Schedule Re-MAT Sheet 1
RENEWABLE MARKET ADJUSTING TARIFF

A. APPLICABILITY

The Renewable Market Adjusting Tariff schedule (Re-MAT or this Schedule) implements the renewable resource feed-in tariff program pursuant to California Public Utilities Code (PUC) Section 399.20 and California Public Utilities Commission (CPUC) Decision (D.) 12-05-035, D.13-01-041, D.13-05-034, D.20-10-005, and D.21-12-032. The Schedule is available, on a first-come, first-served basis, to applicants that own or control a Facility (or Project), meet the eligibility criteria below, and submit a complete Program Participation Request (PPR).

The maximum combined contract capacities of participating Facilities under SCE's Re-MAT, SCE's California Renewable Energy Small Tariff (CREST) schedule, and SCE's Water Agency Tariff for Eligible Renewables (WATER) schedule is 226 megawatts (MW) (Program Cap), which represents SCE's allocated share of the total statewide program cap of 750 MW, as provided for in PUC Section 399.20 and CPUC D.12-05-035.

B. EFFECTIVE DATE

The Effective Date of Re-MAT is July 24, 2013, as determined in CPUC D.13-05-034.

C. TERRITORY

SCE's electric service territory.

D. ELIGIBILITY CRITERIA

An applicant for Re-MAT (Applicant) must own or control the Project and the Applicant's proposed Project must meet the following eligibility criteria for Re-MAT (Eligibility Criteria):

1. Territory: The Project must be physically located within SCE's electric service territory and must be interconnected to SCE's electric system.

2. Eligible Renewable Energy Resource: The Project must be an Eligible Renewable Energy Resource as defined in PUC Section 399.12.

3. Qualifying Facility: The Project must be a Qualifying Facility, as defined by the Federal Energy Regulatory Commission (FERC). See 16 U.S.C. § 824a-3(b); 18 C.F.R. § 292.304(a)(2). The Project, as set forth in the PPR, must be materially the same as the Qualifying Facility certified by the FERC.

4. Contract Capacity: The Contract Capacity of the Project cannot exceed three (3.0) MW.

5. The Effective Capacity of the Project cannot exceed three (3) MW, as further set forth in both Sections 5(a) and 5(b):

(Continued)

Schedule Re-MAT Sheet 2
RENEWABLE MARKET ADJUSTING TARIFF

D. ELIGIBILITY CRITERIA

5(a). Nameplate Capacity: The Nameplate Capacity, as defined in the ReMAT PPA, of a Project cannot exceed three (3.0) MW, subject to the following:

For AB 1979 Facilities only: If the Project is an AB 1979 Facility, the Project may have a Nameplate Capacity that is less than or equal to four (4.0) MW.

For Energy Storage Projects only: If the Project uses Energy Storage, the Nameplate Capacity of the Eligible Renewable Energy Resource cannot exceed three (3.0) MW, and the Nameplate Capacity of the Energy Storage Equipment cannot exceed three (3.0) MW.

5(b) Interconnection Capacity: The maximum continuous capacity the Project may export to the grid at the Interconnection Point cannot exceed three (3) MW at any time, as demonstrated by Applicant's Interconnection Study or interconnection agreement.

6. Interconnection Study/Strategically Located: An Applicant must have passed the Fast Track screens, passed Supplemental Review, completed a SCE System Impact Study in the Independent Study Process, or completed a SCE Phase 1 Study in the Cluster Study Process for its Project (Interconnection Study).

a. The Project must be interconnected to SCE's distribution system, and the Project's most recent Interconnection Study or Interconnection Agreement must affirmatively support the Project's ability to interconnect (a) within twenty four (24) months of the execution of the Re-MAT power purchase agreement (PPA) (Form 14-934) and (b) without requiring transmission system Network Upgrades in excess of $300,000.

b. Existing Projects that are already interconnected to an Existing SCE Transmission Line on or before December 17, 2021 may participate in ReMAT provided the Project meets all other ReMAT eligibility requirements.

c. A Project using Shared Facilities is eligible to participate in ReMAT if (1) it has a currently effective interconnection agreement for that arrangement that was executed on or before December 17, 2021; and (2) the Project's net interconnection capacity, as set forth in the Project's interconnection agreement does not exceed three (3) MW.

(Continued)

Schedule Re-MAT Sheet 3
RENEWABLE MARKET ADJUSTING TARIFF

D. ELIGIBILITY CRITERIA (Continued)

6. Interconnection Study/Strategically Located: (Continued)

   d. If both SCE's Rule 21 and SCE's Wholesale Distribution Access Tariff (WDAT) are applicable and available to a Project in a given situation, the Project can choose to pursue interconnection under either SCE's Rule 21 or SCE's WDAT, until the CPUC makes a determination otherwise. After such a CPUC decision, Projects must interconnect as stipulated in that CPUC determination, except that those Projects that request interconnection pursuant to SCE's Rule 21 or SCE's WDAT and have submitted a completed PPR under this Schedule prior to any final CPUC determination will not be required to switch interconnection tariffs and will continue to be eligible to receive service under this Schedule, provided the Project is otherwise eligible.

   e. The Interconnection Study, and interconnection agreement when executed, must be consistent with the characteristics of the Project for determination of eligibility, including but not limited to the Project size, interconnection capacity, Site description and all other information provide on Appendix E submitted with the PPR.

7. Site Control: The Applicant must provide to SCE an attestation that it has Site Control of the real property on which the Project is, or will be, located, as further described in Appendix E included with the PPR (Site) through: (a) direct ownership of the Site; (b) lease of the Site; (c) holding a right-of-way grant or similar instrument with respect to the Site; or (d) having a unilaterally exercisable contractual right (i.e., option) to acquire or cause to be acquired on its behalf any of (a), (b), or (c) before the Project's proposed commercial operation date. The Applicant is required to submit a map showing the boundary of the Site for which the Applicant has Site Control as part of the PPR. SCE reserves the right to request additional information.

8. Developer Experience: The Applicant must provide to SCE an attestation that at least one member of its development team has: (a) completed the development of at least one project of similar technology and capacity; or (b) begun construction of at least one other project of similar technology and capacity. A project less than one (1) MW will be deemed to be a similar capacity to a Project with a Contract Capacity of up to one (1) MW. A project between one (1) MW to three (3) MW will be deemed to be a similar capacity to a Project with a Contract Capacity of up to three (3) MW. For example, for a Project with a Contract Capacity of three (3) MW, a project of similar capacity cannot be smaller than one (1) MW.

(Continued)

Schedule Re-MAT Sheet 4
RENEWABLE MARKET ADJUSTING TARIFF

D. ELIGIBILITY CRITERIA (Continued)

9. Daisy Chaining: The Applicant must provide to SCE a signed attestation stating that neither the Applicant nor any Affiliated Company(ies) owns or controls one or more projects located within one (1) mile of the Project that (a) utilize the same Eligible Renewable Energy Resource as the Project and (b) when aggregated with the Project would exceed the facility capacity caps set forth in Section 399.20.

   Additionally, the Applicant must indicate on the attestation whether (1) the Project is the only exporting project being developed or owned or controlled by the Applicant or an Affiliated Company on any single or contiguous piece of property; and (2) the Applicant, or an Affiliated Company, owns or controls one or more projects located between 0-10 miles from the Project, and if so, list the Eligible Renewable Energy Resource, if any, used by each those other projects and the maximum capacity of each of those project(s). There is a rebuttable presumption that projects located between 1-10 miles from the Project are not located at the same Site and shall not be treated as the same facility as the Project. In determining in its reasonable discretion whether this presumption is rebutted in a particular case, SCE will apply the factors set forth by the Federal Energy Regulatory Commission in Paragraph 509 of FERC Order 872 (172 FERC ¶ 61,041, issued July 16, 2020).

   For purposes of this section, the distance between two facilities shall be measured from the edge of the closest electrical generating equipment for which a ReMAT PPA is sought to the edge of the nearest electrical generating equipment of the other affiliated project using the same energy resource.

10. Other Incentives: A Project that previously received incentives under the California Solar Initiative (CSI) or the Self-Generation Incentive Program (SGIP) is ineligible for Re-MAT if the incentives were received within ten (10) years or less of the date that Applicant submits a PPR for Re-MAT for such Project. An Applicant for a Project that previously received incentive payments under CSI or SGIP must provide an attestation to SCE stating that, as of the date the Applicant submits the PPR: (a) the Project has been operating for at least ten (10) years from the date the Applicant first received ratepayer-funded incentive payments under CSI or SGIP for the Project; and (b) to the extent the CPUC requires reimbursement of any ratepayer-funded incentive, the Applicant can demonstrate the Project's owner has provided the applicable administrator with any required refunds of incentives.

11. Net Energy Metering: An Applicant that is a net energy metering (NEM) customer can only participate in Re-MAT if the Applicant terminates its participation in the NEM program for the Project prior to the Re-MAT PPA's Execution Date.

12. Eligibility Criteria Non-Compliance: An Applicant may not submit a PPR if, within the previous six (6) months, the Applicant, the Project, or an Affiliated Company has had: (i) a Re-MAT PPR rejected pursuant to Section E.1.h of this Schedule; or (ii) a Bioenergy Market Adjusting Tariff (BioMAT) program participation request rejected pursuant to section E.2.i of the schedule BioMAT.

(Continued)

Schedule Re-MAT Sheet 5
RENEWABLE MARKET ADJUSTING TARIFF

D. ELIGIBILITY CRITERIA (Continued)

13. For Projects with Energy Storage: Projects that include an Eligible Renewable Energy Resource paired with a Project with Energy Storage are eligible to apply to ReMAT if they meet the following conditions: (1) the Energy Storage must be integral to the Project and entirely within the boundary of the Site; (2) the sole source of energy exchanged with the Energy Storage portion of the Project must be the Eligible Renewable Energy Resource. The Applicant must clearly describe in the PPR: (1) the method of energy exchange between the Project's Energy Storage equipment and the Eligible Renewable Energy Resource; and (2) any physical constraints, hardware or software controls designed to ensure the Project is unable to charge from SCE's electric system and that the Project can only charge from the Project's Eligible Renewable Energy Resource.

E. PROGRAM PARTICIPATION REQUEST

The PPR requirements and review process are described below.

1. An Applicant must submit a complete PPR to be eligible for Re-MAT and must submit the following PPR items. Information on how to submit the PPR will be available on SCE's website. A PPR must include:

   a. PPR Fee: Applicant must pay a $2 per kilowatt (kW) of Contract Capacity non-refundable application fee as part of each PPR submission. The PPR fee will not be applicable towards the Collateral Requirement under a Re-MAT PPA. The manner and form of payment will be specified by SCE on its website or information technology system.

   b. PPR Form: Applicant must submit the PPR form in a manner and form specified by SCE.

(Continued)

Schedule Re-MAT Sheet 6
RENEWABLE MARKET ADJUSTING TARIFF

E. PROGRAM PARTICIPATION REQUEST (Continued)

1. (Continued)

c. Supporting Documentation: Supporting documentation, including but not limited to the items below, must be submitted.

(1) Copy of the most recent Interconnection Study for the Project. Any new or amended Interconnection Study or Interconnection Agreement must be submitted to SCE within five (5) business days of receipt of the study or agreement.

(2) A completed copy of Appendix E of the Re-MAT PPA, including (but not limited to) a single line diagram and a site map clearly outlining the border of the Project site for which site control exists.

(3) An attestation that includes the percentage ownership that the Applicant and Applicant's Affiliates have in each Project for which a PPR has been submitted. The determination of the percentage of ownership that an Applicant holds in a Project will be made by the Applicant, based on accounting standards and/or project financing conventions. SCE will not have an obligation to review materials or documents related to an Applicant's ownership or financing of a Project and will not have an obligation to advise an Applicant on the percentage ownership that an Applicant has in a Project. SCE shall have the right to request and review the Applicant's ownership calculations and supporting documentation. The Applicant must submit an updated attestation within five (5) business days if changes occur.

(4) The attestations required in this Schedule.

(5) Such other information and documentation that SCE may request to verify compliance with the Eligibility Criteria.

d. Review Period and Re-MAT Queue Number Assignment: Within twenty (20) business days of receiving a PPR, SCE, in its sole discretion, will confirm whether the Applicant's PPR is deemed complete and satisfies the Eligibility Criteria. Applicants will be assigned a program position (Re-MAT Queue Number) once the PPR is deemed complete. If the PPR is deemed complete, the Re-MAT Queue Number assignment will be based on the date and time that the PPR was received by SCE.

(Continued)

Schedule Re-MAT Sheet 7
RENEWABLE MARKET ADJUSTING TARIFF

E. PROGRAM PARTICIPATION REQUEST (Continued)

1. (Continued)

e. PPR Rejection: If an Applicant's PPR is deemed incomplete, or the Applicant is otherwise ineligible for a Re-MAT PPA, SCE will notify the Applicant that the PPR has been rejected (i.e., the PPR is null and void). If rejected, the Applicant will be required to submit a new, correct and complete PPR demonstrating the Applicant's eligibility. The Applicant's Re-MAT Queue Number will be based on the date and time of the re-submitted, correct and complete PPR.

f. Cure Period: SCE, in its sole discretion, may permit the Applicant to cure minor deficiencies, as determined by SCE, by re-submitting the PPR (or a subset thereof) within ten (10) business days of notice from SCE of the deficiency. To be permitted to cure the deficiencies identified by SCE, the Applicant's original PPR must demonstrate that the Applicant's Project was eligible at the time of submittal. Applicants whose PPRs contain material substantive issues with program eligibility will be deemed incomplete and rejected. SCE will review a re-submitted PPR within twenty (20) business days of receipt of the re-submitted PPR. If the re-submitted PPR is deemed complete after the second review, the Re-MAT Queue Number assignment will be based on the date that the PPR was initially received by SCE. Failure to re-submit the PPR within ten (10) business days of notice from SCE to correct the minor deficiency shall result in the PPR being rejected, as described in Program Participation Request, Section E.1.e. above.

g. Change in Eligibility: If an Applicant and/or Project previously deemed eligible to participate in Re-MAT no longer meets the Eligibility Criteria, the Applicant must immediately notify SCE's Re-MAT program administrator using the Re-MAT website's message function and shall immediately relinquish its Re-MAT Queue Number for the applicable PPR. The PPR will be deemed to be rejected, as described in Program Participation Request, Section E.1.e. above.

h. Failure to Notify SCE's Program Administrator of Change in Eligibility: If an Applicant or Project previously deemed eligible to participate in Re-MAT no longer meets the Eligibility Criteria, and the Applicant fails to immediately notify SCE's Re-MAT program administrator and relinquish its Re-MAT Queue Number pursuant to Section E.1.g of this Schedule, then the applicable PPR, any PPR associated with the Applicant, the Project, and any Affiliated Company shall each, as applicable: (i) be deemed ineligible for Re-MAT and BioMAT; (ii) have their Re-MAT Queue Number(s) and BioMAT queue numbers revoked and deemed rejected pursuant to Section E.1.e of this Schedule or section E.2.f of the schedule BioMAT; and (iii) be ineligible for any new Re-MAT PPR and any new BioMAT program participation request for six (6) months, commencing on the date that SCE notifies the applicable Applicant that their PPR is rejected pursuant to this Section E.1.h.

2. Once an Applicant has a Re-MAT Queue Number for its proposed Project, the information provided in the PPR regarding the Project may not be modified, unless permitted or approved by SCE, and shall be used for the completion of the Re-MAT PPA. SCE will indicate what information, if any, in the PPR can be modified in its PPR materials, website, and/or information technology system.

3. An Applicant may contest a determination of ineligibility through the CPUC's standard complaint procedure set forth in Article 4, Complaints, of the CPUC's Rules of Practice and Procedure.

(Continued)

Schedule Re-MAT Sheet 8
RENEWABLE MARKET ADJUSTING TARIFF

F. DATES AND PROGRAM LENGTH

1. Initial PPR Submission Date: Applicants will be able to submit a PPR for a Project beginning at 9:00 a.m. PST on October 1, 2013 (Initial PPR Submission Date).

2. Program End: After the sum of the total remaining capacity for all Product Types reaches zero or a *de minimis* amount (0.99 MW or less), SCE will submit a Tier 2 advice letter to seek CPUC approval to close its ReMAT program in accordance with D.21-12-032. Upon approval of the advice letter, the ReMAT Program in SCE's service area will end. A Tier 2 advice letter to close the ReMAT program will not be submitted before December 17, 2022 (12 months after the issuance date of D.21-12-032). Once the program ends, this Schedule will close for all new Applicants and no new Re-MAT PPAs will be offered or executed by SCE.

G. CAPACITY ALLOCATION

Re-MAT capacity shall be allocated as follows:

1. On the Effective Date of Re-MAT, the initial program capacity (Initial Program Capacity) will be calculated by subtracting the sum of the capacity of then existing PPAs under CREST and WATER from the Program Cap (except to the extent the CPUC orders that certain CREST PPAs or WATER PPAs be excluded for purposes of this calculation). On the Effective Date of Re-MAT, the Initial Program Capacity and its calculation will be published on SCE's website.

2. On the Effective Date of Re-MAT, SCE will assign an equal portion of the Initial Program Capacity to three Product Types: 1) Baseload, 2) As-Available Peaking, and 3) As-Available Non-Peaking (Initial Allocations). On the Effective Date of Re-MAT, the Initial Allocations will be published on SCE's website.

3. On the first business day of each Quarter, SCE shall publish the total remaining program capacity, the total remaining program capacity for each Product Type (Available Allocation), and the total capacity in the queue for each Product Type on SCE's website.

(Continued)

Schedule Re-MAT Sheet 9
RENEWABLE MARKET ADJUSTING TARIFF

G. CAPACITY ALLOCATION (Continued)

4. If a CREST PPA is terminated prior to delivery of any electricity to SCE, then any capacity associated with such CREST PPA will be equally allocated among the Product Types. Any terminated CREST PPAs approved in Resolution E-4593 will not be re-allocated. If a WATER PPA is terminated prior to delivery of any electricity to SCE, then any capacity associated with such WATER PPA will be equally allocated among the Product Types. Any capacity associated with CREST or WATER PPAs that are terminated after delivering any electricity to SCE will not be re-allocated.

5. If a Re-MAT PPA is terminated prior to delivery of any electricity to SCE, then any Contract Capacity associated with such Re-MAT PPA will be allocated to the Product Type corresponding to the technology of the terminated Re-MAT PPA. Any Contract Capacity associated with Re-MAT PPAs that are terminated after delivering any electricity to SCE will not be re-allocated.

6. Capacity Reallocation: On or after December 17, 2022, if (A) the Available Allocation for any Product Type is (1) 0.99 MW or less; or (2) less than the Contract Capacity of the next Project in the ReMAT queue for that Product Type; and (B) the Available Allocation in at least one other Product Type category is 1.0 MW or more and greater than the Available Allocation in the third Product Type, SCE will submit a Tier 2 advice letter to combine the remaining capacity of the Product Types satisfying (A) and (B), in the manner prescribed in D.21-12-032.

H. PRICE

The prices for Re-MAT PPAs will be determined as follows:

1. The Re-MAT Contract Price offered for each Product Type, prior to any adjustments through Payment Allocation Factors in accordance with the Re-MAT, will be as follows:

Product Type	***Contract Price***	
As-Available Non-Peaking	$58.38 /MWh	(I)
As-Available Peaking	$67.40 /MWh	(R)
Baseload	$92.33/MWh	(I)

2. The Contract Prices above will be updated annually pursuant to a Resolution issued by the CPUC. SCE will publish the current applicable Contract Price for each Product Type on SCE's website.

(Continued)

Schedule Re-MAT Sheet 10
RENEWABLE MARKET ADJUSTING TARIFF

H. PRICE

3. Payment Allocation Factors: Contract Prices will be adjusted by the Payment Allocation Factors included in the Re-MAT PPA in accordance with the terms of the Re-MAT PPA. The Payment Allocation Factors are based on time-of-delivery periods and whether the Project is an energy-only facility or has full capacity deliverability. The Re-MAT PPA provides further detail regarding monthly payment calculations and the Payment Allocation Factors. The Payment Allocation Factors will be updated periodically to reflect the most recent CPUC approved Payment Allocation Factors.

I. PPA AWARD

1. If an Applicant's PPR is deemed complete, the PPR will be eligible for the Contract Price which was available on the day of PPR submission.

2. SCE will award ReMAT PPAs to Applicants that meet the Eligibility Criteria and have been deemed complete, starting with the first Applicant in the ReMAT Queue Number order until the Available Allocation for the Product Type is Deemed Fully Subscribed, after all Capacity Reallocations in accordance with Section G. Information from the PPR will be incorporated into the ReMAT PPA for execution. SCE will provide written notice to Applicants that are next in the queue for a ReMAT PPA in each Product Type.

3. Within ten (10) business days of receiving written notice of the ReMAT PPA award from SCE Applicants must provide SCE with an executed Re-MAT PPA based on the applicable Contract Price SCE's website, information technology systems, or materials shall specify how Applicant shall provide written notice to SCE.

4. Notwithstanding the foregoing, for Projects using Energy Storage, SCE will submit a Tier 2 advice letter for CPUC approval of the PPA describing 1) the Product Type the Facility will receive compensation under; and 2) how the Facility is charged solely from the Eligible Renewable Energy Resource and any hardware or software controls installed to ensure it is unable to charge from the grid and provides generation consistent with its Product Type; (3) any modifications to metering provisions, if necessary to implement 1) & 2); and (4) any other modifications necessary to address project-specific considerations not addressed in the standard PPA. The Applicant is expected to cooperate with all requests for information to support the advice letter submission and approval.

5. Failure to provide SCE with an executed ReMAT PPA by 5:00 p.m. PST on the tenth (10th) business day after receiving written notice of the ReMAT PPA award from SCE will be deemed notice that the Applicant: (i) no longer satisfies the Eligibility Criteria; and (ii) is relinquishing its Re-MAT Queue Number for the applicable PPR. The PPR will be deemed to be rejected, as described in Section E.1.e of this Schedule.

6. SCE will award Re-MAT PPAs to Applicants that meet the Eligibility Criteria in Re-MAT Queue Number order until the Available Allocation for the Product Type is Deemed Fully Subscribed, after all Capacity Reallocations in accordance with Section I.2 above. If the Contract Capacity of the next Project in Re-MAT PPA, in Re-MAT Queue Number order, for a Product Type is larger than the remaining Available Allocation, that next Applicant will not be awarded a Re-MAT PPA and SCE will deem the Available Allocation to be fully subscribed (Deemed Fully Subscribed). Notwithstanding the foregoing, in the event the conditions for Capacity Reallocation are met as described in Section G. Capacity Allocation, the next Applicant in the Product Type queue without sufficient Available Allocation will remain in the queue for the until SCE's Tier 2 advice letter for combining the Available Allocation of one or more Product Types is approved by the CPUC.

(Continued)

Schedule Re-MAT Sheet 11
RENEWABLE MARKET ADJUSTING TARIFF

I. PPA AWARD (Continued)

6. The Project may not have an existing PPA or other contract for energy and/or capacity deliveries to SCE, or to any other counterparty, from the same Project at the time of execution of the Re-MAT PPA or, if allowed per the terms of the existing contract, the Seller must provide documentation demonstrating that the existing contract will be terminated on a date certain that is within the Commercial Operation Date (COD) timing allowed in the Re-MAT PPA prior to the execution of the Re-MAT PPA. Notwithstanding the foregoing, to the extent Seller is seeking an excess sales Re-MAT PPA for the Project, Seller is not required to terminate or demonstrate future termination of any applicable contractual arrangements with respect to serving any Site Host Load.

7. Within ten (10) business days of the execution of the Re-MAT PPA by both the Applicant and SCE, SCE shall provide on its website information regarding the executed Re-MAT PPA as required by the CPUC in D.12-05-035.

J. RE-MAT PPA

The Re-MAT PPA will be completed by SCE for execution by the Applicant and shall include the information submitted in the PPR, which includes, but is not limited to, the information listed below. SCE will post an announcement on SCE's website and notify Projects in the ReMAT queue when modifications to the ReMAT PPA or Tariff are submitted to the CPUC for approval.

1. Seller Name: Must be a legal entity

2. Project Name

3. Facility street address (or nearest intersection) (or coordinates if no intersection or street address)

4. Product Type of Facility: Baseload, As-Available Peaking or As-Available Non Peaking

5. Renewable Resource Type: Solar PV, Biogas, etc.

6. Interconnection Queue Position and Interconnection Agreement number, if available.

(Continued)

Schedule Re-MAT Sheet 12
RENEWABLE MARKET ADJUSTING TARIFF

J. RE-MAT PPA (Continued)

7. Interconnection Point
8. Service Voltage
9. Delivery Point
10. Expected Commercial Operation Date: No later than twenty-four (24) months from execution date of the Re-MAT PPA
11. Contract Capacity
12. Nameplate Capacity
13. Delivery Term: 10, 15, or 20 years
14. Transaction: Full Buy/Sell or Excess Sale
15. Contract Quantity: Provide estimates in kWh/year, net of Station Use and Site Host Load for each year of the Delivery Term

K. METERING

Projects must be electrically independent and separately metered. Metering requirements are described in the Re-MAT PPA.

L. SPECIAL CONDITIONS

The following special conditions apply to Re-MAT and the Re-MAT program:

1. COD Extension Policy: The COD for the Re-MAT PPA may only be extended pursuant to the terms in the Re-MAT PPA. The Re-MAT PPA requires that the Project achieve its COD within twenty-four (24) months after the Execution Date of the Re-MAT PPA, with the possibility of one six (6) month extension for Permitted Extensions as set forth in the Re-MAT PPA.
2. Termination of Service: Unless terminated earlier pursuant to the Re-MAT PPA, the Re-MAT PPA automatically terminates immediately following the last day of the Delivery Term.
3. Re-MAT Suspension: SCE may file a motion with the CPUC to suspend Re-MAT when evidence of market manipulation or malfunction exists. The motion must be filed on the applicable CPUC service list. The motion shall identify the portion of the program suspended, the specific behavior and reasons for the suspension, and SCE's proposal for resolving the problem. Any requested suspension will be implemented by SCE immediately upon filing and shall not be modified or changed unless directed by the CPUC.

(Continued)

Schedule Re-MAT Sheet 13
RENEWABLE MARKET ADJUSTING TARIFF

M. DENIAL OF RE-MAT SERVICE

SCE may deny a request for service, upon written notice, under this Schedule if it makes any of the following findings:

1. The Project does not meet the requirements of PUC Section 399.20 or any applicable CPUC decision.

2. The transmission or distribution grid that would serve as the point of interconnection is inadequate.

3. The Project does not meet all applicable state and local laws and building standards, and utility interconnection requirements.

4. The aggregate of all electric generation facilities on a distribution circuit would adversely impact utility operation and load restoration efforts of the distribution system.

5. There exist any outstanding obligations owed to SCE by the Applicant under a previously executed Re-MAT PPA or other agreement related to the sale of energy, capacity, green attributes, or other related products, in each case, that relates to either any portion of the site or the interconnection queue position to be utilized by the Project seeking service.

6. The Applicant does not otherwise meet the requirements of this Schedule.

Upon receipt of a notice of denial from SCE, the Applicant may appeal the decision to the CPUC.

N. DEFINITIONS

Capitalized terms in this Schedule shall have the same meaning as the defined term in the Re-MAT PPA (Form 14-934), unless the term is otherwise defined in this Schedule.

1. AB 1979 Facility: For the purposes of this Schedule, an AB 1979 Facility is a conduit hydroelectric facility that was operational on or before January 1, 1990, and on or before January 1, 1990 the facility had a nameplate capacity equal to the Applicant's Nameplate Capacity.

2. Affiliated Company(ies): For the purpose of this Schedule, Affiliated Company(ies) shall mean: (i) any entity with a direct or indirect equity interest in the Applicant or the Project; (ii) any subsidiary of the Applicant; or (iii) any affiliate of the Applicant.

3. As-Available Non-Peaking: For the purposes of this Schedule, As-Available Non-Peaking shall have the same meaning as the defined term "As-Available Facility" in Appendix A of the Re-MAT PPA and have a generation profile demonstrating intermittent energy delivery with less than 95% of the expected output delivered between the hours of 6:00 a.m. and 10:00 p.m.. SCE requires Applicant to submit a generation profile (8,760 hours of Project export) and any supporting information for the Project to confirm the generation profile, including, if applicable, supporting documentation demonstrating the Project has the physical equipment with the necessary hardware and software controls to deliver the Product Type.

(Continued)

Schedule Re-MAT Sheet 14
RENEWABLE MARKET ADJUSTING TARIFF

N. DEFINITIONS (Continued)

4. As-Available Peaking: For the purposes of this Schedule, As-Available Peaking shall have the same meaning as the defined term "As-Available Facility" in Appendix A of the Re-MAT PPA and have a generation profile demonstrating intermittent energy delivery with 95% or more of the expected output delivered between the hours of 6:00 a.m. and 10:00 p.m.. SCE requires a generation profile (8,760 hours of expected Project export) and supporting information for the Project to confirm the generation profile, including, if applicable, supporting documentation demonstrating the Project has the physical equipment with the necessary hardware and software controls to deliver the Product Type.

5. Baseload: For the purposes of this Schedule, Baseload shall have the same meaning as the defined term "Baseload Product Type" in Appendix A of the Re-MAT PPA.

6. Distribution Line: For the purposes of this Schedule and the ReMAT PPA, a distribution line is a non-CAISO controlled, SCE-owned electric circuit within SCE's electric service territory, regardless of line voltage.

7. Energy Storage Project or Energy Storage: A Project consisting of an Eligible Renewable Energy Resource with enhancement(s) that render the Project capable of storing such Eligible Renewable Energy Resource to deliver the energy to the grid at a different time than when the electricity is generated from such Eligible Renewable Energy Resources. For avoidance of doubt, for the purposes of ReMAT, an Energy Storage Project can include storage devices integrated into the Eligible Renewable Energy Resource, but stand-alone energy storage projects are not eligible to participate.

8. Existing SCE Transmission Line: For the purposes of this Schedule and the ReMAT PPA, an existing transmission line must be a SCE owned network circuit under the operational control of the CAISO, and must have been built and operational as of December 17, 2021.
