Schedule PEVSP Phase 2 Sheet 1
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

APPLICABILITY

This Schedule is applicable to Bundled Service Customers on Residential and General Service rate schedules, and Community Choice Aggregation (CCA) customers, as defined in Southern California Edison's (SCE) Rule 23, who charge a plug-in electric vehicle (PEV) where the PEV load is measured by a customer or third-party owned PEV submeter (submeter load and subtracted from the customer's primary meter and billed on an applicable Time-Of-Use (TOU) Electric Vehicle (EV) rate schedule.

This schedule implements the Phase 2 PEV Submetering Pilot (Phase 2 Pilot) to evaluate:

1. Customer demand and benefits of a PEV submetering arrangement,
2. Billing integration and communication standards associated with submetered data. Phase 2 Pilot adds the option for SCE customers to participate as Multiple Customers-of-Record (MCOR).

Customers must have an Edison SmartConnect® meter or interval data recorder (IDR)-type meter as their primary meter to participate in this Pilot.

The PEV submeter must be used for the sole purpose of measuring electricity used to charge PEVs.

TERRITORY

Within the entire territory served.

RATES

All charges and provisions of the customer's Otherwise Applicable Tariff (OAT) shall apply to the primary meter, except that the PEV usage, as measured by the submeter, will be billed on an applicable PEV rate schedule.

1. PEV Submetered Usage Billing:
   a. Where the primary meter qualifies for Residential Service:
      (1) For residential customers participating as a Single Customer-of-Record (SCOR), all PEV submetered usage will be billed on Schedule TOU-EV-1: Domestic Time-of-Use, Electric Vehicle Charging.
      (2) For residential customers participating as Multiple Customers-of-Record (MCOR):
         (a) If PEV submetered usage is billed directly to the residential customer account, then the PEV submetered usage will be billed on Schedule TOU-EV-1.
         (b) If PEV submetered usage is billed to an associated non-residential customer account, then the PEV submetered usage will be billed on an applicable Electric Vehicle rate schedule.

(Continued)

RATES (Continued)

a. Where the primary meter qualifies for General Service
   (1) PEV submetered usage with a maximum demand of 20 kW and below will be billed on Schedule TOU-EV-3: General Service Time-of-Use, Electric Vehicle Charging
   (2) PEV submetered usage with a maximum demand above 20 kW and up to 500 kW will be billed on Schedule TOU-EV-4: General Service Time-of-Use, Electric Vehicle Charging, Demand Metered

b. Net Energy Metering rate schedules may be a rider, as applicable, to this Schedule, subject to the cap described in Special Condition 2.

c. Any exceptions to the above rates are defined in Special Condition 16.

2. PHASE 2 PILOT ENROLLMENT INCENTIVE PAYMENT

A one-time enrollment payment of $210 will be provided to the Submeter Meter Data Management Agent (MDMA) for each participant enrolled in the Phase 2 Pilot. This payment will be made by SCE to the Submeter MDMA within 60 days after the participant's completed enrollment. Additionally, $17.50 per month per submeter will be provided to the Submeter MDMA for performance of its data management and exchange responsibilities in compliance with Phase 2 Pilot requirements for each month the customer remains on the Phase 2 Pilot. These payments will be made by SCE to the Submeter MDMA within 60 days of the first two successful billing cycles for a given customer, and thereafter within, 30 days after receipt of the Submeter MDMA's final billing cycle invoice. SCE may petition the CPUC's Energy Division to terminate this ongoing incentive, with no cost, liability, or further obligation, if a Submeter MDMA fails to meet its performance requirements. These incentive payments are applicable only for Phase 2 of the Pilot, which ends after 12 billing cycles for a customer participant, and no later than April 30, 2018.

SPECIAL CONDITIONS

1. Pilot Term: Phase 2 duration is 15.5 months beginning January 16, 2017 and ending April 30, 2018.

2. Pilot Participation Cap: Submeters are enrolled on a first-come, first-served basis. A maximum of 500 submeters may be enrolled in the Phase 2 Pilot as discussed in Special Condition 6. Of the 500 submeters, a limit of 100 submeters may be related to NEM accounts.

(Continued)

Schedule PEVSP Phase 2 Sheet 3
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

3. Pilot Participation Period: Customers may participate for up to 12 consecutive billing cycles. Customers may unenroll from the Pilot at any time, but may not re-enroll in Phase 2 of the Pilot unless they are relocating in one of the utility's service territories as discussed in Special Condition 12.

4. Customer Enrollment: Submeter MDMA is responsible for submitting a completed Form 14-977, Single Customer of Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 14-978, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, to enroll eligible customers in the Phase 2 Pilot. Such enrollments must be received by SCE at least 5 business days prior to the start date of the customer's next billing cycle to become effective on that date, unless the volume of customer agreements in process at that time exceeds an average of five (5) agreements per business day over any five (5) business day period. In that case, customers will become effective on the state date of the customer's subsequent billing cycle.

5. Enrollment Period: Customers may enroll customers in the Phase 2 Pilot from January 16, 2017, to April 30, 2017, or until the maximum of 500 submeters is reached, whichever is earlier (Enrollment Period). For the first 1.5 months of the Enrollment Period (Exclusivity Period), each Submeter MDMA will have "Exclusivity Rights" to enroll a pre-determined number of submeters into the Pilot. This number will be determined by dividing the Phase 2 Pilot's enrollment cap of 500 by the number of Submeter MDMAs participating in the Pilot. Exclusivity Rights expire February 28, 2017, which is followed by the first-come, first-served Open Enrollment Period for the two months ending April 30, 2017, or when 500 submeters have enrolled, whichever is earlier.

Schedule PEVSP Phase 2 Sheet 4
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

SPECIAL CONDITIONS (Continued)

6. MDMA Services for the PEV Submeter: Program participants or their Submeter MDMAs must provide, own, and maintain the submeters used in the Phase 2 Pilot. The standards for qualified submeters are contained in the Submeter MDMA Registration Agreement, Attachment 1: EV Submeter Phase 2 Performance Standards for Metering and Meter Data Management Agents. Additionally, submeter accuracy requirements are set at ±1% for the Phase 2 Pilot. Submeter accuracy is the sole responsibility of the Submeter MDMA. For purposes of the Phase 2 Pilot, SCE will bill participating customers as if the submeters satisfy SCE's accuracy requirements.

   Submeter MDMAs must perform meter data management services (Submeter MDMA services) to provide properly formatted, accurate, and timely (i.e. within three days of the close of the customer's billing cycle) data submission to SCE. These requirements are listed in the EV Submeter Phase 2 Performance Standards for Metering and Meter Data Management Agents.

   The Submeter MDMA must submit a completed Form 14-976, *Plug-in Electric Vehicle Submetering Pilot Phase 2 Submeter MDMA Registration Agreement*, to the Energy Division, to receive preliminary approval to participate in the Phase 2 Pilot. This agreement requires the Submeter MDMA to state (1) the number of submeters that have agreed to participate as of the date it submits the Agreement, and (2) the total number of submeters that it plans to enroll, with the expected breakdown of customer class (Residential and General Service) and NEM participation. Final approval to act as a Phase 2 Submeter MDMA will be granted by SCE to Submeter MDMAs that satisfy all the requirements established in the Submeter MDMA Registration Agreement and attachments prior to the start of the Phase 2 Pilot onJanuary 16, 2017.

7. Primary Meter and Submeter Bill Calculation: The customer's primary metered usage and demand, as applicable, are billed according to the customer's current tariff, and the customer's submetered PEV usage and demand, as applicable, are billed according to the applicable Residential or EV rate schedule. The primary meter billed amount will subtract the PEV submetered usage and demand, assuming the Submeter MDMA timely submits accurate submetered usage information, as described in Special Condition 8.

(Continued)

Schedule PEVSP Phase 2 Sheet 5
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

SPECIAL CONDITIONS (Continued)

8. Submeter Bill Accuracy: The accuracy of the PEV submetered billed amount will be based upon SCE receiving timely and accurate data delivered from the Submeter MDMA pursuant to the MDMA Performance Standards and applicable Data Reporting and Transfer Requirements. Late, incomplete, or inaccurate EV submetered usage information will be disregarded [treated as if there was no EV usage for the time interval(s) involved] only where the Submeter MDMA action is the cause of the data transmission failure. As a result, any actual EV charging during these intervals will be billed at the primary meter customer's OAT and will not be adjusted in any future bills if any EV usage data is subsequently received.

9. Dispute Resolution: Submeter MDMA will be the single point-of-contact for all submeter data issues regardless of any agreement the Submeter MDMA may have with other organizations providing submeter services on the customer's behalf. SCE will be the single point-of-contact for all SCE billing issues.

10. Bill Payment: The primary meter customer is jointly responsible for all submeter customer outstanding balances related to the submeter service regardless of any agreement between the primary meter customer and the Submeter MDMA. In the event that a submeter customer fails to pay for the submetering service, the submeter service will be terminated, and all uncollected usage and usage after termination will be the responsibility of the primary meter customer. In the event that a primary meter customer fails to pay for service, the primary meter service will be terminated resulting in a disconnection of service to the submeter.

11. Billing Adjustments: Billing adjustments will not be made pursuant to Rule 17 on either the primary meter or submeter account due to revisions or adjustments provided by the Submeter MDMA.

(Continued)

Schedule PEVSP Phase 2 Sheet 6
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

SPECIAL CONDITIONS (Continued)

12. Disenrollment, Changes of Address: The customer must contact SCE to request an early voluntary termination from the Phase 2 Pilot. As of the effective date of the voluntary termination, SCE will default to using the current tariff of the primary meter for all load at that premises.

    For customers that are involuntarily disenrolled due to termination of submeter service, SCE will notify the customers of the involuntary termination and allow the customers to complete the remainder of their Phase 2 Pilot Participation Period subject to completing the requirements to re-enroll with an alternative Submeter MDMA. SCE will effectuate any required rate and billing changes coincident with the start of the next billing cycle, subject to the exceptions described in Special Condition 4. Customers who disenroll from the Phase 2 Pilot will continue to be counted against the enrollment cap.

    For a customer that relocates within SCE's service territory: 1) the relocating customer must notify SCE of the relocation; 2) the relocating customer's Submeter MDMA must submit a separate Form 14-977, Single Customer of Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 14-978, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, for the customer's new service address at least five days before the end of the current billing period; and 3) the customer is eligible to reenroll in the Phase 2 Pilot after the Enrollment Period for the remainder of customer's Phase 2 Pilot Participation Period. SCE will effectuate any required rate and billing changes coincident with the start of the next billing cycle, subject to the exceptions described in Special Condition 4. Similarly, customers that relocate to another utility's service territory may reenroll if the new utility's 500 submeter limit has not been met.

13. Program Availability: 1) Programs such as My Account, Green Button, and Budget Assistant may be available to customers participating in the Phase 2 Pilot, but the accuracy of the data may be affected. 2) Smart Energy Program (SEP), and Level Pay Plan (LPP) are not (T)
    available to customers participating in the Phase 2 Pilot. If the participating customer is already enrolled in SEP or LPP, the customer must unenroll for the duration of their (T)
    participation in the Phase 2 Pilot. Customers participating in the Phase 2 Pilot are not eligible to participate in the California Independent System Operator (CAISO)-sponsored demand response programs facilitated through Rule 24.

(Continued)

Schedule PEVSP Phase 2 Sheet 7
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

SPECIAL CONDITIONS (Continued)

14. Submeter: The submeter may be embedded within the EVSE (as defined below) or may be stand-alone. The submeter must be located at a fixed point anywhere between the primary meter and the PEV. Customers may not have more than 19 submeters per primary meter or use multiple levels of submeters.

    Any Electric Vehicle Supply Equipment (EVSE), EVSE with embedded submeter, and/or stand-alone submeter installed prior to the Phase 2 Pilot must have been certified by an Occupational Safety & Health Administration (OSHA)-approved Nationally Recognized Testing Laboratory (NRTL). Any EVSE, EVSE with embedded submeter, stand-alone submeter, except a plug-in EVSE or plug-in EVSE with embedded submeter, and related PEV charging circuits, must have been installed by a person or entity with a general electrical contractor's license issued by the California Contractors State License Board and obtained any required inspection and approval by the local Authority Having Jurisdiction (AHJ). The OSHA-approved list of NRTLs is maintained at: https://www.osha.gov/dts/otpca/nrtl/.

    Any EVSE, EVSE with embedded submeter, and/or stand-alone submeter installed as part of the Phase 2 Pilot must be certified to Underwriters Laboratories (UL) standards by an OSHA-approved NRTL. Any EVSE, EVSE with embedded submeter, and/or stand-alone submeter, except a plug-in EVSE or plug-in EVSE with embedded submeter, and related PEV charging circuits, must be installed by a person or entity with a general electrical contractor's license issued by the California Contractors State License Board and must obtain any required inspection and approval by the local AHJ.

.

15. Submeter Meter Data Management Agent (Submeter MDMA): The Submeter MDMA is the entity that retrieves, processes, and submits PEV data using validation, editing and estimating methods, as determined by SCE and MDMAs, and provides this information to SCE for billing purposes. Whether the Submeter MDMA, the customer, or another third party owns the submeter, the Submeter MDMA is responsible for obtaining authorization from the customer to access and submit this information on the customer's behalf. The Submeter MDMA must submit a completed Form 14-977, Single Customer of Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 14-978, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2 to SCE. The Submeter MDMA can be the Customer-of-Record for the submeter service under a Multiple Customers-of-Record scenario. Examples of such scenarios can be found in Attachment 1 of the Customer Enrollment Agreement.

(Continued)

Schedule PEVSP Phase 2 Sheet 8
PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT PHASE 2

SPECIAL CONDITIONS (Continued)

16. EV Rate Exceptions: Sixty (60) days after conclusion of the Phase 2 Pilot, customers will be credited with the service connection charge and the monthly meter charge paid pursuant to the applicable EV rate for PEV submetered usage during the Phase 2 Pilot.

17. Definitions:

A. Electric Vehicle Service Equipment (EVSE): The conductors, including the ungrounded, grounded, and equipment grounding conductors, the electric vehicle connectors, attachment plugs, and all other fittings, devices, power outlets or apparatuses installed specifically for the purpose of delivering energy from the premises wiring to the electric vehicle and may include an embedded submeter.

B. Primary Meter: The interval data recorder meter type owned by SCE which registers all electricity usage associated with the premises.

C. Submeter: Submeter in this Schedule only references the meter owned by the customer or a third party, which measures only the electrical load associated with charging the electric vehicle.

D. Primary Meter Billed Amount: The primary meter charges metered at the customer's premises and billed in accordance with the customer's current tariff, after subtracting submetered PEV usage and demand, as applicable.

E. Submeter Billed Amount: The submeter charges billed to the customer for its PEV usage and demand, as applicable, submetered at its premises, billed as a separate service account and presented as a Summary Bill to the customer.

F. Customer of Record (COR): The person in whose name service is rendered as evidenced by the signature on the application, contract, or agreement for that service, or, in the absence of a signed instrument, by the receipt and payment of bills or Summary Bills regularly issued in his/her name regardless of the identity of the actual user of the service. A customer may also be a party with whom SCE is doing business with or without a billing relationship. The entire bill is the responsibility of SCE's COR.
   (1) Single Customer-of-Record (SCOR): The primary meter customer is the COR for the primary meter and the EV submeter.
   (2) Multiple Customers-of Record (MCOR): The primary meter customer is not the COR for the submeter. The submeter and its load are the responsibility of a third party (e.g. Submeter MDMA or PEV owner) and that third party is a separate COR of SCE. The primary meter load less the EV charges are the responsibility of the primary meter COR, subject to Special Condition 10.
