Schedule TOU-EV-8 Sheet 1

GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

APPLICABILITY

Applicable solely for the charging of Electric Vehicles (EV), as defined in Rule 1, on a Premises or public right of way where a separate SCE meter to serve EV charging facilities is requested.

This Schedule is applicable to Customers whose monthly Maximum Demand, in the opinion of SCE is expected to register above 20 kW but not exceed 500 kW. Customers whose monthly Maximum Demand, in the opinion of SCE, is expected to register above 500 kW or has exceeded 500 kW for any three months during the preceding 12 months is ineligible for service under this Schedule. Effective with the date of such ineligibility, the Customer's account shall be transferred to Schedule TOU-EV-9 or other applicable Time-of-Use rate schedule. Any Customer served under this Schedule whose monthly Maximum Demand has registered 20 kW or less for 12 consecutive months is ineligible for service under this Schedule and shall be transferred to Schedule TOU-EV-7 or other applicable Time-of-Use rate schedule. Service under this Schedule is subject to meter availability.

Pursuant to Special Condition 11 herein, Customers receiving service under this Schedule may be eligible to receive the California Climate Credit as shown in the RATES section below.

TERRITORY

Within the entire territory served.

RATES

Commencing March 1, 2019, no Demand Charge shall apply to Customers receiving service under this Schedule. Demand Charge shall be phased-in pursuant to the process described in Special Condition 5 of this Schedule and as determined and authorized by the Commission in SCE's next GRC Phase 2 application or any Commission proceeding related to transportation electrification. (T) | | (T)

Schedule TOU-EV-8 Sheet 3
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

RATES (Continued)

* The ongoing Competition Transition Charge (CTC) of $0.00011 per kWh is recovered in the UG component of Generation.

1 Trans = Transmission and the Transmission Owners Tariff Charge Adjustments (TOTCA) which are FERC approved. The TOTCA represents the Transmission Revenue Balancing Account Adjustment (TRBAA) of ($0.00222) per kWh, Reliability Services Balancing Account Adjustment (RSBAA) of $0.00011 per kWh, and Transmission Access Charge Balancing Account Adjustment (TACBAA) of $0.00161 per kWh. (R)

2 Distrbtn = Distribution

3 NSGC = New System Generation Charge

4 NDC = Nuclear Decommissioning Charge

5 PPPC = Public Purpose Programs Charge (includes Diablo Canyon Power Plant charge and California Alternate Rates for Energy Surcharge where applicable. Control tab)

6 WFC = Wildfire Fund Non-Bypassable Charge. The Wildfire Fund Non-Bypassable Charge supports the California Wildfire Fund and is not applicable to exempt Customers pursuant to D.19-10-056.

7 PUCRF = The PUC Reimbursement Fee is described in Schedule RF-E.

8 Total = Total Delivery Service rates are applicable to Bundled Service, Direct Access (DA) and Community Choice Aggregation Service (CCA Service) Customers, except DA and CCA Service Customers are not subject to the DWRBC rate component of this Schedule but instead pay the DWRBC as provided by Schedule DA-CRS or Schedule CCA-CRS.

9 Generation – The Generation rates are applicable only to Bundled Service Customers. See Special Condition below for PCIA recovery.

10 DWREC = Department of Water Resources (DWR) Energy Credit – For more information on the DWR Energy Credit, see the Billing Calculation Special Condition of this Schedule.

11 DWRA = A refund from the California Department of Water Resources (DWR) relating to the purchase of power during the 2000-2001 energy crisis.

12 The Modified Cost Allocation Mechanism (MCAM) charge recovers the net cost associated with system reliability procurement ordered by the CPUC that SCE has procured on behalf of customers whose generation services are provided by certain Electric Service Providers or Community Choice Aggregators.

(Continued)

Schedule TOU-EV-8 Sheet 4
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

SPECIAL CONDITIONS

1. Voltage: Service under this Schedule will be supplied at one standard voltage.

2. Time periods are defined as follows:

TOU Period	Weekdays		Weekends and Holidays	
	Summer	Winter	Summer	Winter
On-Peak	4 p.m. - 9 p.m.			
Mid-Peak		4 p.m. - 9 p.m.	4 p.m. - 9 p.m.	4 p.m. - 9 p.m.
Off-Peak	All other hours	9 p.m. - 8 a.m.	All other hours	9 p.m. - 8 a.m.
Super-Off-Peak		8 a.m. - 4 p.m.		8 a.m. - 4 p.m.

The summer season shall commence at 12:00 a.m. on June 1 and continue until 12:00 a.m. on October 1 of each year. The winter season shall commence at 12:00 a.m. on October 1 and continue until 12:00 a.m. on June 1.

Holidays are New Year's Day (January 1), Presidents' Day (third Monday in February), Memorial Day (last Monday in May), Independence Day (July 4), Labor Day (first Monday in September), Veterans Day (November 11), Thanksgiving Day (fourth Thursday in November), and Christmas (December 25).

When any holiday listed above falls on Sunday, the following Monday will be recognized as a holiday. No change will be made for holidays falling on Saturday.

3. Metering: Only EV charging facilities and related equipment shall be separately metered and served under this Schedule. Where SCE determines that the operation of the EV charging facilities may interfere with service to that customer or other customers, SCE will install a load management device, at customer's expense, to control when EV charging will occur. For purposes of monitoring customer load, SCE may install at its expense, load research metering. The customer shall provide, at no expense to SCE, a suitable location for meters and associated equipment.

4. PCIA Recovery in Bundled Generation Rates: Bundled Service Customer Generation charges include an amount to recover the above-market portion of SCE's generation portfolio. 'Above market' refers to the difference between what the utility pays for electric generation and current market prices for the sale of those resources. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service Customers' bills under the description of the Generation charge. (N) | | | | (N)

(Continued)

Schedule TOU-EV-8 Sheet 5
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

SPECIAL CONDITIONS (Continued)

5. Billing Demand:

a. No Demand Charge (T)

Commencing March 1, 2019, no Demand Charge shall apply to Customers receiving service under this Schedule. (T)

Discontinued EV Customers: The following shall apply to Customers who were served on Schedule TOU-EV-4 prior to this Schedule, and who are collocated on the same Premises as the General Service account. Commencing March 1, 2019, if the EV load's Maximum Demand is less than the General Service account's Maximum Demand, the Customer will not pay Distribution Energy Charge. If the EV load's Maximum Demand is greater than the General Service account's Maximum Demand, the difference between the EV load's Maximum Demand and the General Service account's Maximum Demand will be converted to a kWh value based on the hours in the billing period and the class average load factor. The converted kWh value will then be applied to a Distribution Energy Charge (¢/kWh) for billing purposes. The Distribution Energy Charge will reflect the cost for Distribution service that would otherwise be reflected through Distribution Demand Charge. (T) (T)

b. Phase-In of Demand Charge (T)

Phase-In of Demand Charge shall occur as determined and authorized by the Commission in SCE's next GRC Phase 2 application or any Commission proceeding related to transportation electrification. Unless otherwise authorized by the Commission, the Billing Demand shall be the kilowatts (kW) of Maximum Demand, determined to the nearest kW. The Facilities Related Component shall be for the kW of Maximum Demand recorded during (or established for) the monthly billing period. (T) | (T)

The following shall apply to Customers newly taking service on this Schedule who are collocated on the same Premises as the General Service account. The Demand Charge on the EV load's Maximum Demand will apply only when the EV load's Maximum Demand exceeds the General Service account's Maximum Demand. The Demand Charge will be applied to the difference, in kW, of the EV load's Maximum Demand and the General Service account's Maximum Demand. All other charges associated with the applicable EV load's Maximum Demand shall be applied to standalone (*i.e.*, non-collocated) EV service.

(Continued)

Schedule TOU-EV-8 Sheet 6
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

SPECIAL CONDITIONS (Continued)

5. Billing Demand: (Continued)

b. Phase-In of Demand Charge (Continued) (T)

Discontinued EV Customers. The following shall apply to Customers who were served on Schedule TOU-EV-4 prior to this Schedule, and who are collocated on the same Premises as the General Service account. If the EV load's Maximum Demand is greater than the General Service account's Maximum Demand, the Demand Charge will be applied to the difference, in kW, of the EV load's Maximum Demand, and the General Service account's Maximum Demand. Additionally, the kWh usage associated with the incremental Maximum Demand will be applied to the Distribution Energy Charge (¢/kWh) for Distribution service. If the EV load's Maximum Demand is less than the General Service account's Maximum Demand, no Demand Charge or Distribution Energy Charge will be applied.

6. Maximum Demand: The maximum demand for each period shall be the measured maximum kW input, indicated or recorded by instruments, such as SCE metering during the monthly billing period.

7. Voltage Discount: Bundled Service, CCA Service, and Direct Access Customers will have the Distribution rate component of the applicable Delivery Service charges reduced by the corresponding Voltage Discount amount for service metered and delivered at the applicable voltage level as shown in the RATES section above. In addition, Bundled Service Customers will have the Utility Generation (UG) rate component of the applicable Generation charges reduced by the corresponding Voltage Discount amount for service metered and delivered at the applicable voltage level as shown in the RATES section.

8. Power Factor Adjustment: When the Maximum Demand has exceeded 200 kW for three consecutive months, kilovar metering will be installed as soon as practical, and, thereafter, until the Maximum Demand has been less than 150 kW for twelve consecutive months, the billing will be increased each month for power factor by the amount shown in the Rates section above for service metered and delivered at the applicable voltage level, based on the per kilovar of maximum Reactive Demand imposed on SCE.

The reactive demand will be determined as follows:

(Continued)

Schedule TOU-EV-8 Sheet 7
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

SPECIAL CONDITIONS (Continued)

8. (Continued) (T)

a. Service delivered and metered at voltages of 4 kV or greater and for all Cogeneration and Small Power Production Customers:

The maximum reactive demand shall be the highest measured maximum average kilovar demand indicated or recorded by metering during any 15-minute metered interval in the month. The kilovars shall be determined to the nearest unit. A device will be installed on each kilovar meter to prevent reverse operation of the meter.

b. Service delivered and metered at voltages Less than 4 kV:

(1) For Customers with metering used for billing that measures reactive demand.

The maximum reactive demand shall be the highest measured maximum average kilovar demand indicated or recorded by metering during any 15-minute metered interval in the month. The kilovars shall be determined to the nearest unit. A device will be installed on each kilovar meter to prevent reverse operation of the meter.

(2) For Customers with metering used for billing that measures kilovar-hours instead of reactive demand.

The kilovars of reactive demand shall be calculated by multiplying the kilowatts of measured maximum demand by the ratio of the kilovar-hours to the kilowatthours. Demands in kilowatts and kilovars shall be determined to the nearest unit. A ratchet device will be installed on the kilovar-hour meter to prevent its reverse operation on leading power factors.

9. Interconnection: Customers taking service under this Schedule shall have no electrical interconnection beyond the SCE's Point of Delivery between electrical loads eligible for service under this Schedule and any other electrical loads. (T)

10. Terms of Service: A Customer receiving service under this Schedule may elect to change to another applicable rate schedule (e.g. Schedule TOU-8 Option E, or an applicable Real Time Pricing (RTP) schedule) but only after receiving service on this Schedule for at least 12 consecutive months. If a Customer elects to discontinue service on this Schedule, the Customer will not be permitted to return to this Schedule for a period of one year. (T)

When service under this Schedule (i.e., separately metered EV rate) is provided through an additional service to the Customer's General Service account, the Customer may elect to change from this Schedule to another applicable rate schedule (e.g., Schedule TOU-8 Option E, or an applicable RTP schedule) but only after receiving service on this Schedule for at least 12 consecutive months. If service is provided in this manner and the Customer elects to discontinue the separately metered EV service, the additional service will be removed at the Customer's expense.

(Continued)

Schedule TOU-EV-8 Sheet 8
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

SPECIAL CONDITIONS (Continued)

11. Billing Calculation: A customer's bill is calculated according to the rates and conditions above.

The charges listed in the RATES section are calculated by multiplying the Total Delivery Service rates and the Generation rates, when applicable, by the billing determinants (e.g., per kilowatt [kW], kilowatthour [kWh], kilovar [kVAR], etc.).

As of January 1, 2012, all generation supplied to Bundled Service Customers is provided by SCE.

a. Bundled Service Customers receive Delivery Service and Generation service from SCE. The customer's bill is the sum of the charges for Delivery Service and Generation service determined, as described in this Special Condition, and subject to applicable discounts or adjustments provided under SCE's tariff schedules.

b. Direct Access Customers receive Delivery Service from SCE and purchase energy from an Energy Service Provider. The customer's bill is the sum of the charges for Delivery Service determined as described in this Special Condition except that the DWRBC rate component is subtracted from the Total Delivery Service rates before the billing determinants are multiplied by such resulting Total rates; plus the applicable charges as shown in Schedule DA-CRS and subject to applicable discounts or adjustments provided under SCE's tariff schedules.

c. CCA Service Customers receive Delivery Service from SCE and purchase energy from their Community Choice Aggregator (CCA). SCE will read the meters and present the bill for both Delivery and Generation Services to the CCA Service Customer. The customer's bill is the sum of the charges for Delivery Service as displayed in this Rate Schedule and Generation charges determined by the CCA plus the applicable charges as shown in Schedule CCA-CRS, and subject to applicable discounts or adjustments provided under SCE's tariff schedules.

12. Small Business Customer California Climate Credit: For purposes of receiving the California Climate Credit from the State of California, non-residential customers receiving service on a General Service or Agricultural Pumping rate schedule with an electric Billing Demand that does not exceed 20 kW in more than three months within the previous twelve-month period are designated as Small Business Customers and are eligible to receive the California Climate Credit shown in the RATES section above. The credit is applied to the April and October billing statements after the calculation of city and county utility users' taxes on customers' utility bills and prior to the application of franchise fees. For customers that lack twelve months of billing data, eligibility is based on the customer's rate schedule and the number of times the customer has exceeded 20 kW. Customers who meet the eligibility criteria for Small Business Customers but who are designated as Emissions-Intensive and Trade-Exposed (EITE) are not considered Small Business Customers under this Special Condition and are not eligible to receive the California Climate Credit. Customers receiving generation services from the City of Cerritos, the City of Corona and the Eastside Power Authority are not eligible to receive the California Climate Credit. (D)

(Continued)

Schedule TOU-EV-8 Sheet 9
GENERAL SERVICE TIME-OF-USE, ELECTRIC VEHICLE CHARGING, DEMAND METERED

SPECIAL CONDITIONS (Continued)

13. Fixed Recovery Charge. SCE has been permitted to issue bonds that enable it to recover more quickly certain costs related to preventing and mitigating catastrophic wildfires, while reducing the total cost to its customers. The Fixed Recovery Charge (FRC) has been approved by the CPUC to repay those bonds. The right to recover the FRC has been transferred to a separate entity (called the Special Purpose Entity) that issued the bonds and recovery does not belong to SCE. SCE is collecting the FRC on behalf of the Special Purpose Entity.

14. Electric Vehicle (EV) Submetering. Where electricity is furnished for EV charging, a Customer may use an EV submeter to measure EV charge load provided it meets the requirements established in the Plug-In Electric Vehicle Submetering Protocol (i.e., Decision 22-08-024). All charges in the RATES section above apply for the EV submeter, in addition to the EV Submeter Credit. (N) | | | (N)
