EVSE maintenance and network fees.

c. New Construction Rebate Program

The New Construction Rebate for Multi-Family Properties is available to Customer Participants who own, lease, or manage newly constructed MUDs. To qualify for the Rebate, sites must be approved by SCE and exceed code measured by (1) installing additional infrastructure and EVSE on top of required EV Capable spaces as defined in CALGreen or other relevant local requirements; or (2) installing additional infrastructure and EVSE in excess of the minimum number of required EV spaces defined in CALGreen.

d. Low-Port Rebate Program

The Low-Port Rebate Program is available to qualified Customer Participants who choose to procure, install, own, and maintain four or fewer ports. The Rebate is intended to offset the costs associated with the purchase and installation of L1 or L2 EVSE. Under this Rebate option, Customer Participants are responsible for the installation of Infrastructure or Make-Ready and associated costs.

3. Rebate Disbursement: The Rebate is payable after SCE receives the Rebate Payment Instruction and the appropriate documentation from the Customer Participant.

(Continued)

Schedule CRP Sheet 7
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

4. Term of Service: Customer Participants, excluding those participating in the Own and Operate Program, must, at their own expense, procure, own, install, and operate EVSE in working order at the originally installed location for the entire 10-year term of participation under this Schedule.

5. Assignment and Assumption: Customer Participant shall not assign the Program Participation Agreement under this Schedule without prior written consent from SCE, to be granted or denied at SCE's sole discretion. Any assignment and assumption shall be in a form acceptable to SCE. The Customer Participant's successor in interest must assume all rights and obligations under this Schedule.

6. Infrastructure: SCE, at its sole discretion and in accordance with its applicable tariffs and design standards, will locate, design, and install the required Infrastructure, as defined in Special Condition 1.f, necessary for participation in Schedule CRP.

   Customer Participant may choose to design, purchase, install, and maintain the Infrastructure on the Customer Participant's side of the meter. If this option is chosen, Customer Participant must submit its construction plans to the relevant authority having jurisdiction (e.g., city, county, fire, Division of State Architect) to secure all necessary reviews and approvals. Engineering plans and estimated construction costs must be submitted to SCE. Following approval, construction of such Infrastructure must be performed by IBEW-certified, EVITP-certified, C-10 licensed, and insured contractors.

7. Metering for Data Usage: Customer Participants must have an Edison SmartConnect® meter, a meter acceptable under the Plug-In Submetering Protocol (i.e., Decision 22-08-024), or other SCE-approved meter dedicated to registering EVSE load to participate on this Schedule. Customer Participants must agree to provide SCE usage and other data from the EVSE. (N) (N)

(Continued)

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

8. All Other Applicable Tariffs Apply: All other applicable SCE tariffs apply to service provided pursuant to this Schedule, with the following exceptions:

   Rule 15 (Distribution Line Extension) and Rule 16 (Service Line Extension): Sections in Rules 15 and 16 that address applicant responsibilities or options may not be applicable to Customer Participants while participating in this Schedule. This may include, but is not limited to, allowances, contributions or advances, payments, refunds, and design and installation options. This exception does not apply to certain responsibilities found in Rule 16, such as, but not limited to, Section A.10, providing rights of way or easements; Section A.11, providing access to the location; and Section D.1, providing a clear route for the Service Extension.

9. EVSE Warranty: SCE does not represent any expressed, implied or prospective warranty, including any warranty of merchantability or fitness for any particular use or application, of any EVSE.

10. Noncompliance: If the Customer Participant fails to comply with any of the terms and/or conditions of this Schedule and/or associated agreement, SCE may terminate the Customer Participant's participation in this Schedule after sending Customer Participant a notice of default that remains uncured for five (5) business days from receipt, except for safety or security violations, in which case, SCE may terminate the agreement immediately and take all actions, including, but not limited to, disconnecting the EVSE, if necessary, in SCE's sole discretion, to cure such safety or security violation(s).

11. Termination Costs: Prior to the end of the 10-year Term of Service under Special Condition 4 of this Schedule, if Customer Participant with an executed Program Participation Agreement (1) elects to terminate its participation in this program or (2) if the Customer Participant's participation is terminated by SCE due to Noncompliance under Special Condition 10, the Customer Participant shall pay all costs incurred by SCE in connection with deploying the Infrastructure and EVSE at the participating Charging Site on a prorated basis (over the 10-year Term of Service), including the Rebate Payment(s) (if already paid), within 60 days from the termination date.

(Continued)

Schedule CRP
CHARGE READY PROGRAM

SPECIAL CONDITIONS (Continued)

12. Electric Vehicle (EV) Charging Networks with EVSE Installation: Customer Participants must contract with a qualified EV charging network provider to obtain port-level usage data. Customer Participants, excluding those participating in the Own and Operate Program option, must pay any costs or fees resulting from such services. Customer Participants and their selected EV charging network providers must consent to providing SCE with usage and other information in the form and format specified by SCE. This includes, but not limited to, port-level EVSE usage and pricing information. SCE shall be allowed to collect or receive this data directly from the Customer Participants or their contracted EV charging network provider.

13. Participation in Demand Response (DR) Programs: Customer Participants must enroll in at least one qualifying EV charging-related DR Program.
