SCHEDULE E-DRP

DEMAND RESPONSE PROVIDER SERVICES

APPLICABILITY

This schedule applies to any Customer, or Demand Response Provider (DRP) acting on their behalf, who requests SDG&E to render the following services below to facilitate their involvement in Direct Participation, as detailed in Electric Rule 32.

TERRITORY

Within the entire territory served by the Utility.

RATES

If SDG&E performs any metering service for a Customer or DRP pursuant to Rule 32, the following charges shall apply to the requesting party:

1. Interval Meter — Cost

2. Per-Event Metering Service Charges:

   a. Metering Service Base Charge, per meter: $0.75

      This charge is incurred when SDG&E goes to the meter to perform all Rule 32 related metering service activity(ies) except the remote programming of a smart meter. SDG&E Meter Service Charges listed below that are incurred while SDG&E is at the meter are added to this Metering Service Base Charge.

3. Metering Service Charges:

   a. Meter Installation, per meter:

Singlephase Residential	$63.30
Singlephase Commercial	$87.17
Polyphase All Classes	$90.99

      This charge is incurred each time SDG&E installs an interval meter. This rate includes costs for the installation of the interval meter. This service does not include the interval meter cost, metering transformer material and installation cost, telecommunications or mitigation equipment, installation or service costs. Meter removal, testing, and programming charges, described below, would also be charged for a typical meter installation.

   b. Meter Removal, per meter:

Singlephase Residential	$56.61
Singlephase Commercial	$79.89
Polyphase All Classes	$79.40

      This charge is incurred each time SDG&E removes an interval meter or a meter to be replaced by the interval meter. It includes costs for removal and processing of the existing meter.

3. Metering Service Charges: (Continued)

c. Meter Test, per meter:

Singlephase Residential	$64.30
Singlephase Commercial	$106.17
Polyphase All Classes	$109.87

This charge is incurred when SDG&E tests the interval meter. (At the request of the customer only)

d. Meter Programming (On-site), per meter:

Singlephase Residential	$72.03
Singlephase Commercial	$72.03
Polyphase All Classes	$72.03

This charge is incurred when SDG&E programs or reprograms the interval meter during a site visit.

e. Meter Programming (Remote), per meter:

Singlephase Residential	$9.68
Singlephase Commercial	$10.37
Polyphase All Classes	$8.99

This charge is incurred when SDG&E reprograms a smart meter remotely.

f. Meter Battery Change, per meter:

Singlephase Residential	$60.96
Singlephase Commercial	$80.38
Polyphase All Classes	$80.38

This charge is incurred when SDG&E replaces the interval meter battery.

g. Meter Read, per meter:

Singlephase Residential	$58.10
Singlephase Commercial	$58.10
Polyphase All Classes	$58.10

Should the meter be unable to communicate remotely to SDG&E's back office systems, this charge is incurred each time SDG&E locally retrieves the electric interval usage data from a meter during a site visit. If a network mitigation device is necessary to enable communications, the Customer, or Demand Response Provider (DRP) acting on their behalf, will allow it to be installed as required.

SCHEDULE E-DRP

DEMAND RESPONSE PROVIDER SERVICES

RATES (Continued)

3. Metering Service Charges: (Continued)

h. Meter Read, per high-end meter (e.g. L+G MaxSYS):

Singlephase Residential	$N/A
Singlephase Commercial	$N/A
Polyphase All Classes	$92.92

Should the high-end meter stop communicating remotely to SDG&E's back office systems, this charge is incurred each time SDG&E locally retrieves the electric interval usage data from a meter during a site visit.

i. Metering Inspection, per meter:

Singlephase Residential	$72.03
Singlephase Commercial	$72.03
Polyphase All Classes	$72.03

This charge is incurred each time SDG&E inspects the interval metering facility beyond what is required by its normal business practices.

j. Metering Services Hourly Labor Rate:

Singlephase Residential	$50.16
Singlephase Commercial	$74.02
Polyphase All Classes	$74.02

Metering services performed by SDG&E which are not covered by the above service charges or any other SDG&E fees or contracts will be charged this hourly rate, plus the Metering Service Base Charge described above, plus materials costs.

4. Application of Per-Event Metering Service Charges:

When SDG&E performs any of the above services, the Metering Service Base Charge and applicable service charge(s) apply. For example, if an interval meter malfunction requires repair and testing of the meter, the requesting party would incur the Metering Service Base Charge, Metering Services Hourly Labor Rate for troubleshooting, and the Meter Test Charge. The Metering Service Base Charge does not apply to SDG&E's remote programming of its' smart meter.

Once the requesting party has communicated to SDG&E that the interval meter site is ready for interval meter installation, if the interval meter site is not prepared at the time SDG&E attempts to perform the interval meter installation, the requesting party will be charged the Metering Service Base Charge and the Metering Inspection Charge.

If conditions at the customer's meter site require an exceptional amount of material and/or time to perform meter services, the requesting party will be charged for the additional material cost and the Metering Services Hourly Labor Rate for the additional time.
