Schedule EV-HP

Electric Vehicle High Power Rate

APPLICABILITY

This Schedule is optionally available to non-residential separately metered service to support charging of Electric Vehicles (EV), as defined in Special Condition 2, whose Monthly Maximum Demand equals, exceeds, or is expected to equal or exceed 20 kilowatts (kW). Schedule EVHP replaces the traditional maximum demand charge with a subscription charge billed monthly based on the customer's subscription level.

Transmission voltage customers are eligible for enrollment on the Schedule EV-HP primary rate.

TERRITORY

Within the entire territory served by the Utility.

SUBSCRIPTION CHARGE

Customers taking service on Schedule EV-HP will select their preferred kW subscription level. The customer's maximum demand should not exceed their subscription level. If the maximum demand exceeds the subscription level, the subscription level will be increased (see Special Conditions 5). The customer shall pay a monthly subscription charge based on their subscription level. T T

Phase-in Recovery of Total Distribution and Generation Costs: Per Commission Decision (D.) 20-12-023, EV-HP customers only paid marginal (incremental) distribution and generation costs during the first three years that the EV-HP rate was available (2022-2024). The decision adopted an 8-year phase-in (2025-2032) recovery of the allocated total distribution and generation costs to serve EV-HP customers. In 2032 EV-HP customers will be paying the full EV-HP allocated total distribution and generation costs. (D.20-12-023, Conclusions of Law 7 and 9).

Rates (Continued)

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of $(0.00304) per kWh and the Transmission Access Charge Balancing Account Adjustment (TACBAA) of $(0.00993) per kWh. PPP Energy charges includes Low Income PPP rate (LI-PPP) $0.01175/kWh, and Non-low Income PPP rate (Non-LI-PPP) $0.00649/kWh. R

Rate Components

The rates shown above are comprised of the following components:

1. The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Ongoing Competition Transition Charges (CTC), (6) Local Generation Charge (LGC), (7) Reliability Services (RS), and (8) Total Rate Adjustment Component (TRAC).

2. Utility Distribution Company (UDC) Total Rate shown above excludes any applicable commodity charges associated with Schedule EECC (Electric Energy Commodity Cost), Schedule WF-NBC (Wildfire Fund Non-Bypassable Charge) and Schedule DWR-BC (Department of Water Resources Bond Charge).

Certain Direct Access customers are exempt from the TRAC, as defined in Rule 1 – Definitions

Electric Vehicle High Power Rate

Time Periods

All time periods listed are applicable to local time. The definition of time will be based on the date service is rendered.

TOU Period	Weekdays		Weekends and Holidays	
	Summer	Winter	Summer	Winter
On-Peak	4 PM – 9 PM	4 PM – 9 PM	4 PM – 9 PM	4 PM – 9 PM
Off-Peak	All other hours	All other hours	All other hours	All other hours
Super Off-Peak	Midnight – 6AM; 10 AM – 2 PM	Midnight – 6AM; 10 AM – 2 PM	Midnight – 2 PM	Midnight – 2 PM

T T

Seasons

Summer June 1 – October 31
Winter November 1 – May 31

Energy will be billed on the basis of the time period and season in which the usage occurred.

Taxes and Franchise Fee Differential

A Franchise Fee Differential of 5.78% will be applied to the monthly billings calculated under this Schedule for all customers charging their vehicle within the corporate limits of the City of San Diego. This Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

Schedule EV-HP

Electric Vehicle High Power Rate

SPECIAL CONDITIONS

1. Definitions: The Definitions of terms used in this Schedule are found either herein or in Rule 1.

2. Electric Vehicle: An electric vehicle is any vehicle that utilizes electricity from external sources of electrical power, including the grid, for all or part of vehicles, vessels, trains, boats, or other equipment (e.g., aircraft, forklifts, port equipment) that are mobile sources of air pollution and greenhouse gases.

3. Metering: Schedule EV-HP is open to separately-metered EV load only. Should the California Public Utilities Commission approve a submetering protocol, submetered EV loads that comply with a said submetering proposal shall be eligible for Schedule EV-HP.

   Per Decision (D). 22-08-024, where electricity is furnished for EV charging, a customer may use the EV Supply Equipment as a submeter to measure EV charge load provided it meets the requirements established in the Plug-In Electric Vehicle Submetering Protocol Attachment A to D. 22-08-024. N N N N

4. Subscription Charge: The subscription charge shall consist of increments of 10 kW for customers with maximum demand less than or equal to 150 kW and 25 kW for customers with maximum demand greater than 150 kW. The subscribed power level can be altered once per month.

5. Overages: If the customer's maximum demand exceeds their subscription level for three consecutive months SDG&E will increase the subscription level to a level commensurate with the customer's highest maximum demand within the past three consecutive months. The customer must remain at this subscription level for an additional three months. If the customer's maximum demand exceeds their subscription level for six months in the rolling twelve-month period, their subscription level will be immediately increased consistent with their maximum demand in this rolling twelve-month period. The customer must remain at this subscription level for three consecutive months before they have the option to lower their subscription level.

6. Incidental Load: An exception to the requirement that eligible meters are to be dedicated exclusively to EV charging is that applications and apparatus that solely serve the overall EV infrastructure of the site and no other use may be included as load on an EV-dedicated meter. The added load included on the EV meter must not include load from any non-EV charging infrastructure facilities, appliances of apparatus.

7. Voltage: Service under this Schedule will be supplied at the standard available Voltage in accordance with Rule 2.

8. Voltage Regulators: Voltage Regulators, if required by the customer, shall be furnished, installed, owned, and maintained by the customer.

Schedule EV-HP

Electric Vehicle High Power Rate

SPECIAL CONDITIONS (Continued)

9. Parallel Generation Limitation: This schedule is not applicable to standby, auxiliary service or service operated in parallel with a customer's generating plant, except as specified in Rule 1 under the definition of Parallel Generation Limitation.

10. Voltage Discount: A voltage discount is available for Primary Voltage under this schedule.

11. Basic Service Fee Determination: The basic service fee will be determined each month based on the customer's Maximum Annual Demand.

12. Billing: A customer's bill is first calculated according to the total rates and conditions listed above. The following adjustments are made depending on the option applicable to the customer:

    a. UDC Bundled Service Customers receive supply and delivery services solely from the Utility. The customer's bill is based on the Total Rates set forth above. The EECC component is determined by multiplying the applicable EECC price for this schedule during the last month by the customer's total usage.

    b. Direct Access (DA) and Community Choice Aggregation (CCA) Customers purchase energy from a non-utility provider (ESP) and continue to receive delivery services from the Utility. The bills for a DA and CCA Customer will be calculated as if they were a UDC Bundled Service Customer, then crediting the bill by the amount of the EECC component, as determined for a UDC Bundled Customer, and including the appropriate Cost Responsibility Surcharge (CRS), if applicable.

    Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

13. Terms of Optional Service: A customer receiving service under this schedule may elect to change to another applicable rate schedule, but only after receiving service on this schedule for at least 12 consecutive months. If a customer elects to discontinue service on this schedule, the customer will not be permitted to return to this schedule for a period of one year. After discontinuing and returning to service on Schedule EV-HP the customer must re-specify their subscription level. D

14. Other Applicable Tariffs: Rules 21, 23 and Schedule E-Depart apply to customers with generators.

15. Generator Operation: The operation of a non-utility generator unless expressly authorized by tariff is prohibited.
