Schedule DAC-Green Tariff Sheet 1
Disadvantaged Communities-Green Tariff

APPLICABILITY

This Schedule is applicable to residential Bundled Service Customers (Customers) who are eligible for the California Alternate Rates for Energy (CARE) or Family Electric Rate Assistance (FERA) program and reside within a Disadvantaged Community (DAC); defined as the top 25 percent of census tracts based on the latest version of CalEnviroScreen or the census tracts in the top 5 percent of CalEnviroScreen's pollution burden but that do not have an overall CalEnviroScreen score, or participants who qualified under CalEnviroScreen 3.0, for the purposes of receiving a bill credit from having SCE procure 100 percent renewable resources from DAC-Green Facilities to meet Customer Subscriptions hereunder (DAC-Green Tariff (or DAC-GT) Program). Additionally, all California Indian Country, as defined in 18 United States Code Section 1151, with the exception of privately held in-holdings, which are defined as non-Indian owned fee land located within the exterior boundaries of California Indian Country; in the event of multiple owners, such land shall be considered Indian-owned if at least one owner is a tribe or tribal member, regardless of the use of the land, are added to customers who are eligible.

In the event the census tract in which a Customer resides is not scored as a top 25 percent DAC in a subsequent version of the CalEnviroScreen tool or as one of the census tracts in the top 5 percent of pollution burden, the enrolled Customer will continue to retain eligibility for the DAC-GT, as long as they continue to meet all other eligibility criteria. If a Customer who is eligible for CARE or FERA enrolls in CARE or FERA in the process of signing up for DAC-GT, the 20 percent DAC Credit will be applied to the customer's new CARE or FERA rate.

This Schedule is available to eligible Customers, who will be automatically enrolled as directed by the Commission, and if after auto-enrollment there is capacity available, the program will be available on a first-come, first-served basis until Customer Subscriptions reach 69.07 megawatts (MW) (DAC-GT Program Cap), at which point a waitlist will be started. If the Customers eligible for automatic enrollment would cause the DAC-GT Program Cap to be exceeded, those eligible Customers with a higher Total Balance Owing on their SCE bill will be prioritized.[iii] Enrollment into the DAC-GT Program will occur as specified in Special Condition 4 below.

[i] CalEnviroScreen current version: OEHHA - Office of Environmental Health Hazard Assessment

[ii] Decision 24-05-065 Ordering Paragraph 3(b) requires SCE to implement automatic enrollment of eligible Customers as previously adopted in Decision 20-07-008 and reiterated in Resolution E-5124.

[iii] "Total Balance Owing" is the total SCE bill amount greater than zero owed at the time that a customer account's information is retrieved.

TERRITORY (L)

Within the territory considered within DACs based on the latest version of CalEnviroScreen or within the census tracts in the top 5 percent of CalEnviorScreen's pollution burden that do not have an overall CalEnviroScreen score, or paticipants who qualified under CalEnviroScreen 3.0. Additionally, all California Indian Country, as defined in 18 United States Code Section 1151, with the exception of privately held in-holdings, which are defined as non-Indian owned fee land located within the exterior boundaries of California Indian Country; in the event of multiple owners, such land shall be considered Indian-owned if at least one owner is a tribe or tribal member, regardless of the use of the land, are added to customers who are eligible. (L)

RATES

All charges, credits and provisions of a Customer's Otherwise Applicable Tariff (OAT) apply. In addition, the total amount billed to the Customer by SCE shall be adjusted by applying the following credit:

DAC Credit: A 20 percent credit will be provided to a Customer's OAT total bill prior to the application of state and local taxes.

SPECIAL CONDITIONS

1. Definitions. The following definitions are applicable to Customers served under this Schedule:

   a. Disadvantaged Community (DAC): A community that is identified by the latest version of CalEnviroScreen as among the top 25 percent of census tracts statewide, or participants who qualified under CalEnviroScreen 3.0. In addition, the census tracts in the highest 5 percent of the CalEnviroScreen's Pollution Burden, but that do not have an overall CalEnviroScreen score because of unreliable socioeconomic or health data are also defined as a DAC for purposes of this Schedule. Additionally, all California Indian Country, as defined in 18 United States Code Section 1151, with the exception of privately held in-holdings, which are defined as non-Indian owned fee land located within the exterior boundaries of California Indian Country; in the event of multiple owners, such land shall be considered Indian-owned if at least one owner is a tribe or tribal member, regardless of the use of the land, are added to customer who are eligible.

   b. DAC-Green Facility: New Renewable Portfolio Standard (RPS) eligible generating facility with a nameplate rated generating capacity between 500 kW to 20 MW that is located in (T)
   SCE's service territory, no more than five miles from an eligible DAC census tract in (T)
   SCE's service territory and that supplies energy to SCE via a Power Purchase Agreement for the purposes of meeting Customer Subscriptions under this Schedule. A DAC-Green Facility is eligible to serve Customers under the DAC-Green Tariff program even if its (T)
   location no longer qualifies as a DAC in a subsequent version of CalEnviroScreen.

   c. Subscription: The registered load (kWh) served by SCE during each billing period for a Customer electing to participate on this Schedule.

Disadvantaged Communities-Green Tariff

SPECIAL CONDITIONS (Continued)

2. Customer Subscription. The maximum Customer Subscription served under this Schedule cannot exceed 2 MW of nameplate rated generating capacity from a DAC-Green Facility.

3. Participation in Other SCE Programs.

   a. Demand Response (DR) Programs: Customers served under this Schedule can concurrently participate on any DR Programs for which they are otherwise eligible. All DR payments and credits are based on a Customer's metered usage and are not impacted by the kWh allocated based on the Customer's Subscription.

   b. Net Energy Metering (NEM) or Net Billing Tariff (NBT): Customers served under this Schedule cannot concurrently participate on any NEM or NBT tariff. (T) (T)

   c. Green Rate Programs: Customers served under this Schedule cannot concurrently participate on Schedules GTSR-GR or GTSR-CR. (T)

   d. DA / CCA / CA: Customers participating in Direct Access (DA), Community Choice Aggregation (CCA), or Community Aggregation (CA) are not eligible to receive service under this Schedule.

   e. Master Meter Customers: Customers served under a master meter rate schedule (i.e., Schedules DM, DMS-1, DMS-2 or DMS-3) are not eligible to receive service under this Schedule as SCE does not have consumption data for the end-use customer (i.e., submetered tenant).

SPECIAL CONDITIONS (Continued)

4. Customer Enrollment and Term. After a DAC-Green Facility has achieved commercial operation, service under this Schedule shall become effective within two billing periods after SCE receives a request from a Customer to take service hereunder. There is no minimum length of time that a Customer must take service under this Schedule. There is also no termination fee associated with de-enrolling from the DAC-Green Tariff Program. In the event a Customer elects to no longer receive service under this Schedule, the change will become effective at the start of the next billing period after the date that SCE receives the Customer's request to de-enroll from the DAC-Green Tariff Program. Customers are eligible to remain on the DAC-Green Tariff Program for a period of up to 20 years from the date they first began service under this Schedule or until a dedicated renewable resource is no longer available, whichever is sooner. (T) (T)

   In the event that a Customer moves and turns off service at his/her current address and moves to a new location, the Customer will need to recertify eligibility at the new location for service under this Schedule. In addition, the Customer will retain his/her status as a program participant as long as capacity is available and the customer's turn-on date at the new location is within 90 days of the final billing date at his/her original location.

5. Metering. All Customers must be metered according to the requirements of their OAT.

6. Program Sunset. When the remaining unprocured capacity for SCE's DAC-GT Program reaches 500 kW or less or there has been no participation by developers in two consecutive solicitations, SCE will submit a Tier 1 Advice Letter informing the Commission that solicitations have been suspended and the program will sunset, which means it will be closed to further developer participation.
