Schedule TOU-PA-3 Sheet 1
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

APPLICABILITY

Applicable where SCE determines that 70% or more of the Customer's electrical usage is for Agricultural Power Service, General Water or Sewerage pumping, or for oil pumping by Customers with a Standard Industrial Classification (SIC) Code of 1311, and none of any remaining electrical usage is for purposes for which a domestic schedule is applicable. This Schedule is applicable to Customers whose monthly Maximum demand registers, or in the opinion of SCE, is expected to register 200 through 500 kW. The Customer whose monthly Maximum Demand, in the opinion of SCE, is expected to exceed 500 kW or has exceeded 500 kW for any three months during the preceding 12 months is ineligible for service under this Schedule. Effective with the date of ineligibility, the Customer's account shall be transferred to Schedule TOU-8 or Schedule TOU-8-S if the Customer's account is also served under Schedule S.

Customers with Maximum Demands exceeding 500 kW who meet the criteria of the following exceptions are either ineligible or not required to take service under Schedule TOU-8 or Schedule TOU-8-S, and are eligible for service on an applicable agricultural and pumping rate schedule including this Schedule and Schedule S, if applicable:

1. Individual water agency accounts where 70 percent or more of the water pumped is for Agricultural Power Service purposes, and other water pumping accounts where 70 percent or more of the water is for Agricultural Power Service purposes who have signed Form 14-317, Declaration and Rate Election for Water Agencies and Water Pumping Accounts. Such accounts are ineligible for service under Schedules TOU-8 or TOU-8-S; and

2. Customers who are (1) packing houses that pack only whole fruits or whole vegetables, and associated cold storage on the same Premises as the packing houses; (2) cotton gins; (3) nut hulling and shelling operations; or (4) producing unflavored fluid milk fit for human consumption by way of pasteurization, homogenization, vitaminization or fat standardization who have signed Form 14-927, Affidavit Regarding Eligibility for Agricultural Power Service. Such accounts are not required to take service under Schedules TOU-8 or TOU-8-S.

3. Agricultural Power Service Customers with electric energy and service used on the same Premises where the Customer produces agricultural or horticultural products, including poultry and livestock. Such accounts are not required to take service under Schedules TOU-8 or TOU-8-S.

Further, any Customer served under this Schedule whose monthly Maximum Demand has registered below 200 kW for 12 consecutive months is ineligible for service under this Schedule and shall be transferred to Schedule TOU-PA-2. Except for interruptible Customers, a Customer who makes a permanent change in operating conditions that SCE, in its sole opinion, anticipates will reduce the Customer's demand to below 200 kW, may transfer to Schedule TOU-PA-2 before completing 12 consecutive months at the reduced demand levels. This Schedule is subject to meter availability.

This Schedule contains nine rate structures; Option D, Option D-Critical Peak Pricing (CPP), Option D-5TO8, Option D-5TO8-CPP, Option E, Option E-5TO8, Discontinued TOU Period Options, Option A, Option B, and Option B-CPP. (D)

Schedule TOU-PA-3 Sheet 2
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

APPLICABILITY (Continued)

Option D-CPP

Option D-CPP is the default Option of this Schedule. Effective March 1, 2019 on the Customer's next scheduled billing date, eligible Bundled Service Customers who have at least 24 months of experience on a TOU Option who were served on Option B will be defaulted to Option D-CPP. Customers who lack 24 months of TOU experience will be defaulted to Option D. However, Customers may elect another Option for which they are eligible.

Except as detailed below, Bundled Service Customers taking service on Option D, with 24 months of TOU experience by August 1 each year, will be eligible for CPP default once per year during the Annual CPP Default Window. The Annual CPP Default Window will occur each October beginning 2020.

Customers are not eligible for default to Option D-CPP if they:

a. have previously been on CPP;
b. have elected to opt-out of Option D-CPP;
c. are not taking service on Option D;
d. are taking service under Direct Access, Community Aggregation, or Community Choice Aggregation Service; or
e. are taking service under a Demand Response Schedule (e.g., GS-APS-E, the Day-of Option of CBP, TOU-BIP, or a third-party administered demand response program, etc.)

For Customers who are either defaulted or elect Option D-CPP, one-time Bill Protection, as further defined in Special Condition 4.f., will be provided for up to the first 12 months of participation on a CPP Option.

Pursuant to D.18-11-029, except for the Customers discontinued to continue the existing dual participation in accordance with Special Condition 4.e., all Customers served under CPP of this Schedule are not eligible to enroll in any other demand response program offered by SCE or any third-party administered demand response program.

Discontinued Options

(D)

Pursuant to CPUC Decisions (D.)17-01-006 and D.17-10-018, solar Customers meeting the eligibility criteria outlined in Special Condition 13 herein are eligible to continue receiving service on a TOU Option with Discontinued TOU Periods as described below.

a. Option A Customers will be transitioned to the discontinued Option A; or
b. Option B Customers will be transitioned to the discontinued Option B;

TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

TERRITORY

Within the entire territory served.

RATES (Continued)

The rates below will apply to all Customer's receiving service under this Schedule. In addition, the Customer will be charged the applicable rates under Option D-CPP, Option D, Option D 5TO8, Option D- 5TO8-CPP, Option E. Option E 5TO8, Option B-CPP, Option B, Option A, or Option CPP as listed below. CPP Event Charges will apply to all energy usage (kWh) during CPP Events and CPP Non-Event Credits will apply to Demand (kW) on CPP Non-Event days during Summer Season weekdays, 4:00 p.m. to 9:00 p.m. as described in Special Conditions 1 and 3, below. 1 Trans = Transmission and the Transmission Owners Tariff Charge Adjustments (TOTCA) which are FERC approved. The TOTCA represents the Transmission Revenue Balancing Account Adjustment (TRBAA) of $(0.00222) per kWh, Reliability Services Balancing Account Adjustment (RSBAA) of $0.00008 per kWh, and Transmission Access Charge Balancing Account Adjustment (TACBAA) of $0.00161 per kWh. (R)
2 Distrbtn = Distribution
3 NSGC = New System Generation Charge
4 NDC = Nuclear Decommissioning Charge
5 PPPC = Public Purpose Programs Charge (includes Diablo Canyon Power Plant charge and California Alternate Rates for Energy Surcharge where applicable.)
6 WFC = Wildfire Fund Non-Bypassable Charge. The Wildfire Fund Non-Bypassable Charge supports the California Wildfire Fund and is not applicable to exempt Customers pursuant to D.19-10-056.
7 PUCRF = The PUC Reimbursement Fee is described in Schedule RF-E.
8 Total = Total Delivery Service rates are applicable to Bundled Service, Direct Access (DA) and Community Choice Aggregation Service (CCA Service) Customers, except DA and CCA Service Customers are not subject to the DWRBC rate component of this Schedule but instead pay the DWRBC as provided by Schedule DA-CRS or Schedule CCA-CRS.
9 Generation = The Generation rates are applicable only to Bundled Service Customers. See Special Condition below for PCIA recovery.
10 DWREC = Department of Water Resources (DWR) Energy Credit – For more information on the DWR Energy Credit, see the Billing Calculation Special Condition of this Schedule.
11 DWRA = A refund from the California Department of Water Resources (DWR) relating to the purchase of power during the 2000-2001 energy crisis.
12 The Modified Cost Allocation Mechanism (MCAM) charge recovers the net cost associated with system reliability procurement ordered by the CPUC that SCE has procured on behalf of customers whose generation services are provided by certain Electric Service Providers or Community Choice Aggregators.

From 2 kV to 50 kV	0.00000	(0.00063) (I)							(0.00063) (I)	(0.00141)	
Above 50 kV but below 220 kV	0.00000	(0.01242) (I)							(0.01242) (I)	(0.00318)	
At 220 kV	0.00000	(0.03590) (I)							(0.03590) (I)	(0.00321)	

* The ongoing Competition Transition Charge (CTC) of $0.00010 per kWh is recovered in the UG component of Generation.

1 Trans = Transmission and the Transmission Owners Tariff Charge Adjustments (TOTCA) which are FERC approved. The TOTCA represents the Transmission Revenue Balancing Account Adjustment (TRBAA) of $(0.00222) per kWh, Reliability Services Balancing Account Adjustment (RSBAA) of $0.00008 per kWh, and Transmission Access Charge Balancing Account Adjustment (TACBAA) of $0.00161 per kWh. (R)

2 Distrbtn = Distribution

3 NSGC = New System Generation Charge

4 NDC = Nuclear Decommissioning Charge

5 PPPC = Public Purpose Programs Charge (includes Diablo Canyon Power Plant charge and California Alternate Rates for Energy Surcharge where applicable.)

6 WFC = Wildfire Fund Non-Bypassable Charge. The Wildfire Fund Non-Bypassable Charge supports the California Wildfire Fund and is not applicable to exempt Customers pursuant to D.19-10-056.

7 PUCRF = The PUC Reimbursement Fee is described in Schedule RF-E.

8 Total = Total Delivery Service rates are applicable to Bundled Service, Direct Access (DA) and Community Choice Aggregation Service (CCA Service) Customers, except DA and CCA Service Customers are not subject to the DWRBC rate component of this Schedule but instead pay the DWRBC as provided by Schedule DA-CRS or Schedule CCA-CRS.

9 Generation = The Generation rates are applicable only to Bundled Service Customers. See Special Condition below for PCIA recovery.

10 DWREC = Department of Water Resources (DWR) Energy Credit – For more information on the DWR Energy Credit, see the Billing Calculation Special Condition of this Schedule.

11 DWRA = A refund from the California Department of Water Resources (DWR) relating to the purchase of power during the 2000-2001 energy crisis.

12 The Modified Cost Allocation Mechanism (MCAM) charge recovers the net cost associated with system reliability procurement ordered by the CPUC that SCE has procured on behalf of customers whose generation services are provided by certain Electric Service Providers or Community Choice Aggregators.

(Continued)

Schedule TOU-PA-3 Sheet 11 (T)
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

1. Applicable rate time periods are defined as follows: (Continued)

   Holidays are New Year's Day (January 1), Presidents' Day (third Monday in February), Memorial Day (last Monday in May), Independence Day (July 4), Labor Day (first Monday in September), Veterans Day (November 11), Thanksgiving Day (fourth Thursday in November), and Christmas (December 25).

   When any holiday listed above falls on Sunday, the following Monday will be recognized as a holiday. No change will be made for holidays falling on Saturday. (T)

   The Summer Season shall commence at 12:00 a.m. on June 1 and continue until 12:00 a.m. on October 1 of each year. The winter season shall commence at 12:00 a.m. on October 1 of each year and continue until 12:00 a.m. on June 1 of the following year.

2. Voltage: Service will be supplied at one standard voltage.

3. Agreements: (L)

   a. Individual water agency accounts with demand levels greater than 500 kW where 70 percent or more of the water pumped is used for Agricultural Power Service purposes, and other water pumping accounts with demands above 500 kW where 70 percent or more of the water pumped is used for Agricultural Power Service purposes must sign a Declaration and Rate Election for Water Agencies and Water Pumping Accounts, Form 14-317, to qualify for this Schedule.

   b. Customers who are (1) packing houses that pack only whole fruits or whole vegetables, and associated cold storage on the same Premises as the packing houses; (2) cotton gins; (3) nut hulling and shelling operations; or (4) producing unflavored fluid milk fit for human consumption by way of pasteurization, homogenization, vitaminization or fat standardization must sign an Affidavit Regarding Eligibility for Agricultural Power Service, Form 14-927, to qualify for this Schedule.

   c. Excluding individual water agency accounts, Customers taking service under this Schedule for General Water or Sewerage Pumping must sign an Affidavit Regarding Eligibility for General Water and Sewerage Pumping Service, Form 14-946, to qualify for this Schedule. (L)

(Continued)

Schedule TOU-PA-3 Sheet 12
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

4. Critical Peak Pricing: Critical Peak Pricing (CPP) is an event-based pricing option which provides bill credits in the summer season from 4:00 p.m. to 9:00 p.m. during the CPP Non-Event Demand Credit Periods and incremental bill charges for load served by SCE during the CPP Event Charge Periods. No CPP credits will be provided for exported generation, i.e., energy produced and exported by the Customer's Generating Facility during CPP Non-Event Credit Periods.

   a. CPP Events: SCE may, at its discretion, call a CPP Event any non-holiday weekday. CPP Events will be called based on any one of the following criteria:

      (1) California Independent System Operator (CAISO) Energy Emergency Alert (EEA) Watch Notice,
      (2) Forecasts of SCE system emergencies – may be declared at the generation, transmission, or distribution circuit level
      (3) Forecasts of extreme or unusual temperature conditions impacting system demand
      (4) Day-ahead load and/or price forecasts

   b. Customers enrolled in a CPP Option under another Schedule who are moved to this Schedule due to a permanent change in operating conditions and have a change in their Maximum Demand will be enrolled in Option D-CPP or B-CPP of this Schedule as applicable or may elect another applicable Option.

   c. Number of CPP Events: There will be a minimum of 12 CPP events and a maximum of 15 CPP Events per calendar year.

   d. Notification of a CPP Event: SCE will notify customers of a CPP Event via SCE's notification system. Customers are responsible for providing SCE with contact information consisting of a telephone number, electronic mail address, and/or SMS text number for notification of Events. Customers are responsible for updating customer contact information as necessary. SCE will begin to notify customers no later than 3:00 p.m. the business day before a CPP Event. Customers are responsible for all charges incurred during a CPP Event, even if notice is not received. Customers who fail to provide the necessary contact information prior to CPP Events are responsible for all charges incurred during CPP Events.

   e. Participation in other Programs: Only Bundled Service Customers shall be served under CPP of this Schedule. Direct Access, Community Aggregation, and Community Choice Aggregation Service Customers are ineligible for CPP. CPP Customers served under this Schedule are eligible for Schedule NBT, Net Billing Tariff or Net Energy Metering Schedules. CPP Customers served under this Schedule are not eligible for service under Option A, Option E, Option E 5TO8, of this Schedule. (T)

(Continued)

Schedule TOU-PA-3 Sheet 13
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

4. Critical Peak Pricing: (Continued)

e. Participation in other Programs: (Continued)

Only Customers dually participating in Option with CPP of this Schedule and another demand response programs prior to October 26, 2018 are grandfathered to continue the existing dual participation. All other Customers served under Option with CPP of this Schedule are not eligible to dually enroll in any demand response program offered by SCE or any third-party administered demand response program.

For CPP Customers grandfathered to continue to dually participate with another demand response program, the sum of credits provided by the dual participating demand response program and Options with CPP of this Schedule will be capped, if applicable. The capped credit amount, also known as the Maximum Available Credit, is listed in the applicable CPP Option of this Schedule. These grandfathered Customers are capped at the megawatt level as of December 10, 2018.

f. Bill Protection: The purpose of Bill Protection is to ensure, that a Customer served on Option D-CPP or Option B-CPP is billed an amount no greater than what the Customer would otherwise be billed under the applicable Option D or Option B of this Schedule, up to the first 12 months of service on CPP.

(1) A Customer served on Option D-CPP or Option B-CPP will receive a one-time Bill Protection credit for the positive sum, if any, in total CPP Event Energy Charges and total Summer CPP Non-Event Credits as calculated under the applicable CPP Option, and as measured over a period of up to 12 months from the date the Customer is defaulted to or elects CPP Option.

(2) If a Customer elects another Option without CPP within the first 12 months of participating on CPP, Bill Protection will end on the Customer's next regularly scheduled billing date. (N) | (N)

(Continued)

Schedule TOU-PA-3 Sheet 14
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

5. Maximum Demand: Maximum demand shall be established for all applicable TOU Periods. The Maximum Demand for each TOU period shall the measured maximum average kilowatt (kW) input, indicated or recorded by instruments, such as SCE metering, during any 15-minute metered interval, but where applicable, not less than the diversified resistance welder load computed in accordance with the section designated Welder Service in Rule 2. Where the demand is intermittent or subject to violent fluctuations, a 5-minute interval may be used.

6. Billing Demand: The Billing Demand shall be the kilowatts (kW) of Maximum Demand, determined to the nearest kW. When applicable, the Time Related Demand (TRD) component shall be for the kW of Maximum Demand recorded during (or established for) each of the TOU periods, as applicable according to the Customers Option. The Facilities Related Demand (FRD) component shall be for the kW of Maximum Demand recorded during (or established for) the monthly billing period. (D)

7. Power Factor Adjustment: The customer's bill will be increased each month for power factor by the amount shown in the Rates section above for service metered and delivered at the applicable voltage level, based on the per kilovar of maximum reactive demand imposed by SCE.

   The maximum reactive demand shall be the highest measured maximum average kilovar demand indicated or recorded by metering during any 15 minute metered interval in the month. The kilovars shall be determined to the nearest unit. A device will be installed on each kilovar meter to prevent reverse operation of the meter.

8. Voltage Discount: Bundled Service, CCA Service, and Direct Access customers will have the Distribution rate component of the applicable Delivery Service charges reduced by the corresponding Voltage Discount amount for service metered and delivered at the applicable voltage level as shown in the RATES section above. In addition, Bundled Service Customers will have the Utility Generation (UG) rate component of the applicable Generation charges reduced by the corresponding Voltage Discount amount for service metered and delivered at the applicable voltage level as shown in the RATES section.

Schedule TOU-PA-3 Sheet 15 (T)
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

9. Temporary Discontinuance of Service: Where the use of energy is seasonal or intermittent, no adjustments will be made for a temporary discontinuance of service. Any customer prior to resuming service within twelve months after such service was discontinued will be required to pay all charges which would have been billed if service had not been discontinued.

10. Customer-Owned Electrical Generating Facilities:

    a. Where customer-owned electrical generating facilities are used to meet a part or all of the customer's electrical requirements, service shall be provided concurrently under the terms and conditions of Schedule S and this Schedule. Parallel operation of such generating facilities with SCE's electrical system is permitted. A generation interconnection agreement is required for such operation.

    b. Customer-owned electrical generating facilities used solely for auxiliary, emergency, or standby purposes (auxiliary/emergency generating facilities) to serve the customer's load during a period when SCE's service is unavailable and when such load is isolated from the service of SCE are not subject to Schedule S. However, upon approval by SCE, momentary parallel operation may be permitted to allow the customer to test the auxiliary/emergency generating facilities. A Momentary Parallel Generation Contract is required for this type of service.

11. Billing Calculation: A customer's bill is calculated according to the rates and conditions above. The charges listed in the Rates section which compose of Total Delivery Service rates and Generation rates, are calculated by multiplying the Total Delivery Service Rate and the Generation rates, when applicable, by the billing determinants (e.g., per kilowatt [kW], kilowatt-hour [kWh], kiloVar [kVAR], etc.).

    The total Delivery Service Charges, which composed of the monthly customer charge, Facility-related demand charge (FRDC), Delivery Energy charges, and Power Factor Adjustment charges are calculated as followed:

    a. Monthly Customer Charge.

    b. FRDC is determined by multiplying the metered maximum kW demand by the facility-related demand charges shown in the RATES section.

    c. Delivery Energy charge is determined by multiplying the total kWh consumption by the energy charges shown in the RATES section.

    d. Power Factor Adjustment charge is determined by multiplying the billing kVAR demand by the kVAR charges shown in the RATES section.

(Continued)

Schedule TOU-PA-3 Sheet 16
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

11. Billing Calculation: (Continued)

The Generation Charges, which composed of the Generation kW demand and energy charges by Time-of-used (TOU) periods are calculated as followed:

a. Generation kW demand Charge is determined by multiplying the metered TOU kW demand by the Generation Time-related demand charges shown in the RATES section.

b. Generation Energy charge is determined by multiplying the total TOU kWh consumption by the energy charges shown in the RATES section.

c. Bundled Service Customers receive Delivery Service and Generation from SCE. The customer's bill is the sum of the charges for Delivery Service and Gen determined, as described in this Special Condition, and subject to applicable discounts or adjustments provided under SCE's tariff schedules.

d. Direct Access Customers receive Delivery Service from SCE and purchase energy from an Energy Service Provider. The customer's bill is the sum of the charges for Delivery Service determined as described in this Special Condition except that the DWRBC rate component is subtracted from the Total Delivery Service rates before the billing determinants are multiplied by such resulting Total rates; plus the applicable charges as shown in Schedule DA-CRS and subject to applicable discounts or adjustments provided under SCE's tariff schedules.

e. CCA Service Customers receive Delivery Service from SCE and purchase energy from their Community Choice Aggregator (CCA). SCE will read the meters and present the bill for both Delivery and Generation Services to the CCA Service Customer. The customer's bill is the sum of the charges for Delivery Service as displayed in this Rate Schedule and Generation charges determined by the CCA plus the applicable charges as shown in Schedule CCA-CRS, and subject to applicable discounts or adjustments provided under SCE's tariff schedules.

12. Optimal Billing Period Service: This Special Condition provides for the voluntary use of an Optimal Billing Period (OBP) which allows for a Customer's billing cycle(s) to coincide with the Customer's high seasonal production cycle. The Customer designates the OBP by selecting a specific month and day for the start of the OBP and a specific month and day for the end of the OBP. The start and end dates must fall within the customer's high seasonal production cycle. In no event shall any revised billing period exceed 45 days or be less than 15 days. (N)

To qualify for this option, the duration of the Customer's high seasonal production cycle must be 6 months or less, and the average of the Customer's monthly maximum demand during its OBP must be at least double the average of its monthly maximum demand during its non-OBP period. Customers may not discontinue this option before the end date of their OBP. (N)

(Continued)

Schedule TOU-PA-3 Sheet 17
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

12. Optimal Billing Period Service: (Continued) (N)

Prior to receiving OBP service, the customer shall sign the "Optimal Billing Period Service Agreement," Form No. 14-689 and pay an OBP fee of $160.00 per meter. To continue service under this Special Condition the Customer must sign a new OBP Service Agreement and pay the OBP fee each year. (N)

13. Customers with Service Metered and Delivered at Voltages above 50 kV (Sub-transmission customers) Included in Rotating Outages. (T)

Sub-transmission customers, except for those customers exempt from rotating outages, are to be included in controlled, rotating outages when required by the California Independent System Operator (CAISO) and/or SCE. To the extent feasible, SCE will coordinate rotating outages applicable to Sub-transmission customers who are fossil fuel producers and pipeline operators and users to minimize disruption to public health and safety. SCE shall not include a Sub-transmission customer in an applicable rotating outage group if the customer's inclusion would jeopardize electric system integrity. Sub-transmission customers who are not exempt from rotating outages, and seek such exemption, may submit an Optional Binding Mandatory Curtailment (OBMC) Plan to SCE in accordance with Schedule OBMC. If SCE approves a customer's OBMC Plan, the customer will become exempt from rotating outages and will be subject to the terms and conditions of Schedule OBMC and its associated contract.

Non-exempt Sub-transmission customers shall be required to drop their entire electrical load during applicable rotating outages by either (1) implementing the load reduction on their own initiative, in accordance with subsection a, below; or (2) having SCE implement the load reduction through remote-controlled load drop equipment (control equipment) in accordance with subsection b, below. A Sub-transmission customer shall normally be subject to the provisions of subsection a. If SCE approves a customer's request to have SCE implement the load reduction or if the customer does not comply with prior required load reductions, as specified in subsection c, the customer will be subject to the provisions of subsection b.

Schedule TOU-PA-3 Sheet 18
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

13. Customers with Service Metered and Delivered at Voltages above 50 kV (Sub-transmission customers) Included in Rotating Outages. (Continued) (T)

a. Customer-Implemented Load Reduction:

(1) Notification of Required Load Reduction. At the direction of the CAISO or when SCE otherwise determines there is a need for Rotating Outage, SCE shall notify each Sub-transmission customer in an affected rotating outage group to drop its entire load. Within 30 minutes of such notification, the customer must drop its entire load. The customer shall not return the dropped load to service until 90 minutes after SCE sent the notification to the customer to drop its load, unless SCE notifies the customer that it may return its load to service prior to the expiration of the 90 minutes.

(2) Method of Notification. The method in which SCE will notify Sub-transmission customers, who are required to implement their own load reduction, includes email, phone, and/or text message. The customer is responsible for providing SCE their designated contact(s) information and preferred method for notifications. Customers must ensure the notification delivery method is functional at all times and are responsible for their charges incurred with the notification delivery service. Failure to provide at least one functional notification contact may result in Excess Energy Charges. When SCE sends the notification to the designated contact(s) the customer is responsible for dropping its entire load in accordance with subsection a., above.

(3) Excess Energy Charges. If a Sub-transmission customer fails to drop its entire load within 30 minutes of notification by SCE, and/or fails to maintain the entire load drop until 90 minutes after the time notification was sent to the customer, unless SCE otherwise notified the customer that it may return its load to service earlier in accordance with subsection a. (1) above, SCE shall assess Excess Energy Charges of $6 per kWh for all kWh usage in excess of the Authorized Residual Ancillary Load. Such charges will be based on the total kWh usage during the applicable rotating outage penalty period, less the product of Authorized Residual Ancillary Load in kW and the applicable rotating outage penalty period in hours. Excess Energy Charges will be determined and applied by SCE subsequent to the Sub-transmission customer's regularly scheduled meter read date following the applicable rotating outage.

(4) Authorized Residual Ancillary Load. Authorized Residual Ancillary Load is load that is deemed to be equivalent to five percent of the Sub-transmission customer's prior billing month's recorded Maximum Demand. This minimum load level is used as a proxy to allow for no-load transformer losses and/or load attributed to minimum grid parallel operation for generators connected under Rule 21.

AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

13. Customers with Service Metered and Delivered at Voltages above 50 kV (Sub-transmission customers) Included in Rotating Outages. (Continued) (T)

b. SCE-Implemented Load Reduction.

Non-exempt Sub-transmission customers may request, in writing, to have SCE drop the customer's entire load during all applicable rotating outages using SCE's remote-controlled load drop equipment (control equipment). If SCE agrees to such arrangement, SCE will implement the load drop by using one of the following methods:

(1) Control Equipment Installed. For a Sub-transmission customer whose load can be dropped by SCE's existing control equipment, SCE will implement the load drop during a rotating outage applicable to the customer. The customer will not be subject to the Notification and Excess Energy Charge provisions set forth in subsection a, above.

(2) Control Equipment Pending Installation. For a Sub-transmission customer whose load can not be dropped by SCE's existing control equipment, the customer must request the installation of such equipment at the customer's expense in accordance with SCE's Rule 2, Section H, Added Facilities. Pending the installation of the control equipment, the customer will be responsible for dropping load in accordance with the provisions of subsection a, above, including the Notification and Excess Energy Charge provisions.

c. Non-compliance: A non-exempt Sub-transmission customer subject to subsection a, above, who fails to drop load during three rotating outages in a three year period to a demand level of 20% or less of the customer's prior billing month's recorded Maximum Demand averaged over the applicable rotating outage period, is not in compliance with this tariff. The three year period shall commence with the first failure to drop load as specified in this subsection. A customer not in compliance with this condition will be placed at the top of the Sub-transmission customer rotating outage group list and will be expected to comply with subsequent applicable rotating outages. In addition, the customer must select one of the two options below within fifteen days after receiving written notice of non-compliance from SCE. A customer failing to make a selection within the specified time frame will be subject to subsection c. (2) below.

(1) Subject to Schedule OBMC: The customer shall submit an OBMC Plan, in accordance with Schedule OBMC, within 30 calendar days of receiving written notice of non-compliance from SCE. Pending the submittal of the OBMC Plan by the customer and pending the review and acceptance of the OBMC Plan by SCE, the customer will remain responsible for dropping load in accordance with the provisions of subsection a, above, including the Notification and Excess Energy charge provisions. If the customer fails to submit an OBMC Plan within 30 days of receiving notice of non-compliance from SCE, or if the customer's OBMC Plan is not approved by SCE, or if the customer fails to meet the requirements of Schedule OBMC once the OBMC Plan is approved, the customer shall be subject subsection c. (2), below.

TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

13. Customers with Service Metered and Delivered at Voltages above 50 kV (Sub-transmission customers) Included in Rotating Outages. (Continued) (T)

c. Non-compliance: (Continued)

(2) Installation of Control Equipment. The customer shall be subject to the installation of control equipment at the customer's expense in accordance with SCE's Rule 2, Section H, Added Facilities, if such equipment is not currently installed. If such switching capability is installed, SCE will drop the customer's load for all applicable subsequent rotating outages in accordance with the provisions of subsection b, above. Pending the installation of control equipment, the customer will remain responsible for dropping load in accordance with the provisions of subsection a, above, including the Notification and Excess Energy Charge provisions.

d. Net-Generators

Sub-transmission customers who are also net-generators are normally exempt from rotating outages, but they must be net suppliers of power to the grid during all rotating outages. For the purpose of this Special Condition, a net-generator is an SCE customer who operates an electric generating facility as part of its industrial or commercial process, and the generating facility normally produces more electrical power than is consumed in the industrial or commercial process, with the excess power supplied to the grid. Sub-transmission customers whose primary business purpose is to generate power are not included in this Special Condition.

(1) Notification of Rotating Outages. SCE will notify sub-transmission customers who are net-generators of all rotating outages applicable to customers within SCE's service territory. Within 30 minutes of notification, the customer must ensure it is a net supplier of power to the grid throughout the entire rotating outage period. Failure to do so will result in the customer losing its exemption from rotating outages, and the customer will be subject to Excess Energy Charges, as provided below.

(2) Excess Energy Charges. Net generators who are not net suppliers to the grid during each rotating outage period will be subject to Excess Energy Charges of $6 per kWh for all kWh usage in excess of the Authorized Residual Ancillary Load. Such charges will be based on the total kWh usage during a rotating outage penalty period, less the product of Authorized Residual Ancillary Load in kW and the applicable rotating outage period hours. Excess Energy Charges will be determined and applied by SCE subsequent to the customer's regularly scheduled meter read date following the applicable rotating outage. Excess Energy Charges shall not apply during periods of verifiable scheduled generator maintenance or if the customer's generator suffers a verifiable forced outage. The scheduled maintenance must be approved in advance by either the CAISO or SCE, but approval may not be unreasonably withheld.

SPECIAL CONDITIONS (Continued)

14. Discontinued TOU Period : Pursuant to D.17-01-006 and D.17-10-018, behind-the-meter (BTM) solar Customers who meet the eligibility criteria described below are eligible to continue receiving service on a TOU Option with Discontinued TOU Periods for the Duration outlined below. (T)

a. Customer Eligibility:

(1) Customers, excluding public agencies (as defined below), must have submitted their initial solar Generating Facility interconnection application by January 31, 2017.

(2) Customers meeting the definition of a public agency must have submitted their initial Generating Facility interconnection application by December 31, 2017. For the purposes of this Special Condition only, public agencies are defined as public schools, colleges and universities; federal, state, county and city government agencies; municipal utilities; public water and/or sanitation agencies; and joint powers authorities.

b. System Eligibility:

(1) This provision is only applicable to behind-the-meter solar Generating Facilities.

(2) The solar Generating Facility must have been designed to offset at least 15 percent of the Customer's current annual load, as determined by SCE.

c. Duration:

(1) Customers are permitted to be served on a TOU Options with Discontinued TOU periods and be billed under the Discontinued TOU Periods for a period of ten years from their solar Generating Facility's original permission to operate date.

(2) In no event shall the duration of this Discontinued TOU Period extend beyond July 31, 2027 (December 31, 2027 for schools) for any Customer served on this Schedule, regardless of whether the Customer has received the full ten years of Discontinued TOU Period. Customers will be transitioned to Options with current TOU Periods at the start of their next billing period that occurs immediately on or after October 1 (Annual Migration Date), as outlined in Advice 3582-E-A. (as approved in Resolution E-4946).

(3) Customers that elect a Change of Rate Schedule to Option D, Option D-CPP, Option E, or another applicable Rate Schedule with updated TOU Periods, will no longer be eligible to return to an Option with Discontinued TOU Periods.

(Continued)

Schedule TOU-PA-3 Sheet 22
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

15. Discontinued TOU Period : (Continued) (T)

d. Attributes:
The Discontinued TOU Period described herein allows the Customer to maintain Discontinued TOU Periods for the duration. Other changes in rate design, including allocating marginal costs to TOU periods and setting specific rate levels, will be litigated in utility-specific rate proceedings.

e. Discontinued TOU Periods: Applicable rate time periods are defined as follows:

TOU Period	Weekdays		Weekends and Holidays	
	Summer	Winter	Summer	Winter
On-Peak	12 p.m. - 6 p.m.	N/A	N/A	N/A
Mid-Peak	6 p.m. – 11 p.m. 8 a.m. – 12 p.m.	8 a.m. – 9 p.m.	N/A	N/A
Off-Peak	11 p.m. - 8 a.m.	9 p.m. - 8 a.m.	All other hours	All other hours
CPP Event Period	4 p.m. - 9 p.m.	4 p.m. - 9 p.m.	4 p.m. - 9 p.m.	4 p.m. - 9 p.m.

Holidays are New Year's Day (January 1), Presidents' Day (third Monday in February), Memorial Day (last Monday in May), Independence Day (July 4), Labor Day (first Monday in September), Veterans Day (November 11), Thanksgiving Day (fourth Thursday in November), and Christmas (December 25).

When any holiday listed above falls on Sunday, the following Monday will be recognized as a holiday. No change will be made for holidays falling on Saturday. The Summer Season shall commence at 12:00 a.m. on June 1 and continue until 12:00 a.m. on October 1 of each year. The Winter Season shall commence at 12:00 a.m. on October 1 of each year and continue until 12:00 a.m. on June 1 of the following year.

16. Discontinuance of Super Off-Peak (SOP) : Alternate Rate Options for Eligible SOP Customers: (T)

a. Customer Eligibility:

To be eligible for the alternate options described in this Special Condition, Eligible SOP Customers must have been served on a TOU-PA-SOP rates as of August 3, 2018 (e.g., former Schedules TOU-PA-2-SOP, TOU-PA-3-SOP).

b. Alternate Options:
Eligible SOP Customers have the option of receiving service on Option A or Option B of this Schedule. Absent an election of another applicable Option, Eligible SOP Customers will be defaulted to Option A.

(Continued)

Schedule TOU-PA-3 Sheet 23
TIME-OF-USE
AGRICULTURAL AND PUMPING - LARGE

SPECIAL CONDITIONS (Continued)

16. Discontinuance of Super Off-Peak (SOP) : Alternate Rate Options for Eligible SOP Customers: (T)
(Continued)

c. Duration:

(1) Eligible SOP Customers who do not meet the eligibility requirements of Special Condition 15 are eligible to be served on Option A or Option B available under this Special Condition until the implementation of a final decision addressing new Agricultural and Pumping Options in SCE's 2021 GRC Phase 2.

(2) Eligible SOP Customers who do meet the eligibility requirements of Special Condition 14 are eligible to be served on Options with Discontinued TOU Periods available under this Special Condition based on the duration specified in Special Condition 14. (T)

(3) Customers that elect a Change of Rate Schedule to Option D, Option D-Critical Peak Pricing (CPP), Option D-5TO8, Option D-5TO8-CPP, Option E, Option E-5TO8, or another applicable Rate Schedule with updated TOU Periods, will no longer be eligible to return to an Option with Discontinued TOU Periods. (T)

d. Separate Service Connections or Meters:

Eligible SOP Customers are permitted to retain and continue receiving service on the additional service connection and/or meter that was previously allowed and installed under the TOU-PA-SOP Schedules.

17. PCIA Recovery in Bundled Generation Rates: Bundled Service Customer Generation charges include an amount to recover the above-market portion of SCE's generation portfolio. 'Above market' refers to the difference between what the utility pays for electric generation and current market prices for the sale of those resources. This above-market portion is referred to as the Power Charge Indifference Adjustment (PCIA) amount and is shown on Bundled Service Customers' bills under the description of the Generation charge.

18. Fixed Recovery Charge. SCE has been permitted to issue bonds that enable it to recover more quickly certain costs related to preventing and mitigating catastrophic wildfires, while reducing the total cost to its customers. The Fixed Recovery Charge (FRC) has been approved by the CPUC to repay those bonds. The right to recover the FRC has been transferred to a separate entity (called the Special Purpose Entity) that issued the bonds and recovery does not belong to SCE. SCE is collecting the FRC on behalf of the Special Purpose Entity.
