Schedule CS-Green Tariff Sheet 1
Community Solar-Green Tariff

APPLICABILITY

This Schedule is applicable to Bundled Service Customers (Customers) who:

1. are (1) residential Customers eligible for the California Alternate Rates for Energy (CARE) or Family Electric Rate Assistance (FERA) program (Qualifying Customers), or (2) Customers who serve as a Community Solar (CS) Facility project sponsor (Community Sponsor). Refer to Special Condition 1.c. below for more information;

2. reside in a census tract that is within a Disadvantaged Community (DAC) (see Special Condition 1 for definition of a DAC for the purposes of this Schedule); and

3. reside in a census tract that is within a five-mile radius of a CS Facility for the purposes of receiving a bill credit from having SCE procure 100 percent renewable energy from a CS Facility (CS-Green Tariff Program).

   Residential Customers who are not eligible for the CARE or FERA program (Non-Qualifying Customers) and 1) reside within a five-mile radius of a CS facility and 2) whose census tract is within a DAC are no longer eligible for this Schedule. (T) (T)

Customers residing in a community that is participating in the San Joaquin Valley pilot program, even if such customers' census tracts are not in a DAC, are eligible for service under this Schedule as long as such census tracts are located in whole or in part within 40 miles of a CS Facility project. This Schedule is available to Customers on a first-come, first-served basis for Qualifying Customers. (T)
Per Decision 24-05-065, SCE will transition DAC-Green Tariff (DAC-GT) program-eligible customers enrolled in this Schedule to Schedule DAC-GT once program modifications adopted in D 24-05-065 become effective. Customers served under this Schedule will be transitioned to SCE's DAC-GT program, which is estimated to be completed by early Q2 2025, at which point this Schedule will be closed. Qualifying Customers served under Schedules DM, DMS-1, DMS-2, and DMS-3 are eligible for this Schedule once the CS Facility is subscribed with 50 percent of Qualifying Customers. . (T)

This Schedule will be available for Customer participation once a CS Facility has achieved commercial operation.

The Developer of a CS Facility must enter into a Power Purchase Agreement with SCE. Refer to Special Condition 1.d. below for more information.

Community Solar-Green Tariff

APPLICABILITY (Continued)

A CS Facility will retain its eligibility to serve CS Customers throughout the life of that project, even if the local qualified DAC designations change in subsequent iterations of CalEnviroScreen.

Customers residing in a DAC that is considered an eligible DAC at the execution date of the Power Purchase Agreement for a CS Facility remain eligible to subscribe to that CS Facility and this Schedule, even if their DAC designation changes in subsequent iterations of CalEnviroScreen. This eligibility applies to both existing subscribers and customers not previously subscribed to the CS Facility.

TERRITORY

Within the territory considered in the top 25 percent of DACs, based on the latest version of CalEnviroScreen, or qualified under CalEnviroScreen 3.0, or within the census tracts in the top 5 percent of pollution burden that do not have an overall CalEnviroScreen score, and within a five-mile radius of a CS Facility. In addition, census tracts for customers residing in communities participating in the San Joaquin Valley pilot program that are located in whole or in part within 40 miles of a CS Facility project. Additionally, all California Indian Country, as defined in 18 United States Code Section 1151, with the exception of privately held in holdings, which are defined as non-Indian owned fee land located within the exterior boundaries of California Indian Country; in the event of multiple owners, such land shall be considered Indian-owned if at least one owner is a tribe member, regardless of the use of the land. (T)

RATES

All charges, credits, and provisions of a Customer's Otherwise Applicable Tariff (OAT) apply. In addition, the total amount billed to the Customer by SCE shall be adjusted by applying the following credit:.

DAC Credit: A 20 percent credit will be provided to a Customer's OAT total bill prior to the application of state and local taxes

If a Customer who is eligible for CARE or FERA enrolls in CARE or FERA in the process of signing up for this Schedule, the 20 percent DAC Credit will be applied to the Customer's new CARE or FERA bill.

SPECIAL CONDITIONS

1. Definitions. The following definitions are applicable to Customers served under this Schedule:

   a. DAC Credit. A 20 percent credit will be provided to a Qualifying and Non-Qualifying Customer's OAT total bill prior to the application of state and local taxes. Community Sponsors taking service under this Schedule shall be eligible for a 20 percent bill credit on load up to 25 percent of the CS Facility's capacity.

   b. CS Facility: A CS Facility is a Renewable Portfolio Standard (RPS) eligible generating facility that is located within a DAC, and is within five miles of the census tracts in which subscribing customers reside (unless a subscribing customer lives in a San Joaquin Valley pilot program community, in which case the facility must be within 40 miles of the subscribing customer's census tract) for the purposes of meeting Customer subscriptions under this Schedule. Projects will have a nameplate rated generating capacity no larger than 4.39 MW for any one project.

   c. Community Sponsor: Local non-profit community-based organizations or local government entities, including schools, located in SCE's service territory. Community Sponsors must demonstrate community involvement and awareness by sponsoring a Community Solar Green Tariff project on behalf of the residents. A Community Sponsor taking service under this Schedule, located within a DAC and within a census tract that is within a five-mile radius of the CS project shall be eligible for a 20 percent bill credit for usage up to 25 percent of the project's estimated output, not to exceed the Community Sponsor's energy needs. Any usage above 25 percent of the project's energy output will be billed at the Community Sponsor's OAT and not subject to the 20 percent bill credit. The 20 percent bill credit will apply once 50 percent of the project's capacity has been subscribed by Qualified Customers. Multiple Community Sponsors can sponsor a single Community Solar Green Tariff project and share in the 20 percent bill credit up to 25 percent of the project's energy output provided that all sponsors meet the eligibility requirements above.

   d. Disadvantaged Community (DAC): A community that is identified by the latest version of CalEnviroScreen as among the top 25 percent of census tracts statewide, or that qualified under CalEnviroScreen 3.0. In addition, communities within the census tracts in the highest 5 percent of the CalEnviroScreen's Pollution Burden, but that do not have an overall CalEnviroScreen score because of unreliable socioeconomic or health data are also designated as a DAC for purposes of this Schedule. Additionally, all California Indian Country, as defined in 18 United States Code Section 1151, with the exception of privately held in holdings, which are defined as non-Indian owned fee land located within the exterior boundaries of California Indian Country; in the event of multiple owners, such land shall be considered Indian-owned if at least one owner is a tribe member, regardless of the use of the land. (T) (T) (T) (T)

   e. Developer: The entity who is responsible for (1) entering into a Power Purchase Agreement with SCE; (2) developing and operating the CS Facility; and (3) securing one or more Community Sponsor(s) for the CS-Green Tariff project.

SPECIAL CONDITIONS (continued)

1. Definitions. (Continued)

   f. Power Purchase Agreement (PPA): An agreement between a Developer and SCE is required for the sale and purchase of the power produced by a CS Facility pursuant to the procurement mechanism authorized in Decision 18-06-027, as may be modified by the CPUC from time to time. A Customer served under this Schedule is not a third-party beneficiary of the PPA.

   g. Qualifying Customer: Residential Customer eligible for the CARE or FERA program and residing in a DAC as defined in Special Condition 1.d. above. CARE or FERA Customers who, after enrollment into the CS-Green Tariff Program, become ineligible for CARE or FERA will be removed from this Schedule.

   h. Non-Qualifying Customer: Residential Customer not eligible for the CARE or FERA program who resides in a DAC as defined in Special Condition 1.d. above

2. Customer Enrollment and Term. After a CS Facility has achieved commercial operation, service under this Schedule shall become effective within two billing periods after SCE receives a request from a Customer to take service hereunder. Customers who enroll on this Schedule are required to remain on it for 12 months. There is no termination fee associated with de-enrolling from the CS-Green Tariff Program after 12 months. In the event a Customer elects to no longer receive service under this Schedule after meeting the 12-month requirement, the change will become effective at the start of the next billing period after the date that SCE receives the Customer's request to de-enroll from the CS-Green Tariff Program.

   In the event that a Qualifying or Non-Qualifying Customer moves and turns off service at his/her current address and moves to a new location, the Customer will need to recertify eligibility at the new location for service under this Schedule. Customer will retain his/her status as a program participant as long as the customer meets all eligibility criteria, program capacity is available, and the customer's turn-on date at the new location is within 90 days of the final billing date at his/her previous location.

Community Solar-Green Tariff

SPECIAL CONDITIONS (continued)

2. Customer Enrollment and Term. (Continued)

In addition, service under this Schedule shall automatically terminate at the start of the next billing period if the PPA between SCE and the Developer for the CS facility to which the Customer is subscribed is terminated or the delivery term ends.

3. Customer Subscription. The registered load (kWh) served by SCE during each billing period for a Customer electing to participate on this Schedule. Customers cannot be subscribed to more than one CS Facility at any time.

The maximum Customer Subscription served under this Schedule cannot exceed 2 MW of nameplate rated generating capacity from a CS Facility.

4. Participation in Other SCE Programs.

a. Demand Response (DR) Programs: Customers served under this Schedule can concurrently participate on any DR Programs for which they are otherwise eligible. All DR payments and credits are based on a Customer's metered usage and are not impacted by the kWh allocated based on the Customer's Subscription.

b. Net Energy Metering (NEM) or Net Billing Tariff (NBT): Customers served under this Schedule cannot concurrently participate on any NEM or NBT tariff. (T) (T)

c. Green Rate Programs: Customers served under this Schedule cannot concurrently participate on Schedules GTSR-GR, GTSR-CR, or DAC-Green Tariff.

d. DA / CCA / CA: Customers participating in Direct Access (DA), Community Choice Aggregation Service (CCA Service), or Community Aggregation (CA) are not eligible to receive service under this Schedule.

e. Master Meter Customers: Customers served under a master meter rate schedule (i.e., Schedules DM, DMS-1, DMS-2 or DMS-3) are eligible to receive service under this Schedule once the CS Facility is subscribed with 50 percent of Qualifying Customers.

5. Metering. All Customers must be metered according to the requirements of their OAT.
