ELECTRIC SCHEDULE DAC-GT Sheet 1
DISADVANTAGED COMMUNITY GREEN TARIFF PROGRAM

APPLICABILITY: The Disadvantaged Community Green Tariff (DAC-GT) is a voluntary rate supplement to the customer's otherwise applicable rate schedule (OAS) offered to customers served in Disadvantaged Communities and/or Tribal Land. The DAC-GT option allows an eligible customer to purchase renewable electricity for 100% of their electric usage and receive a 20% discount on their OAS. (T)

Residential Customer Eligibility

Schedule DAC-GT is available to PG&E Bundled Service residential customers that are eligible for either the Family Electric Rate Assistance (FERA) or the California Alternate Rate Assistance (CARE) programs and take electric service in a Disadvantaged Community or Tribal Community, as defined below. (T)

Eligible customers are automatically enrolled as directed by the Commission,[1] until PG&E's total allocated capacity is reached.[2] If the set of customers selected for automatic enrollment exceed the program's megawatt (MW) capacity, those customers will be randomly enrolled in DAC-GT. Once the program's MW capacity is reached, new customers will only be allowed to take service under this schedule if space allows. Per Decision 24-05-065, effective May 31, 2024, PG&E's DAC-GT program capacity is expanded by 40.36 MWs leading to a new program capacity of 92.68 MWs.[3] 11.2 MWs of this capacity went to Ava Community Energy, leaving PG&E with the current program cap of 81.48 MWs.[4] PG&E shall implement automatic enrollment as previously adopted in Decision 20-07-008 and refined in Resolution E-5124 to subscribe customers to the newly awarded and available capacity using the same automatic enrollment process outlined above, as space allows.[5] (T) (N) (N) (T)

Direct Access and Community Choice Aggregation service (DA/CCA Service) customers cannot participate in PG&E's DAC-GT program. However, Community Choice Aggregators (CCAs) may choose to offer their own DAC-GT program pursuant to Decision (D.)18-06-027.

[1] Decision 20-07-008
[2] In Resolution E-4999, the CPUC allocated 54.82 MW to PG&E for the DAC-GT program, and additional allocations to the operating CCAs which together total 70 MW. If a CCA in PG&E service territory did not file a Tier 3 AL by January 1, 2021 detailing its plan to implement DAC-GT and CSGT programs and stating the capacity it will procure for each program (including any capacity allocated to it by other CCAs or shared with other CCAs), the program capacity allocated to a CCA may revert back to PG&E or to another participating CCA, if the Commission deems appropriate. PG&E's program capacity was reduced to 52.32 MW when 2.5 MW was reallocated to a CCA in 2022.
[3] The additional 40.36 MW of DAC-GT program capacity is comprised of: (i) 14.2 MW of capacity under the former Community Solar Green Tariff program, which has been consolidated into DAC-GT, and (ii) an additional 26.16 MW of new DAC-GT program capacity.

ELECTRIC SCHEDULE DAC-GT Sheet 2
DISADVANTAGED COMMUNITY GREEN TARIFF PROGRAM

APPLICABILITY (Cont'd.): Each customer will continue to take service under the provisions of their OAS. A customer is not eligible to participate in the DAC-GT program if the customer is taking service on: 1) Transitional Bundled Service under electric Rules 22.1 and 23, 2) Schedule S, where the customer's demand is regularly served by a non-PG&E supply, 3) in conjunction with a net energy metering rate schedule including RES-BCT, 4) non-metered service, or 5) multi-family or master-meter rate schedules. Additionally, customers enrolled on other Green Access Programs such as Solar Choice (E-GT) are not eligible for simultaneous enrollment in DAC-GT. Finally, rate schedules that are not available with CARE- or FERA-option, such as rate Schedules EVA and EVB, are not eligible for enrollment. (L)

PG&E will reassess DAC-GT participants' eligibility after any of these customers move to a new residence. Customers who are found to still be eligible for the DAC-GT program may retain their status as program participants as long as capacity is available and the customer's turn-on date at their new location is within 90 days of their final billing date at their original location. Customer deemed no longer eligible will be unenrolled from the program. Existing participants in the DAC-GT program whose census tract becomes ineligible in a subsequent version of CalEnviroScreen may retain their eligibility.[6] (T)

TERRITORY: This schedule is available to bundled service customers in designated Disadvantaged Communities and/or Tribal Land[7] in PG&E's electric service territory. Disadvantaged Communities for the purpose of this program are defined as the top 25% most impacted census tracts statewide per the CalEnviroScreen 3.0 and 4.0 reports and any later version of the reports, plus the census tracts in the highest 5 percent of CalEnviroScreen's Pollution Burden in either the 3.0 or 4.0 versions of the reports that do not have an overall CalEnviroScreen score because of unreliable socioeconomic or health data. Additionally, customers on Tribal Lands are eligible. (T)

RATES: Customers taking service on this rate schedule will receive a twenty (20) percent discount on their total bundled volumetric charges on their otherwise applicable rate schedule. Discounts will not be applied to Residential Base Services Charges.

For customers enrolled in the California Alternate Rate Assistance (CARE) or Family Electric Rate Assistance (FERA) programs, the twenty (20) percent discount will be applied to the CARE or FERA rate.

ENROLLMENT PROVISIONS: Customer enrollment is capped at a maximum of 2MW solar equivalent per Service Agreement (SA ID). This limitation does not apply to a federal, state, or local government, school or school district, county office of education, the California Community Colleges, the California State University, or the University of California.[8] (T)

[6] Resolution E-4999 Ordering Paragraph 1(q) (T)
[7] Per Resolution E-5212, OP 3, Tribal Land is defined as all California Indian Country as defined in 18 United States Code Section 1151, with the exception of privately held in-holdings, which are defined as non-Indian owned fee land located within the exterior boundaries of California Indian Country; in the event of multiple owners, such land shall be considered Indian-owned if at least one owner is a tribe or tribal member, regardless of the use of the land. ELECTRIC SCHEDULE DAC-GT Sheet 3
DISADVANTAGED COMMUNITY GREEN TARIFF PROGRAM

ENROLLMENT TERM:

The customer will be placed on the DAC-GT program option on the first day of the next Billing Cycle where the Billing Cycle start date occurs at least five (5) business days after the date of the auto-enrollment request. An auto-enrollment request that is received within five (5) business days of the customer's next Billing Cycle may result in the customer being placed on the DAC-GT Program in the following Billing Cycle. (T) | (T)

Once enrolled, service on the DAC-GT program shall continue month to month thereafter. There is no minimum term of service under this schedule. There is also no termination fee associated with terminating participation in this program. A customer may opt out of the program at any time by emailing greensaver@pge.com. Cancellation of the customer's participation in the DAC-GT Program will become effective as of the customer's last closed bill period. The customer is then ineligible to participate in the DAC-GT Program for a period of twelve (12) months from the date of the change. (N) | (N)

PROGRAM ENDING:

A participating customer can remain on the DAC-GT tariff for up to 20 years from the time of enrollment, or until the point when the program's dedicated renewable resources are no longer available at sufficient levels to serve the program enrollment, whichever is less.

DAC-GT will begin the program sunset period when the remaining MW capacity (left to procure) for the tariff reaches 500 kilowatts, or there has been no participation by developers in two consecutive solicitations.[9] (D)

PROGRAM FUNDING:

Consistent with Public Utilities Code Section 748.5(c), the DAC-GT program will be funded using public purpose program surcharge collections. (N) (N)

OTHER PROGRAMS:

PG&E also offers other Green Access Programs e.g., Schedule E-GT, which provide renewable services for customers throughout PG&E's service territory, without a geographic restriction of disadvantaged communities and/or Tribal Lands. Customers that take service under other Green Access Program schedules cannot simultaneously participate in the DAC-GT program. (T)

BILLLING:

Monthly bills are calculated in accordance with the customer's OAS and the provisions contained herein. The amount credited under Schedule DAC-GT will appear as a discount on the customer's OAS bill as described above.

METERING EQUIPMENT:

All customers must be separately metered by PG&E under their OAS.
