For Non-continuous DA Customers, the Vintaged DA-CRS is comprised of the following components: 1) DWR Bond Charge as shown on Schedule DWR-BC[2] 2) Ongoing Competition Transition Charge (CTC) as shown on the customer's otherwise applicable rate schedule, and 3) DWR Power Charge Indifference Adjustment (PCIA)[1], formerly the DWR Power Charge.

   For example, for Non-continuous DA Customers,

   Applicable DA-CRS = DWR-BC[2] + CTC + Applicable PCIA

b. For New Non-continuous DA Customers, the Vintaged DA-CRS is comprised of the following components: 1) DWR Bond Charge as shown on Schedule DWR-BC 2) Ongoing Competition Transition Charge (CTC) as shown on the customer's otherwise applicable rate schedule, and 3) DWR Power Charge Indifference Adjustment (PCIA), applicable to New Non-continuous DA customers as:

The applicable vintaged rate shall be determined by the date of the customer's 6-month notice to switch to DA Service. Customers whose 6-month notice is provided on or after January 1st and before July 1st shall be billed the vintaged rate for the prior year. Customers whose 6-month notice is provided on or after July 1st and before January 1st shall be billed the vintaged rate for the current year.

---

1 The Power Charge Indifference Adjustment or "PCIA" is calculated by subtracting the ongoing CTC differentiated by class from the Utility's above or below market total portfolio power costs. If the PCIA is positive then Direct Access and Departing Load customers are responsible for the balance. If the PCIA is negative then the balance is tracked by the Utility and used to offset future above market costs. The Utility's total portfolio power costs consist of its retained generation power costs and the Utility's allocated DWR power costs compared to the approved market price benchmark.
2. DWR-BC as presented is now used for collecting the California Wildfire Fund Charge effective Oct 1, 2020 (See Schedule WF – NBC). DWR BC will be renamed at implementation of SDG&E's new customer information system. L
