Schedule NEM-V-ST Sheet 1

VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES SUCCESSOR TARIFF

APPLICABILITY

This Schedule is applicable to Qualified Customers served on time-of-use (TOU) rates whose Service Account(s) are located within a multi-tenant and multi-meter[i] Property upon which one or more Eligible Generators have been installed pursuant to California Public Utilities (PU) Code Section 2827.1 and California Public Utilities Commission (Commission) Decision (D.)16-01-044 and D.22-12-056, subject to the additional terms and conditions contained herein and any other applicable state or federal laws; and for which the Owner or Operator of the Property contracts with SCE to have all eligible energy produced by the Eligible Generator(s) and exported to the grid supplied to SCE for the sole purpose of providing Allocated Credits to designated Benefiting Accounts within the same Property as the Eligible Generator(s).[ii] (T)

This Schedule is closed to new Qualified Customers as of February 15, 2024. Qualified Customers who are receiving service on this Schedule, or who have submitted all documentation necessary to receive service on this Schedule prior to February 15, 2024, are subject to the Legacy provisions provided in Special Condition 9 and the Sunset Date pursuant to Special Condition 13 below.

Qualified Customers who participate in Direct Access (DA), Community Choice Aggregation (CCA) or Community Aggregation (CA) Service are eligible for service under this Schedule consistent with the NEM services that SCE provides to its Bundled Service Qualified Customers, except as otherwise provided herein, provided the Qualified Customer's Electric Service Provider (ESP), Community Choice Aggregator or Community Aggregator offers a NEM tariff or program consistent with the provisions of this Schedule. DA, CCA or CA Service Qualified Customers must look to their ESP, Community Choice Aggregator or Community Aggregator for NEM services related to the generation charges and credits that result from receiving service under this Schedule.

This Schedule is also applicable to Qualified Customers whose Eligible Generators meet the definition of a NEM-Paired Storage System as defined in Special Condition 1.j below. Such Qualified Customers shall be additionally subject to the provisions of Special Condition 5 below.

Customers served under Schedules TOU-GS-1-RTP, TOU-GS-2-RTP, TOU-GS-3-RTP, TOU-8-RTP, and TOU-8-RTP-S are not eligible to participate on this Schedule.

NEM-V-ST Legacy Qualified Customers, as defined in Special Condition 9, who replace a Renewable Electrical Generating Facility due to impacts of a Natural Disaster will remain eligible under this Schedule pursuant to Special Condition 11.

Qualified Customers and Beneftting Customers cannot be served under any Net Energy Metering schedule concurrently with this Schedule. Benefiting Customers may participate as a Net Billing Tariff customer under the provisions of Special Condition 14. (N) | (N)

TERRITORY

Within the entire territory served.

[i] Multi-Meter means two or more utility revenue meters participating in the NEM-V-ST program, in addition to the Generating Account meter.

[ii] Multiple generators on a property may have the generation combined from a billing perspective and the credits allocated across all the benefiting accounts on the same property. (T)

(Continued)

Schedule NEM-V-ST Sheet 2
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

RATES

All terms and conditions of the Qualified Customer's Otherwise Applicable Tariff (OAT) apply except that the NBCs, Allocated Credits and NSC for which this Schedule provides will be applied to the monthly bills for all eligible Benefitting Accounts designated by the Owner or Operator. An Allocated Credit, as further described in Special Condition 4.b below, is determined by multiplying the kilowatthours (kWh) that the Eligible Generator(s) delivers to the grid by the allocation percentages designated by the Owner or Operator in the Allocation Request Form for the Benefitting Accounts located on the Property. The Allocated Credit is then used to reduce the amount of energy (kWh) billed to the Benefitting Accounts, as described in Special Condition 4.c below.

1. Mandatory TOU Rates.

   a. Qualified Customers must receive service on a TOU rate schedule (which is then considered the Qualified Customer's OAT for the purpose of this Schedule), with no exceptions and no option to opt-out to an underlying rate option that is not time differentiated, at the time the Qualified Customer begins service on this Schedule, except as provided in 1.e below.

   b. The default TOU rate for Residential Qualified Customers taking service under this Schedule is Schedule TOU-D, Option 4 to 9 p.m though Residential Qualified Customers may elect another TOU rate option for which they are eligible. (T)

   c. Residential Qualified Customers who are served under this Schedule or for whom the Owner or Operator submits all documentation necessary to receive service under this Schedule prior to the implementation of default Residential TOU rates in SCE's service territory (expected to be in 2019, subject to Commission direction) have the option to stay on the TOU rate that they are served on at that time for a period of five years from the date the Qualified Customer commenced service on that TOU rate.

   d. Any Residential Qualified Customer for whom the Owner or Operator submits all necessary documentation for service under this Schedule after default Residential TOU rates have been implemented in SCE's service territory (expected to be in 2019, subject to Commission direction) shall be put on the appropriate default TOU rate as a condition of receiving service under this Schedule. Such Qualified Customers may opt out of their default TOU rate, but must switch to another available TOU rate for which they are eligible in order to continue receiving service under this Schedule.

   e. Residential Qualified Customers for whom an eligible TOU rate option does not exist are eligible for service on this Schedule while on a non-TOU rate but must begin receiving service on a TOU rate option for which they are eligible as soon as one becomes available in order to continue receiving service on this Schedule.

(Continued)

Schedule NEM-V-ST Sheet 3
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

RATES (continued)

2. Nonbypassable Charges (NBCs).

For the purpose of this Schedule only, NBCs include the following rate components, as provided in the Qualified Customer's OAT: (1) Public Purpose Programs Charge (PPPC), (2) Nuclear Decommissioning Charge (NDC), (3) Competition Transition Charge (CTC), and (4) Wildfire Fund Non-Bypassable Charge. (T) (T)

As determined in each billing period, a Qualified Customer is responsible for NBCs, assessed on a $-per-kWh basis using the NBC factors contained in the Qualified Customer's OAT, for each kWh of electricity that is consumed/imported from the grid (i.e., E_S, as defined below) in each metered interval (e.g., one hour or 15-minute). Allocated Credits cannot be used to offset or net the kWh on which a Qualified Customer's NBCs are based.

For DA, CCA or CA Service Qualified Customers, the CTC and WFC NBC components are based on the factors contained in Schedules DA-CRS and CCA-CRS, as applicable, and the PPPC and NDC NBC components are based on the factors contained within the Qualified Customer's OAT. NBCs are assessed on a $-per kWh basis for each kWh of electricity that is consumed/imported from the grid (i.e., E_S, as defined below) in each metered interval (e.g., one hour or 15-minute). Allocated Credits cannot be used to offset or net the kWh on which a DA, CCA or CA Service Qualified Customer's NBCs are based. (T)

For Residential Qualified Customers, the assessed NBCs will be used in the Minimum Charge calculation consistent with how these components are used in the Minimum Charge calculation for non-NEM Residential customers.

Qualified Customers who are enrolled in California Alternate Rates for Energy (CARE) or who receive a Medical Baseline Exemption are currently exempt from the WFC. Therefore, the WFC component of the NBCs for these Qualified Customers under this Schedule is $0.00. (T) | (T)

(Continued)

Schedule NEM-V-ST Sheet 4
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

RATES (continued)

3. Monthly Energy (kWh) Charges and Credits.

As determined in each billing period, when a Qualified Customer is a net consumer of energy, E_S is greater than E_F, where E_S is energy supplied from the grid and E_F is the Allocated Credit, the resulting net consumed energy will be used in the calculation of all applicable energy charges, with the exception of the NBCs as outlined above, calculated by (1) multiplying the Qualified Customer's net consumed kWh by the applicable energy rate components of the Qualified Customer's OAT, in each TOU period, for Bundled Service Qualified Customers, or (2)(a) multiplying the Qualified Customer's net consumed kWh by the applicable Delivery Service rate components of the Qualified Customer's OAT, in each TOU period, and (b) multiplying the Qualified Customer's net consumed kWh by the applicable Cost Responsibility Surcharge (CRS) rate components (e.g., PCIA) of Schedules DA-CRS or CCA-CRS that are not defined as NBCs above, in each TOU period, for DA, CCA or CA Service Qualified Customers. The Qualified Customer's ESP or Community Choice Aggregator/Community Aggregator is responsible for providing the generation-related energy charges. NBCs, as defined above, are not included as part of these calculations.

As determined in each billing period, when a Qualified Customer is a net producer of energy, E_F is greater than E_S, the resulting net produced energy will be used in the calculation of energy credits, calculated by (1) multiplying the Qualified Customer's net produced kWh by the applicable energy rate components of the Qualified Customer's OAT, in each TOU period, for Bundled Service Qualified Customers (though in no case can Allocated Credits result in the reduction of the NBCs owed by the Qualified Customer), or (2)(a) multiplying the Qualified Customer's net produced kWh by the applicable Delivery Service rate components of the Qualifying Customer's OAT, in each TOU period, and (b) multiplying the Qualified Customer's net produced kWh by the applicable CRS rate components (e.g., PCIA) of Schedules DA-CRS or CCA-CRS that are not defined as NBCs above, in each TOU period, for DA, CCA or CA Service Qualified Customers (though in no case can Allocated Credits result in the reduction of the NBCs owed by the Qualified Customer). The Qualified Customer's ESP or Community Choice Aggregator/Community Aggregator is responsible for providing the generation-related energy credits. NBCs, as defined above, are not included as part of these calculations.

(Continued)

Schedule NEM-V-ST Sheet 5
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

RATES (continued)

4. Account Set-Up and Administrative Charges. Qualified Customers are subject to the following additional charges:

   a. A one-time set-up charge of $25 per newly established Benefitting Account, capped at $500 per NEM-V-ST arrangement.

   b. For changes to the Benefitting Account allocation percentage, as described in Special Condition 4.b.(1) below, there will be no charge for up to one change per Benefitting Account per 12-month period. Any and all subsequent changes to each account within the 12-month period will be charged at $7.50 per account change billed to the Generating Account.

   c. Benefitting Accounts who are on an OAT with demand charges, and who wish to receive a demand credit, will need to notify SCE, and an incremental billing fee of $400 per month, per account, will be charged.

   d. Disconnect/Reconnect. SCE will inform the Owner at the site assessment about what reasonable disconnect/reconnect procedure charges they may expect at the time of interconnection. Cost for disconnect/reconnect will vary depending on the number of hours required to complete this work based on factors including, but not limited to, grounding or splicing requirements, effect of disconnect on multiple customers, SCE's need to stand by during customer performed work or if the disconnect/reconnect occurs outside normal business hours. This policy and cost variations are consistent with charges for disconnect/reconnect for all customers, not just for Qualified Customers served under this Schedule. The Disconnect/Reconnect charge could range from $0-$5,000.

(Continued)

Schedule NEM-V-ST Sheet 6
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

RATES (continued)

5. Net Surplus Compensation (NSC).

Net Surplus Compensation (NSC) is equal to the Net Surplus Compensation Rate (NSCR) multiplied by Net Allocated Surplus Energy. To calculate NSC, the kWh of Net Allocated Surplus Energy are multiplied by the NSCR. The NSCR is based on the default load aggregation point (DLAP) price, and is equal to the simple rolling average of SCE hourly $-per-kWh prices from the Hour Ending 08 through the Hour Ending 17 (7 a.m. to 5 p.m.) for each day of the 12-month period corresponding to the Qualified Customer's 12-month Relevant Period. The rolling average is calculated on a monthly basis to be effective the first of each month and is applied to all Qualified Customers with a Relevant Period ending in that month. SCE uses a full 12 months (365 days, or 366 days for leap years) of DLAP prices, as published on the California Independent System Operator (California ISO) Open Access Same-time Information System (OASIS), ending the twentieth (20th) day of each month. SCE then calculates the NSCR within five days of the first of the month to allow the California ISO to finalize the day-ahead DLAP prices. The NSCR is applied to all eligible Qualified Customers with Net Allocated Surplus Energy, irrespective of their rate class. The NSCR is posted on SCE's website and updated monthly.

See Special Condition 4.g below for specific terms and provisions regarding NSC.

NSC Renewable Attribute Adder (RAA)

Pursuant to D.11-06-016, SCE will include a Renewable Attribute Adder (RAA) with the NSC rate if the Owner or Operator or an aggregator provides a completed Form 14-935 (see Special Condition 4.g.iv below) verifying that the Qualified Customer: (1) has registered the Eligible Generator at the Western Renewable Energy Generation Information System (WREGIS); (2) has obtained Renewables Portfolio Standard (RPS) ownership certification from the California Energy Commission (CEC) for the Qualified Customer's Net Allocated Surplus Energy and provides this certification to SCE; and (3) allows for the ownership of the Renewable Energy Credits (RECs) associated with the Qualified Customer's Net Allocated Surplus Energy to be transferred to SCE. For details on the CEC and WREGIS certification process, refer to the CEC's RPS Eligibility Guidebook, which can be found at:
http://www.energy.ca.gov/renewables/documents/#rps.

The RAA will be calculated using the most recent Western Electricity Coordinating Council (WECC) average renewable premium, based on United States Department of Energy (DOE) published data. The RAA will only be paid to those eligible Qualified Customers who provide RECs to SCE.

Value of RECs = Net Allocated Surplus kWh x RAA.

The RAA will be updated annually and is available at:
https://www.sce.com/wps/portal/home/regulatory/tariff-books/rates-pricingchoices/renewable-energy-credit.

(Continued)

Schedule NEM-V-ST Sheet 7
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

RATES (continued)

5. Net Surplus Compensation (NSC). (continued)

   At the conclusion of each Relevant Period, the eligible Qualified Customer will notify SCE that the Qualified Customer has transferred the RECs associated with the Net Allocated Surplus Energy in WREGIS by completing Form 14-935 and will send the CEC RPS certificate with the form to SCE.

6. Standby and Customer Generation Departing Load Charges.

   No additional Standby or Customer Generation Departing Load charges are applicable to Qualified Customers served under this Schedule, as provided in SCE's Standby and Customer Generation Departing Load tariffs.

(Continued)

Schedule NEM-V-ST Sheet 8
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS

1. Definitions: Except as otherwise defined in SCE's Electric Rule 1, capitalized terms utilized in the context of this Schedule are defined below and applicable to Qualified Customers receiving service under this Schedule.

   a. Qualified Customer. A Qualified Customer is: (i) the Owner or Operator of the multi-tenant, multi-meter Property with one or more separately metered Benefitting Accounts; (ii) an entity authorized by the Owner to install and/or operate Eligible Generator(s) and who will be SCE's customer of record on the Generating Account(s); or (iii) a tenant/occupant of the Property with a separately metered TOU account that is located on the same Property as the Eligible Generator(s) and is designated as a Benefitting Account by the Owner or Operator. (T) (T)

   b. Owner. An Owner is the Qualified Customer who has the legal right or rightful claim to ownership of the Property on which one or more Eligible Generator(s) have been installed.

   c. Operator. An Operator is a Qualified Customer who operates a business by leasing or renting the Property from an Owner and who has an Eligible Generator(s) located on the Property. (T)

   d. Generating Account. The TOU account to which an Eligible Generator is interconnected with SCE through a single meter for which the Owner or Operator is an SCE customer.

   e. Benefitting Account. Each Qualified Customer TOU Service Account that the Owner has designated on the Allocation Request Form to receive an Allocated Credit.

   f. Arrangement. One or more Generating Account(s) and all designated Benefitting Accounts receiving Allocated Credits from the Generating Account(s). A Qualified Customer may have more than one Arrangement, but each Generating Account and Benefitting Account can only be designated to a single Arrangement. When adding a new Generating Account, the Qualified Customer can make changes, including adding new Benefitting Accounts, to an existing Arrangement by indicating so in the Generating Facility's Interconnection Request. A Qualified Customer can make modifications to any existing Arrangement(s) in accordance with Rates, Section 4 of this Schedule. There must be more than one Benefitting Account per Arrangement. (T) | (T) (N) | | | (N)

   g. Property. All of the real property and apparatus employed in a single multi-tenant or multi-meter facility on contiguous parcels of land. These parcels may be divided by a dedicated street, highway or public thoroughfare or railway, so long as they are otherwise contiguous, part of the same single multi-tenant or multi-meter facility, and all under the same ownership.

(Continued)

Schedule NEM-V-ST Sheet 9
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS

1. Definitions. (continued)

h. Eligible Generator(s).

i. A Renewable Electrical Generating Facility that is: (A) located on the Owner or Operator's Property; (B) interconnected and operates in parallel with the electric grid; and (C) intended primarily to offset part or all of the combined electrical requirements of all designated Benefitting Accounts.

ii. To be eligible for service under this Schedule, Eligible Generators must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability (e.g., SCE's Electric Rule 21) or the California Independent System Operator (CAISO) Tariff. This includes, but is not limited to, criteria listed in Sections L.2-L.4 and Section L.7 of Electric Rule 21. All Eligible Generators must have a warranty of at least 10 years for all equipment and the associated installation from the system provider (not from SCE).[iii] For all Eligible Generators, any other equipment, as determined by SCE, must be verified as having safety certification from a Nationally Recognized Testing Laboratory (NRTL). (T) (T) (D)

iii. Sizing. Qualified Customers' Eligible Generators must meet the sizing requirements outlined below in order to be eligible for service under this Schedule.

A. Sized to Load Requirement (Annual Solar Energy Credit): The total energy (in kWh) estimated to be recorded by the generation output meter(s) on the Eligible Generator(s) and allocated to the Benefitting Accounts must not exceed the total estimated energy usage (in kWh) of the designated Benefitting Accounts for the next 12 months for a new Property, or the previous 12 months' recorded energy usage for an existing Property. Compliance with this requirement will be determined at the onset of the program when SCE conducts an energy audit of the Qualified Customer's Property.

[iii] Warranties or service agreements conforming to requirements applicable to the Self-Generation Incentive Program (SGIP) may be used for technologies eligible for the SGIP. In appropriate circumstances conforming to industry practice, this requirement may also rely on and be satisfied by manufacturers' warranties for equipment and separate contractors' warranties for workmanship (i.e., installation).

Schedule NEM-V-ST Sheet 10
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

h. Eligible Generator(s). (continued)

iii. Sizing. (continued)

B. Capacity: The combined capacity of all Eligible Generators on the Property is limited to the cumulative peak loads of all designated Benefitting Accounts. No generator other than the Eligible Generator can be connected behind the single generation output meter that is used to meter the load and generation output of each Eligible Generator. Primarily for the purposes of interconnection, interconnection cost responsibility (as outlined in SCE's Electric Rule 21) and NSC eligibility (as outlined in Special Condition 4.g below), certain provisions apply differently to Eligible Generators served under this Schedule depending on whether they have a capacity of (1) 1 MW or less or (2) greater than 1 MW. The capacity of each generator will be determined by using the "System Size Limiting Factor" table within SCE's Electric Rule 21, Section F, which, for solar systems, is the lesser of inverter name plate capacity (in kW) or the CEC-AC rating. The aggregate nameplate capacity of the facility is calculated by adding the capacity of all generators located at the Customer's Premises (including Integrated or Directly Connected Energy Storage Devices, if any). For Eligible Generators utilizing fuel cell technology, to be considered as a 1 MW or smaller Eligible Generator, the total Eligible Generator capacity must not exceed 1 MW CEC-AC Nameplate rating and the lesser of (1) 1 MW aggregate inverter capacity or (2) 1 MW aggregate fuel cell gross nameplate capacity. (N) | | | | | (N) (D)

i. Renewable Electrical Generating Facility. A facility that generates electricity from a renewable source listed below pursuant to paragraph (1) of subdivision (a) of Section 25741 of the Public Resources Code. These renewable sources are further defined in the CEC's Renewable Portfolio Standard (RPS) Guidebook.[iv]

Biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells using renewable fuels, small hydroelectric generation, digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current (Renewable Generator), and any additions or enhancements to the facility using that technology.

For certain technologies, the Owner or Operator will be required to sign an affidavit (Form 14-912) certifying that they are using an eligible Renewable Electrical Generating Facility. Specifically, an Owner or Operator using municipal solid waste conversion, fuel cells using renewable fuel, or small hydroelectric generation will need to certify that the following technology specific criteria have been met:

i. For purposes of this Schedule, qualifying "municipal solid waste conversion" is as defined in Public Resources Code Section 25741(b).

[iv] RPS Eligibility Guidebook: http://www.energy.ca.gov/renewables/documents/#rps.

(Continued)

Schedule NEM-V-ST Sheet 11
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

i. Renewable Electrical Generating Facility. (continued)

ii. For purposes of qualifying as a "fuel cell using renewable fuels" under this Schedule, the Owner or Operator's fuel cell must be powered solely with renewable fuel.

iii. For purposes of qualifying as a "small hydroelectric generation facility" under this Schedule, the Owner or Operator must certify that the facility will neither cause an adverse impact on instream beneficial uses nor cause a change in the volume or timing of streamflow.

j. NEM-Paired Storage System. An Eligible Generator that includes a Renewable Generator(s) and an Integrated or Directly Connected Energy Storage Device(s) behind the same SCE revenue meter and/or Service Account. Integrated or Directly Connected Energy Storage Devices are considered an addition or enhancement to the Renewable Generator and not a separate generating facility for the purposes of applying the cost exemptions specified in Special Condition 5 below when interconnecting at the same time as the Renewable Generator. (N)

An energy storage device shall be considered an addition or enhancement to the Renewable Generator if the energy storage device is either:

i. Integrated into the Eligible Generator, such that the energy storage device is capable of storing only energy produced by the Renewable Generator, either as an intermediary form of energy during the generation cycle or after electricity has been generated (Integrated Energy Storage Device); or,

ii. Directly connected to the Eligible Generator, such that electricity is delivered from the Renewable Generator to the energy storage device behind the meter used for RPS purposes and any electricity from a source other than the Renewable Generator is included as an energy input to the Eligible Generator; the energy storage device must be operated as part of the Eligible Generator represented in the application and not in conjunction with any other facility, renewable or otherwise (Directly Connected Energy Storage Device). As such, a Directly Connected Energy Storage Device is not required to be charged exclusively from the Renewable Generator and may also be charged from the grid.

k. Large NEM-Paired Storage System. A NEM-Paired Storage System where the Integrated or Directly Connected Energy Storage Device(s) is sized larger than 10 kW (AC) (i.e., maximum aggregate discharge capacity) and that meets the applicable sizing and metering requirements included in Special Condition 5 below.

l. Small NEM-Paired Storage System. A NEM-Paired Storage System where the Integrated or Directly Connected Energy Storage Device(s) is sized 10 kW (AC) or smaller (i.e., maximum aggregate discharge capacity) and that meets the applicable sizing and metering requirements included in Special Condition 5 below. (N)(L)

(Continued)

Schedule NEM-V-ST Sheet 12
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

m. Relevant Period. A twelve-month period, or portion thereof, commencing on the start of the next regular billing period following the Date of Parallel Operation of the Owner or Operator's Eligible Generator(s) to SCE's electric system, for purposes of participating in the NEM-V-ST program, and on every subsequent anniversary thereof. For Qualified Customers electing to receive service under this Schedule for an Eligible Generator(s) that is already interconnected to SCE's electrical system, the Relevant Period will commence on the date that the Qualified Customer begins receiving service under this Schedule and on every subsequent anniversary thereof. Additionally, the following provisions apply:

i. If a Qualified Customer terminates service or if the identity of the Qualified Customer changes before the end of a Relevant Period, the Relevant Period for that Qualified Customer's Service Account will consist of that period from the Date of Parallel Operation, or a subsequent anniversary date, until the effective date of termination or change of identity. If the identity of the Qualified Customer changes at the location of an installed Service Account, a new Relevant Period will commence for that Qualified Customer on the start of the next regular billing period following the date the new Qualified Customer takes service under this Schedule, and every subsequent anniversary thereof.

ii. If an Owner or Operator terminates service under this Schedule for the Property prior to the end of any Relevant Period, the Relevant Period for all associated Benefitting Accounts will end on the effective date of the service termination.

iii. If a change of Owner or Operator occurs for the Property prior to the end of any Relevant Period, the Relevant Period for the Owner's or Operator's associated Benefitting Accounts will end. The new Owner's or Operator's associated Benefitting Accounts will automatically be placed on this Schedule and a Relevant Period will begin for that new Owner or Operator on the start of the next regular billing period following the date the new Owner or Operator takes service under this Schedule, and every subsequent anniversary thereof. Qualified Customers in individual tenant units will retain their designated Relevant Period as defined prior to the change of ownership.

iv. Except for customers who opted out of CCA Service during the CCA's Follow-up Notification Period in accordance with Rule 23 Section I, if a Qualified Customer experiences a change from DA or CCA/CA Service to Bundled Service or from Bundled Service to DA or CCA/CA Service, the Relevant Period will consist of that period from the anniversary date until the effective date of the change in service. (N) (N)

Qualified Customers may elect to change the start date of their Relevant Period on a one-time prospective basis by completing and returning Form 14-936, *NEM One-Time Relevant Period Change Request Form*, to SCE. SCE must receive this form at least 60 days prior to the requested start date of the new Relevant Period. When the start date change is effectuated, it will cause a shortened existing Relevant Period and the new 12-month Relevant Period will begin. In no case will a Relevant Period extend beyond 12 months.

(Continued)

Schedule NEM-V-ST Sheet 13
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

n. Date of Parallel Operation. The date that SCE and, if applicable, the CAISO provides the Owner or Operator with written approval (e.g., the Permission to Operate (PTO) notice) to commence parallel operation of the Eligible Generator(s).

o. Net Allocated Surplus Energy. Electricity allocated to a Benefitting Account in excess of the Benefitting Account's total metered usage over its Relevant Period.[v]

p. Otherwise Applicable Tariff (OAT). The Qualified Customer's regularly filed TOU rate schedule under which service is rendered.

q. Virtual Net Energy Metering (VNEM) – Paired Storage System: An arrangement where a storage device is included on the VNEM generating facility, where the storage device is located behind the same generation meter as that of the VNEM generating account and where control systems or relays are implemented to maintain NEM integrity by preventing the energy storage system from charging from the grid.

If the VNEM-paired storage device is found to charge from the grid, then this arrangement shall no longer be eligible for this tariff.

r. Modular Home: Modular home, although better constructed, is like manufactured home (as defined in the California Health and Safety Code) where both are constructed offsite. Unlike manufactured home, modular home must meet the same local or state building codes as an on-site home. Modular home does not have the requirement to have a wheeled chassis permanently attached.

s. Modular Home Community: A community with two or more Modular Homes.

t. Virtual Dual Tariff-Virtual Net Metering (VDT-VNM) Net Surplus Energy. Combined kWh electricity allocated to and generated by a Benefitting Account in excess of the Benefitting Account's total metered usage over its Relevant Period. (N) | (N)

[v] kWh subject to forfeit under the NEM-Paired Storage System estimation methodology provisions of Special Condition 5 below are not used in the determination of Net Allocated Surplus Energy.

(Continued)

Schedule NEM-V-ST Sheet 14
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

2. Required Application and Contracts for Interconnection. (L)

a. All Owners or Operators with Eligible Generators sized larger than 1 MW seeking interconnection with SCE's Transmission System shall apply to the CAISO for interconnection and be subject to the CAISO Tariff, and must submit an executed CAISO interconnection agreement prior to receiving service under this Schedule. Such Owners or Operators shall also submit an online *Net Energy Metering (NEM) Generating Facility Interconnection Application* (Form 14-957) to SCE for the purpose of determining eligibility under this Schedule, but shall not be required to submit any fee in connection with Form 14-957. These requirements are not applicable to Eligible Generators with PTO letters received as of May 6, 2022 or proposed Eligible Generators with materially complete interconnection applications submitted as of May 6, 2022.

All other Owners or Operators must submit an online *Net Energy Metering (NEM) Generating Facility Interconnection Application* (Form 14-957), along with any applicable fees as specified in SCE's Electric Rule 21, and an executed CPUC-jurisdictional *Virtual Net Energy Metering For Multi-Tenant and Multi-Meter Properties Interconnection Agreement For Generating Facilities Sized One Megawatt and Smaller* (Form 14-909) or *Virtual Net Energy Metering For Multi-Tenant and Multi-Meter Properties Interconnection Agreement For Generating Facilities Sized Greater Than One Megawatt* (Form 14-973) prior to receiving service under this Schedule. The Owner or Operator must also designate which Benefitting Accounts shall receive Allocated Credits and the applicable allocation percentage by completing and submitting Form 14-910, *Virtual Net Energy Metering For Multi-Tenant and Multi-Meter Properties Allocation Request Form*. (L)

To retain eligibility under this schedule all Qualified Customers must submit an interconnection request free of major deficiencies prior to February 15, 2024. This submittal shall include an online Net Energy Metering (NEM) Generating Facility Interconnection Application (Form 14-957), along with any applicable fees as specified in SCE's Electric Rule 21 a single-line diagram, a complete California Contractors State License Board Solar Energy System Disclosure Document (if applicable), a signed California Solar Consumer Protection Guide (if applicable), a Public Utilities Code Section 769.2 Prevailing Wage Disclosure Form (if applicable), and an oversizing attestation (if applicable). Supplemental forms may be required depending on (1) the type of Generating Facility being installed and (2) the requirements of any specific provisions of this Schedule under which the Customer is electing to be served.

Additionally, to retain eligibility under this schedule, within three years from February 14, 2024, Qualifying Customers must submit an executed CPUC jurisdictional NEM Interconnection Agreement and a final building permit sign off and electrical clearing by the authority having jurisdiction.

VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

2. Required Application and Contracts for Interconnection (L)

   b. Owners or Operators except those with Eligible Generators sized larger than 1 MW seeking interconnection with SCE's Transmission System seeking to interconnect their Eligible Generator(s) for the purpose of receiving service under this Schedule are subject to the interconnection requirements and interconnection cost responsibility provisions for NEM-ST Qualified Customers as established in SCE's Electric Rule 21. These costs may include interconnection application fees, study costs and/or costs for upgrading the Distribution and/or Transmission Systems, depending on the size of the Eligible Generator(s). Owners or Operators interconnecting under SCE's Electric Rule 21 are also responsible for the costs of any applicable Interconnection Facilities, as defined in SCE's Electric Rule 21, and applicable re-wiring, trenching, conduit, and other facility costs as needed. Owners and Operators with Eligible Generators sized larger than 1 MW seeking interconnection with SCE's Transmission System shall be subject to applicable interconnection requirements and interconnection cost responsibility provisions set forth in the CAISO Tariff. This requirement is not applicable to Eligible Generators with PTO letters received as of May 6, 2022 or proposed Eligible Generators with materially complete interconnection applications submitted as of May 6, 2022. (L)

3. Metering Requirements. Metering requirements for Qualified Customers served under this Schedule are as follows:

   a. The Owner or Operator will be responsible for and will pay for all costs associated with installing, on each Eligible Generator, a net generation output meter (NGOM) capable of recording generator output in 15-minute intervals and the flow of energy in two directions at the point of common coupling where each Eligible Generator transfers energy to SCE's grid (i.e., the Generating Account). Except as permitted in Special Condition 3.e below, the NGOM should record the entire generation intended for the benefit of all the Benefitting Accounts, which will be allocated in accordance with Special Condition 4 (Billing Process). The cost of the NGOM(s) is a one-time, upfront charge that includes material, labor, maintenance and replacement, and may vary from project to project depending on the type of NGOM required to interconnect a particular project. No additional load other than incidental load related to the inverters and support of the Eligible Generator(s) may be registered on the meter. SCE must approve the location of the NGOM equipment, which will normally be grouped with the service and metering equipment for one or more of the Benefitting Accounts. The Owner or Operator using a Performance Based Incentive (PBI) meter for California Solar Initiative (CSI) incentives will not be required to install an additional NGOM; however, the PBI meter will need to be: (i) a utility owned meter; (ii) a utility read meter where SCE will read the PBI meter data for purposes of providing CSI incentive payment; and (iii) installed in a location approved by SCE. Mutually exclusive of this metering requirement for CSI incentives, the Owner or Operator of a PBI system will need to contract separately for Performance Monitoring and Reporting Service (PMRS) as required by the CSI program. (L)

(Continued)

Schedule NEM-V-ST Sheet 16
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

3. Metering Requirements. Metering requirements for Qualified Customers served under this Schedule are as follows: (Continued)

   b. Each Benefitting Account must have a standard SCE TOU billing meter that is capable of Interval Metering.

   c. If the Generating Account is on DA service and the Owner or Operator uses a third-party Meter Data Management Agent (MDMA), the Owner or Operator will be responsible for any and all costs associated with providing SCE acceptable interval data into the SCE system on a timely basis.

   d. Additional metering provisions specific to NEM-Paired Storage Systems are included in Special Condition 5 below.

   e. Behind the Meter Isolated Operation:[vi] Owners or Operators may isolate the operation of their Generating Facility from SCE's electric grid to provide backup/standby services to one or more Benefitting Customers during a grid outage or testing periods. All loads the Generating Facility serves during isolated must share the same Point of Common Coupling as the Generating Account. The Owner Operators participating accounts must be configured in such a manner that no load or generation is registered on the Generating or Benefitting Customers meters during isolated operation. Prior to installing a new Generating Facility, or reconfiguring an existing Generating Facility to provide backup services, the Owner or Operator must receive written approval from SCE confirming that the configuration or reconfiguration of the Generating Facility complies with SCE's electrical and interconnection requirements. To obtain that approval, the Owner or Operator is not required to submit SCE's Rule 21 Application for Non-Exporting Generators. Instead, Owners and Operators can indicate their intent to isolate the operation of a new or existing Generating Facility through SCE's interconnection portal as reflected in SCE Form 14-957. (T)

      At all times, SCE has the right, in its sole discretion, to evaluate, deny a configuration, or approve other configurations designed to provide backup services to service meters connected behind the same Point of Common Coupling in a manner that does not register generation on the benefitting account meters. (T)

4. Billing Process. The following billing processes apply to Benefitting Accounts served under this Schedule.

   a. Gross Credit: The total metered kWh output of all Eligible Generators, delivered to SCE's grid, as metered at the point of common coupling, described in Special Condition 3.a above, during the billing period of the Generating Account.

[vi] Planned or Emergency Outages: During planned or emergency outages, operation in isolation of the Renewable Electrical Generating Facility and storage is permitted to serve onsite loads.

(Continued)

Schedule NEM-V-ST Sheet 17
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

4. Billing Process. (continued)

b. Allocated Credit:

i. The Owner or Operator determines the percentage of Gross Credit that will be allocated to the individual Benefitting Account(s) on the *Virtual Net Energy Metering For Multi-Tenant and Multi-Meter Properties Allocation Request Form* (Form 14-910). All Benefitting Accounts must be served on TOU rates. The Owner or Operator may designate in the same Allocation Request Form unallocated credit to one account. This is credit that is allocated to a particular unit but not applied to a Benefitting Account's bill due to occupant nonparticipation or unit vacancy. These allocations will become effective at the start of the next billing period following the Date of Parallel Operation of the Eligible Generator(s) with the electric grid. If the Owner or Operator wishes to request a change in the allocation percentages, a charge may be assessed as reflected under the Rates section above. Revised allocation percentages under this provision will become effective on the start of the next billing period that is at least 30 days after SCE receives the updated allocation request form.

ii. The individual allocation of kWh to each Benefitting Account is calculated by multiplying the Gross Credit by the designated percentage allocation for each individual Benefitting Account.

iii. Allocated Credits for Qualified Customers utilizing NEM-Paired Storage Systems are billed in accordance with the provisions of Special Condition 5 below.

iv. Change in Tenancy: When the customer of record of a Benefitting Account in an Arrangement served on this Schedule changes, the new Customer (or New Party In, NPI) will receive the same allocated percentage provided to the previous Benefitting Account with no action being required from the Customer. (N)

v. Vacant Units: Residential or nonresidential vacant units may have a zero percent allocation from the Renewable Electrical Generation Facility while the unit is vacant between tenancies. If a "Default Account" has been designated, then the allocated percentage benefit will be transferred to that "Default Account" based on the process detailed in this Schedule. (N)

c. Qualified Customer's Bill. SCE will provide each Qualified Customer with its net energy information with each regular bill. That information will include the monetary balance of energy charges and credits since the start of the current Relevant Period. Qualified Customers are responsible for all charges of their OAT. Each month, Allocated Credits, in kWh, are subtracted from the Benefitting Account's metered usage, in kWh. Certain Energy Charges, as provided in the Rates section above, are applied to the resulting kWh difference according to the rates of the Qualified Customer's OAT. The bill may therefore reflect either a charge or a credit for energy (kWh). Allocated Credits for each TOU period are subtracted from the energy usage for that same TOU period. Additionally, SCE will provide all Benefitting Accounts with the total amount of kWh imported from the grid (E_S), on which the Benefitting Account's NBCs are calculated, as outlined in the Rates section above. (L)

(Continued)

Schedule NEM-V-ST Sheet 18
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

4. Billing Process. (continued)

d. Bill Payment and True-Up. Qualified Customers are required to pay their bills on a monthly basis. Bill payments made by the Qualified Customer within the Relevant Period will continue to be applied to the Qualified Customer's account. Excess energy credits, in dollars, are carried over to the following billing period, until the end of the Relevant Period. An annual true-up of energy charges and credits occurs at the end of the Relevant Period. Upon completion of the annual true-up, any remaining energy credits will be retained by SCE and the Qualified Customer will not be entitled to any compensation unless the Owner or Operator has opted to participate in the NSC program, as provided in Special Condition 4.g below. Additionally, Special Condition 4.h may apply for Residential Qualified Customers. (L)

e. For all Qualified Customers served under this Schedule, all NBCs, as defined in the Rates section above, Monthly Customer Charges, Minimum Charges, Demand Charges, and/or other non-energy related charges, excluding any adjustments due to power factor provisions, as defined in the Qualified Customer's OAT, apply, as applicable, regardless of the amount of Allocated Credit applied to the Qualified Customer's Service Account.

f. Billing Provisions Applicable to DA, CCA or CA Service Qualified Customers.

i. For DA, CCA or CA Service Customers, SCE will provide the applicable Delivery Service and CRS charges and credits, and the Customer's ESP, Community Choice Aggregator or Community Aggregator is responsible for timely providing the applicable generation charges and credits. Generation credits, if any, do not reduce the charges owed to SCE for energy supplied to such customer, and Delivery Service and/or CRS credits, if any, do not reduce the charges owed to the ESP, Community Choice Aggregator or Community Aggregator for energy supplied to such Qualified Customer.

ii. For DA, CCA or CA Service Qualified Customers, separate annual true-ups of all charges and credits, consistent with the provisions set forth under this Schedule, will be calculated (A) by SCE for the applicable SCE Delivery Service and/or CRS charges and credits and (B) by the ESP or Community Choice Aggregator/Community Aggregator for the applicable ESP and CCA/CA generation charges and credits. Upon completion of the annual true-up, any remaining Delivery Service and/or CRS credits will be retained by SCE and the Qualified Customer will not be entitled to any compensation from SCE. DA, CCA or CA Service Qualified Customers are not eligible to receive NSC from SCE.

iii. ESP Charges: Where SCE provides metering and billing for a Qualified DA Customer, SCE may recover the incremental costs related to virtual net energy metering and billing services from the Qualified Customer's ESP, as set forth in Schedule ESP-DSF.

(Continued)

Schedule NEM-V-ST Sheet 19
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

5. NEM-Paired Storage Systems.

Pursuant to D.16-04-020, D.16-01-044 and D.14-05-033, where an Owner or Operator utilizes a NEM-Paired Storage System (as defined in Special Condition 1.j), the applicable provisions of this Special Condition 5 shall apply. Additionally, where this Special Condition conflicts with any other Special Condition within this Schedule, the provisions contained in this Special Condition shall prevail. Qualified Customers with NEM-Paired Storage Systems who take service under this Special Condition are exempt from Supplemental Review fees, Detailed Study costs, and the costs associated with any Distribution or Network upgrades triggered by the Interconnection Request, provided the Renewable Generator is sized 1 MW or smaller.[vii] Qualified Customers with NEM-Paired Storage Systems who take service under this Special Condition are exempt from Standby charges.

a. Sizing Requirements. The size of the Integrated or Directly Connected Energy Storage Device is determined by the inverter alternating current (AC) nameplate rating.

i. Small NEM-Paired Storage System: There are no additional sizing requirements for the Integrated or Directly Connected Energy Storage Device(s) relative to the size of the Renewable Generator.

ii. Large NEM-Paired Storage System: The maximum aggregate output capacity of the Integrated or Directly Connected Energy Storage Device(s) can be no greater than 150 percent of the Renewable Generator's maximum output capacity. For example, if the maximum output capacity of the Renewable Generator is 15 kW, the maximum aggregate output capacity of the Integrated or Directly Connected Energy Storage Device(s) can be no greater than 30 kW. Pursuant to D.20-06-017, the maximum aggregate output capacity limitation shall not apply for a period of three years beginning August 16, 2020 and ending August 15, 2023. (N) | (N)

b. Metering Requirements.

i. Small NEM-Paired Storage Systems.

A. Solar Photovoltaic (PV): Where the Renewable Generator(s) utilizes solar PV only, an estimation methodology, as described in Section 5.c below, shall apply in lieu of additional metering. As an alternative option, at the start of a new Relevant Period, Qualified Customers may elect to adhere to the metering and billing requirements applicable to Large NEM-Paired Storage Systems. Qualified Customers who elect this option shall not be subject to the estimation methodology so long as the necessary metering requirements are in place. The cost of the metering required under this option shall not exceed $600, unless Complex Metering, as described below, is required. For Small NEM-Paired Storage Systems that are unable to meet the metering requirements of Large NEM-Paired Storage Systems, the estimation methodology shall apply. (L)

[vii] In the event the Integrated or Directly Connected Energy Storage Device is added subsequent to the date that the Renewable Generator received Permission to Operate, the same interconnection cost categories applicable to the Renewable Generator shall apply to the Integrated or Directly Connected Energy Storage Device.

(Continued)

Schedule NEM-V-ST Sheet 20
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

5. NEM-Paired Storage Systems. (continued)
   b. Metering Requirements. (continued)

      B. Non-Solar PV: Where the Renewable Generator(s) utilizes a technology other than only solar PV, Qualified Customers must adhere to the metering and billing requirements applicable to Large NEM-Paired Storage Systems. The cost of the metering required under this provision shall not exceed $600, unless Complex Metering, as described below, is required. (L)

      ii. Large NEM-Paired Storage Systems. Qualified Customers must adhere to the metering and billing requirements contained within Special Condition 7.b of Schedule NEM-ST. For metering and billing purposes only, the Integrated or Directly Connected Energy Storage Device is treated as the Non-NEM Eligible Generator when applying the provisions of Special Condition 7.b of Schedule NEM-ST. The cost of the metering required under this provision shall not exceed $600, unless Complex Metering, as described below, is required. Eligible Generators that are unable to meet the metering requirements of Special Condition 7.b of Schedule NEM-ST are ineligible for service under this Schedule as a NEM-Paired Storage System.

      iii. Complex Metering. A NEM-Paired Storage System that utilizes more than two self-contained meters in addition to the SCE revenue meter(s) or any non-self-contained meters (i.e., those that include CTs/PTs) (not including the SCE revenue meter(s)) is considered as having Complex Metering for the purposes of this Special Condition. (L)

   c. Estimation Methodology for Small NEM-Paired Storage Systems (where storage is < or = 10 kW rated capacity).

      Small NEM-Paired Storage billing uses an “estimation method” that caps maximum allowable NEM bill credits based on solar photovoltaic (PV) generation estimates. The approach used to develop the generation estimates applied to NEM-Paired Storage billing is as follows:

      i. SCE has established a maximum cap for NEM-eligible exports by California Energy Commission (CEC) Climate Zone for each calendar month based on standardized monthly estimates that are scaled for a given NEM customer based on the size of the customer’s solar system.
      ii. To develop the generation estimates, SCE used the California Solar Initiative Expected Performance-Based Buydown (CSI EPBB) calculator to produce a single, scalable, production factor table. This table captures the estimated amount of kWh generated per installed kW of solar PV capacity (kWh/kW production factor) for each calendar month and each of the nine CEC Climate Zones in SCE’s service area. Climate Zones are referred to as Baseline Regions in SCE’s tariffs.
      iii. For a given NEM-Paired Storage customer, the NEM-eligible cap on exports is calculated by multiplying the Qualified Customer-appropriate production factor for a given month and Climate Zone (based on billing period and location) and scaling the kWh by the customer’s PV installed capacity (in kW).

(Continued)

Schedule NEM-V-ST Sheet 21
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

5. NEM-Paired Storage Systems. (continued)

   d. Interconnection and Safety Requirements. NEM-Paired Storage Systems must meet the technical and safety standards required for interconnection under Rule 21 or the CAISO Tariff, as applicable. This includes evaluation under the same technical interconnection standards currently applied to Generating Facilities that are not paired with energy storage devices.

   e. NEM Transition Provisions. NEM-Paired Storage Systems are subject to the transition provisions included in Special Condition 9 below. In regards to Special Condition 9.b, NEM-Paired Storage Systems shall remain eligible for service under this Schedule provided the capacity of the Integrated or Directly Connected Energy Storage Device(s) is not increased by more than 10 percent of its original maximum aggregate output capacity.

6. Participation in Demand Response Programs. Generating Account Holders and Benefiting Account Customers can participate in demand response or emergency reliability programs for which they are otherwise eligible. All demand response programmatic elements (e.g., eligibility and payments) are based on metered usage. (T) (T)

7. Insurance. The Owner or Operator must keep in force the amount of property, common general liability and/or personal liability insurance that was in place at the time the Owner or Operator initiated service under this Schedule.

8. Release of Information. The Owner or Operator agrees that SCE may from time to time release to the CEC and/or the Commission information regarding the Owner/Operator's name, each Eligible Generator's location, their capacity and operating characteristics.

(Continued)

Schedule NEM-V-ST Sheet 22
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

9. NEM-V-ST Legacy Provisions. This Special Condition is applicable to all Qualified Customers receiving service on this Schedule or who have submitted all documentation necessary for receiving service on this Schedule. (T)

   a. 20-Year Transition Period.

      Pursuant to D.16-01-044, Qualified Customers who are receiving service on this Schedule, or who have submitted all documentation necessary for receiving service on this Schedule, are eligible to continue receiving service on this Schedule for a period of 20 years from the original year in which their Eligible Generator was interconnected to SCE's grid, indicated by and measured from the date on which the Owner or Operator originally received permission to operate (PTO) the Eligible Generator from SCE and ending at the conclusion of the Qualified Customer's applicable Relevant Period that ends immediately on or after the 20th anniversary of the original PTO date. For example, if an Owner or Operator initially received PTO on April 1, 2018, Qualified Customers are eligible to continue receiving service on this Schedule through the conclusion of the Relevant Period ending immediately on or after March 31, 2038. Qualified Customers served on Schedule NEM-V who elect to make a one-time switch to this Schedule prior to the conclusion of their Schedule NEM-V 20-year transition period can continue service under this Schedule from the date of the Eligible Generator's original Schedule NEM-V PTO date; these Qualified Customers may not restart their 20-year transition period by transitioning early to this Schedule. Qualified Customers electing to switch to this Schedule prior to the conclusion of their Schedule NEM-V 20-year transition period permanently forfeit any of their remaining transition period eligibility on Schedule NEM-V and may not later change back to receiving service under Schedule NEM-V. To continue receiving service on this Schedule for a period of 20 years, the Qualified Customer shall submit an interconnection application free of all major deficiencies by April 14, 2023. (N)

   b. 9-Year Transition Period.

      Pursuant to D.22-12-056, Qualified Customers submitting an interconnection application for their Eligible Generator to interconnect to SCE's grid on or after April 15, 2023, will remain eligible to receive service on this Schedule for a period of nine years from their original PTO date. (N)

   c. Modifications.

      Qualified Customers with Eligible Generators eligible for the 20-year transition period outlined above that are modified and/or repaired shall remain eligible for the remainder of their 20-year transition period as long as the modifications and/or repairs do not increase the Eligible Generator by more than the greater of (1) 10 percent of the Eligible Generator's nameplate rating capacity, as established when the Eligible Generator was originally interconnected, or (2) 1 kW; and provided the modifications and/or repairs do not result in the Eligible Generator exceeding the generation limitation as provided in Special Conditions 1.h.iii.A and 1.h.iii.B above. Owners or Operators making modifications and/or additions to their Eligible Generators that exceed the 10 percent or 1 kW limit referenced above have the option of either metering the additions and/or modifications separately under another eligible tariff, or having the entire Eligible Generator served under another eligible tariff, subject to the terms and conditions contained therein. (T)

(Continued)

Schedule NEM-V-ST Sheet 23
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

9. NEM-V-ST Legacy Provisions. (continued)

d. Transferability.

Eligible Generators eligible for the 20-year or 9-year transition period shall not lose their eligibility if transferred to a new Owner, Operator, or SCE account, provided the Eligible Generator remains at its original location. The transfer of an existing Eligible Generator to a new location is considered a new installation requiring a new Interconnection Agreement that is subject to the applicable tariffs in place at the time the new Interconnection Request is completed.

e. Integrated or Directly Connected Energy Storage Devices.

Integrated or Directly Connected Energy Storage Devices shall be treated in the same way, and be subject to the same Legacy provisions, as the Eligible Generators to which they are connected. Pursuant to D.23-11-068, Owner or Operators adding only energy storage to the existing Renewable Electrical Generating Facility shall remain eligible for the remainder of the 20-Year or 9-Year Transition Period. (N) | (N)

10. Virtual Net Energy Metering (VNEM)-Paired Storage Systems.

Pursuant to D.17-12-005, where an Owner or Operator utilizes a VNEM-Paired Storage System (as defined in Special Condition 1.q.), the applicable provisions of this Special Condition shall apply. Additionally, where this Special Condition conflicts with any other Special Condition within this Schedule, the provisions contained in this Special Condition shall prevail. Qualified Customers with VNEM-Paired Storage Systems who take service under this Special Condition are exempt from Supplemental Review fees, Detailed Study Costs, and the costs associated with any Distribution or Network upgrades triggered by the Interconnection Request, provided the solar PV is sized 1 MW or smaller.[viii] Qualified Customers with VNEM Paired Storage Systems who take service under this Special Condition are exempt from Standby charges.

a. A VNEM-Paired Storage System shall consist of one of the following; (1) physical non-import relay to prevent storage from charging from the grid, (2) Control functionally equivalent physical non-import relay as outlined in the SCE NEM Handbook to prevent the storage from charging from the grid.

b. Sizing Requirements. The storage device size is determined by the inverter alternating current (AC) nameplate rating. Requirements may differ depending on the size of the storage device.

[viii] In the event the storage device is added subsequent to the date that the solar PV received Permission to Operate, the same interconnection cost categories applicable to the solar PV shall apply to VNEM-Paired Storage System device.

(Continued)

Schedule NEM-V-ST Sheet 24
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (continued)

11. Natural Disaster (Disaster): This Special Condition is applicable to NEM-V-ST Legacy Qualified Customers impacted by an event in affected areas declared in a state of emergency[ix] and included in either the California Governor's Proclamation of a State of Emergency or the President of the United States'. Disaster impacted customers will retain their original permission to operate (PTO) date. The original 20-Year or 9-year Transition Period, as applicable, will remain in effect under this Schedule as defined in Special Condition 9. (T) (T) (T)

Disaster impacted Eligible Customer-Generators must:

a. Submit a new Interconnection Request with a replacement Eligible Generator located on the same parcel as the original for capacity size to generate no more than 12 months of historic, or estimated usage (kWh), and

b. Submit proof of destruction of the Eligible Generator, if requested by SCE.

c. If the Generating Account is impacted by a Disaster, SCE will true-up the Property and issue Net Surplus Compensation, as applicable, pursuant to Special Condition 4.d and 4.g., up to the date of the Disaster. If the Generating Account is not impacted while one or more of the Benefitting Accounts are, a True-Up will only occur for the impacted accounts, and SCE will continue to bill the remaining accounts on Schedule NEM-V-ST, unless otherwise requested by the Owner. Any other Owner-requested changes to the NEM-V-ST Arrangement beyond being impacted by a Disaster will be in accordance with Special Condition 1.m.

Owners impacted by Disasters must comply with all requirements associated with the installation of Smart Inverter technology, as defined in Electric Rule 21.

d. The period from destruction of the Eligible Generator to PTO of the replacement Eligible Generator must not exceed four years, unless reasonable documentation acceptable to SCE is provided showing that a new Interconnection Request has been submitted. The new Interconnection Request must be completed by the same Owner who was taking service under Schedule NEM-V-ST prior to the Disaster. If the Eligible Generator is not replaced by the Owner, but the property is sold to a new Customer after the destruction of the Renewable Electrical Generating Facility, this provision does not extend to the new customer of record or new party in.

e. Customers impacted by a Disaster who meet the requirements included in this Special Condition and whose aggregate replacement system(s) is sized no greater than 1 megawatt (MW) are exempt from the interconnection application fee when submitting a new Interconnection Request.

[ix] Government Code 8558(b) - https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=GOV&sectionNum=8558

(Continued)

Schedule NEM-V-ST Sheet 25
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (Continued)

12. Prevailing Wage (N)

California Public Utilities (PU) Code Section 769.2 requires a contractor that installs a Renewable Electrical Generation Facility or associated battery storage to comply with prevailing wage requirements in order for the facility to participate in a tariff developed pursuant to PU Code Section 2827 or 2827.1. These requirements are stated in PU Code Section 769.2 and in case of any discrepancy between tariff language and the PU Code, the language in the PU Code prevails.

The requirements are:

(1) The contractor shall pay each construction worker employed, at minimum, the general prevailing rate of per diem wages, except that an apprentice registered in a program approved by the Chief of the Division of Apprenticeship Standards shall be paid, at minimum, the applicable apprentice prevailing rate.

(2) The contractor shall maintain and verify payroll records pursuant to Section 1776 of the Labor Code and make those records available for inspection and copying as provided in that Section. The contractor shall not be required to provide copies of certified payroll records to any entity other than the Department of Industrial Relations or the California Public Utilities Commission (Commission).[x]

(3) The contractor shall biannually, on July 1 and December 31 of each year, submit to the Commission digital copies of its certified payroll records for projects.[xi] The contractor's submission of payroll records is a condition to access tariffs developed pursuant to PU Code Section 2827 or 2827.1 for a Customer's Renewable Electrical Generating Facility subject to PU Code Section 769.2. (N)

[x] Pursuant to Decision 23-11-068 the contractor may also be required to provide these records to any entity that the Commission designates to act on its behalf to implement this requirement. (N)

[xi] Contractors may submit their records on a voluntary basis more often than the biannual requirement stated in the PU Code 769.2. (N)

(Continued)

Schedule NEM-V-ST Sheet 26
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (Continued)

12. Prevailing Wage (Continued) (N)

The requirements of PU Code Section 769.2 do not apply to projects with a complete interconnection application submission date before January 1, 2024.[xii] All projects with an interconnection application submission date on or after January 1, 2024, including applications to modify an existing Renewable Electrical Generating Facility, are subject to the PU Code Section 769.2 requirements with the following exceptions:

(1) A residential Renewable Electrical Generating Facility that has a maximum generating capacity of 15 kilowatts or less of electricity.

(2) A residential Renewable Electrical Generating Facility that is installed on a single-family home.

(3) A project that is a public work, as defined in Section 1720 of the Labor Code, and that is subject to Article 2 (commencing with Section 1770) of Chapter 1 of Part 7 of Division 2 of the Labor Code.

(4) A Renewable Electrical Generating Facility that serves only a Modular Home, a Modular Home Community, or multiunit housing that has two or fewer stories.

If PU Code Section 769.2 applies, the Customer must execute the "Prevailing Wage Disclosure Form" and submit the form with their interconnection application, and Customer's contractor shall confirm to SCE that it is up to date with their past required submittals of payroll records.

If Customer's contractor has been found to have willfully violated PU Code Section 769.2 in connection with the construction of Customer's Renewable Electrical Generating Facility, ***that facility*** shall not be eligible to receive service pursuant to a tariff developed based on PU Code Sections 2827 or 2827.1. Only in the case of multi-tariff configuration, where there is more than one renewable generator behind the same utility billing meter, SCE will treat all the generators as one system and therefore none of the renewable generators will be served on tariffs developed based on PU Code Section 2827 or 2827.1, and those renewable generators will be compensated based on PURPA compliant tariff, regardless which facility is subject to the violation of PU Code 769.2. (N)

[xii] If a Customer or contractor provides documentation confirming that the facility that they are applying for was built on or before December 31, 2023, the prevailing wage requirements will not apply to that project.

(Continued)

Schedule NEM-V-ST Sheet 27
VIRTUAL NET METERING FOR MULTI-TENANT AND MULTI-METER PROPERTIES
SUCCESSOR TARIFF

SPECIAL CONDITIONS (Continued)

12. Prevailing Wage (Continued) (N)

If a willful wage violation is alleged, the Customer's Renewable Electrical Generating Facility will remain on the tariff until the Department of Industrial Relations (Department) or a court completes their assessment and makes a final determination. At that time, if the contractor is found in willful violation, then SCE will be required to remove the Customer's Renewable Electrical Generating Facility implicated by the violation from this Schedule and transition the Customer to the PURPA compliant tariff on the next billing cycle (after the required 30/60-day notification). While on the PURPA compliant tariff, the Renewable Electrical Generating Facility will be compensated based on that tariff and the Renewable Electrical Generating Facility shall be subject to SCE Schedule Customer Generation Departing Load Cost Responsibility Surcharge and SCE Schedule Standby charges as the Renewable Electrical Generating Facility is no longer eligible to be served on tariffs developed pursuant to PU Code Section 2827 or 2827.1. The Customer's Renewable Electrical Generating Facility billing meter will be trued up at the end of the billing cycle (after the required 30/60-day notification) before transitioning to the PURPA compliant tariff and any credits remaining after the true-up (including all benefitting/ aggregated accounts) will be forfeited.

If the violation occurs on a single generating account and there are no benefitting/aggregated account(s), SCE will notify the Customer at least 30-days in advance of automatically transitioning the Customer's Renewable Electrical Generating Facility on their next billing cycle to a PURPA compliant tariff.

If the violation occurs on a single generating with benefitting/aggregated accounts SCE will notify the Customer(s) at least 60-days in advance of automatically transitioning the Customer's Renewable Electrical Generating Facility on their next billing cycle to a PURPA compliant tariff.

If a willful wage violation is reversed or nullified by the determining body and the generation account holder or Customer/property owner provides documentation to the utility evidencing such reversal/nullification, then the Renewable Electrical Generating Facility (or the whole system for multi-tariff) will be able to regain access to the applicable NEM/NBT tariff as of the next billing cycle or within 30-days after receiving the notification of the reversal of the willful wage violation.

Beginning January 1, 2025, contractors who have been found in willful violation of the prevailing wage rule in PU Code Section 769.2 will not be permitted to apply to interconnect facilities utilizing tariffs established pursuant to PU Code Sections 2827 or 2827.1. (N)

SPECIAL CONDITIONS (Continued)

12. The reversal of the willful wage violation:

If a willful wage violation is reversed or nullified by the determining body and the generation account holder or Customer/property owner provides documentation to the utility evidencing such reversal/nullification, then the Renewable Electrical Generation Facility and associated benefitting accounts will be able to regain access to this Schedule in a subsequent billing cycle after the notification of the reversal of the willful wage violation.

The original transition period based on the original PTO will remain in effect under this Schedule as defined in Special Condition 16.

Beginning January 1, 2025, contractors who have been found in willful violation of the prevailing wage rule in PU Code Section 769.2 will not be permitted to apply to interconnect facilities utilizing tariffs established pursuant to PU Code Sections 2827 or 2827.1.

13. NEM-V-ST Sunset Date. The NEM-V-ST sunset period begins on November 16, 2023, and ends on February 14, 2024. Pursuant to D.23-11-068, Customers who prior to February 15, 2024, submit all necessary documentation (i.e., a completed interconnection application free of major deficiencies) may receive service on this Schedule. (N)

Consistent with the intent of D.23-11-068, all Qualifying Customers will have three years from February 14, 2024, to interconnect and submit final building permit sign off and electrical clearing by the authority having jurisdiction to remain eligible for this Schedule and the provisions contained within. SCE is granted the discretion to provide Schedule NEM-V-ST eligibility to a Qualifying Customer if a delay in meeting the NEM-V-ST Sunset Date (February 14, 2024) is caused by SCE. Similarly, SCE has the discretion to apply NEM-V-ST eligibility to Qualifying Customers who fail to submit the final building permit sign off and other necessary documentation within three years from February 14, 2024, if such failure is due to delays caused by SCE.

Schedule NBT-V, Virtual Net Billing Tariff Customers submitting interconnection applications on or after February 15, 2024, referred to as NBT-V Transition Customers (as defined in Schedule NBT-V), will be billed on this Schedule temporarily and then subsequently transitioned to Schedule NBT-V once it is operational. Customers will be transitioned to Schedule NBT-V at the end of their Relevant Period following SCE's implementation of Schedule NBT-V, with a nine-year Eligibility Period commencing the date of the Customer's original PTO. SPECIAL CONDITIONS (Continued)

14. Virtual Dual Tariff (VDT) (N)

This Special Condition is applicable to a Benefiting Customer that installs an additional generator behind the SCE Customer meter while receiving allocated credits from the Virtual Generator(s) on the same Premises. Pursuant to Resolution E-5374, VDT arrangements are intended to primarily provide resiliency.

Where a Benefiting Customer utilizes a Virtual Dual Tariff this Special Condition 10 shall apply. Additionally, where this Special Condition conflicts with any other Special Condition within this Schedule, the provisions contained in this Special Condition shall prevail.

There is no limit on the number of such VDT customers per NBTV arrangement or network. The VDT is not offered for the generating account of the virtual arrangement; it is only available to the Benefiting Customers.

Billing Service Charges: An eligible VDT customer shall remit one time service charges of $25.00 per Dual-Tariff Account. These set-up fees may not be charged for tenancy changeovers and shall be limited to no more than $500 per Property.

Net Surplus Compensation: Shall follow the procedures outlined in Rates Section 4 of Schedule NBT.

Non-Bypassable Charges: will be calculated on the Benefiting Customer's metered usage.
A Benefiting Customer is allowed to depart from the Virtual Net Billing Tariff, ending their VDT status. (N)

SPECIAL CONDITIONS (Continued)

14. Virtual Dual Tariff (VDT) (Continued) (N)

a. VDT-VNM: NBT Renewable Electrical Generating Facilities

A Customer taking service under this Special Condition is a Virtual Dual Tariff Virtual Net Metering (VDT-VNM) Customer. The Benefiting Customer that installs a behind-the-meter Net Billing Tariff eligible generator must meet all requirements of Schedule NBT Net Billing Tariff. The provisions of Schedule NBT will apply unless otherwise specified in this Schedule.

The eligible VDT-VNM Customer Renewable Electrical Generating Facility must meet all applicable safety, and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the California Public Utilities Commission regarding safety and reliability.

i. System Sizing: The eligible VDT-VNM Customer must adhere to the sizing requirements as described in Special Condition section 1.h.iii.a and 1.h.iii.b of this Schedule. Additionally, a VDT-VNM customer may not have the capacity of their allocated credits from the Virtual Generating Facility(ies) together with the behind the meter NBT Renewable Electrical Generating Facility generate more than their individual prior annual usage.

ii. Metering: The eligible VDT-VNM Customer must install at their cost or at the cost of the Owner or Operator any necessary metering equipment to accurately bill the Benefiting Customer for the allocated credits from the Virtual Generating Facility(ies) and the behind the meter NBT Renewable Electrical Generating Facility.

iii. Legacy Period: The Legacy period may not be altered or combined as a result of participation as a VDT-VNM Customer.

iv. Annual True-Up Process: Upon the Customer receiving Permission to Operate (PTO) for the behind the meter NBT Renewable Electrical Generating Facility the provisions of Special Conditions section 1.m.i of this Schedule will apply to the Benefiting Customers Relevant Period for the purposes of a one-time adjustment to align the Annual True-Up of both the NEM-V-ST and the behind the meter NBT Renewable Electrical Generating Facility.

v. This Special Condition is not available to Customers that are served by Schedule NEM or Schedule NEM-ST. (N)

SPECIAL CONDITIONS (Continued)

14. Virtual Dual Tariff (VDT) (Continued) (N)

a. VDT-VNM: NBT Renewable Electrical Generating Facilities

vi. VDT-VNM Monthly Rate Calculation Methodology

a. First, the Monthly Energy Charges will be calculated and applied as described in Rates Section 3 of this Schedule.

b. Second, the Benefiting Customer's Energy Export (channel 2) in kWh from the Benefiting Customer's Renewable Electrical Generating Facility export channel will be calculated and applied as described in Rates section 3 of Schedule NBT.

If applicable, the Energy Export (channel 2) in kWh will be used to calculate the Benefiting Customer Renewable Electrical Generating Facility ACC Plus Adder as described in Rates section 3 of Schedule NBT.

vii. VDT-VNM Annual True-up Process

Pursuant to Resolution E-5374, the VDT-VNM Annual True-up Process shall follow the process described in Schedule NBT, Special Condition 4.e. except that the calculation will use the VDT-VNM Net Surplus Energy definition as described in Special Condition 1.t. of this Schedule.[xiii]

b. VDT-NE: Rule 21 Non-Export Generating Facility

A Benefiting Customer taking service under this Special Condition is a Virtual Dual-Tariff Non-Export (VDT-NE) Customer. The Benefiting Customer that installs a behind the meter Rule 21 non-export generator must meet all requirements of SCE's Rule 21.

VDT-NE Customers are not allowed to install a Net Energy Metering (NEM) or Net Billing Tariff (NBT) eligible generator behind the SCE customer meter nor is the VDT customer eligible to participate in Schedule(s) NEM, NEM-ST or NBT.

The eligible VDT-NE customer Rule 21 non-export generating facility must meet all applicable safety, and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the California Public Utilities Commission regarding safety and reliability. REQUIRED DISCLOSURE (L)

All customers must: Accept that SCE may release to the California Energy Commission, the California Public Utilities Commission, and/or other state agencies, information regarding the Customer's facility, including such Customer's name and Renewable Electrical Generating Facility location, capacity, and operational characteristics. Pursuant to CPUC Decisions 14-11-001, 21-06-026, and 23-11-068, SCE is required to provide certain data, including, but not limited to, confidential Customer information, to the CPUC, its contractors, the California Department of Consumer Affairs Contractors State License Board, the California Department of Financial Protection & Innovation, and the California Department of Industrial Relations. As a condition of receiving service under this tariff, the eligible customer authorizes SCE to release any and all information provided in the Interconnection Request to the entities identified above without further notification or consent. For Renewable Electrical Generating Facilities that are subject to Pub. Util. Code § 769.2, in addition to consenting to SCE sharing the data or information with those regulatory entities, Customer also consents to those entities making that information publicly available. (L)
