Schedule LS-2 DS

N

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED DIMMABLE INSTALLATIONS

N

APPLICABILITY

N

Applicable for street lighting service in conjunction with an SDG&E approved street light control module and open to governmental agencies and lighting districts for the lighting of streets, highways and other thoroughfares, and to other corporate agencies for the lighting of non-dedicated streets which are accessible to the public, where the customer owns the entire installation, including underground lines from a central point of connection with utility facilities.

Customers eligible for this schedule are not eligible for Net Energy Metering (NEM) or any variation of Net Energy Metering or Virtual Net Metering (VNM).

Effective discounts or credits for California Alternative Rate for Energy (CARE) and Local Government Renewable Energy Self-Generation Bill Credit Transfer (RES-BCT) do not apply to service under Schedule LS-2 DS.

Connected Devices are not eligible for service under this schedule. Please refer to Schedule LS-2 AD for Connected Devices, also known as ancillary devices.

TERRITORY

Within the entire territory served by the Utility.

Schedule LS-2 DS

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED DIMMABLE INSTALLATIONS

Rates:

Description - LS-2 DS	Transm	Distr	PPP	ND	CTC	LGC	RS	TRAC	UDC Total
Energy Charges ($/kWh)	0.03103 R		0.00192	0.00000	(0.00001)	0.00831	0.00005	0.00000	0.04130 R

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of $(0.00304) per kWh and the Transmission Access Charge Balancing Account Adjustment (TACBAA) of $(0.00993) per kWh. PPP Energy charges include Low Income PPP rate (LI-PPP) $0.00000/kWh, and Non-low Income PPP rate (Non-LI-PPP) $0.00192/kWh.

Current Distribution Rate reflects the current distribution rate paid by the Schedule LS-2 lamp type.

Rate Components

The Total Distribution Rates ($/Month) shown above are comprised of the following distribution components: (1) Base Distribution Rate; (2) Implementation Cost Distribution Rate; and (3) O&M Cost Distribution Rate.

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Ongoing Competition Transition Charges (CTC), (6) Local Generation Charge (LGC), (7) Reliability Services (RS), and (8) the Total Rate Adjustment Component (TRAC).

Utility Distribution Company (UDC) Total Rate shown above excludes any applicable commodity charges associated with Schedule EECC, Schedule WF-NBC (Wildfire Fund Non-Bypassable Charge) and Schedule DWR-BC (Department of Water Resources Bond Charge).

Franchise Fee Differential

A Franchise Fee Differential of 5.78% shall be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

Schedule LS-2 DS

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED DIMMABLE INSTALLATIONS

SPECIAL CONDITIONS

1. Participation Payment: An $8,000.00, one time up-front fee is required to begin taking service under this schedule. The Participation Payment is non-refundable even if the customer chooses to opt out of the rate schedule with the 60-day grace period outlined in Special Condition (SC) 7 below.

2. Hours of Operation: Generally, service shall be from dusk to daylight.

3. Relocation of Facilities: Relocation of Utility's Facilities at the Customer's request or because of governmental requirements shall be made providing the Customer pays the actual costs incurred by the utility for such relocation.

4. Shut-off for Non-Payment: If a Customer's street lights are shut off due to non-payment of the monthly energy bill, Customer shall be subject to a turn-on fee of $10.00 per light, with a minimum charge of $50.00. This fee is in addition to the Service Re-Establishment Fee and normal credit deposits.

5. Dimmable Service Requirements: To be eligible for service under this schedule, the street light installation must include a control device (herein referred to as "node") that is approved by the Utility for the specific purpose of revenue-grade metering applications. The node must comply with SDG&E's metering specifications. Additionally, customers electing to take service under this schedule must provide and accept the following:

    a. Data Send/Receive: Consumption data, defined as register reads and/or intervals, must be sent to the Utility no later than 3 a.m. the day following the recorded usage. If data is received later than this time, the Utility shall estimate consumption to fill in the missing data as described in 5(d) below.

    b. Initial Dimmable Inventory Setup/Establishment: Customer shall submit to the Utility, inventory data that consists of Customer control module identification and required inventory information. This includes, but is not limited to, meter accuracy testing results and node manufacturing information. The required fields and their format are subject to change by the Utility.

L

Schedule LS-2 DS

LIGHTING - STREET AND HIGHWAY - CUSTOMER-OWNED DIMMABLE INSTALLATIONS

SPECIAL CONDITIONS (CONTINUED) L

c. Dimmable Inventory: Inventory data fields and format are to be determined by the Utility Street Light Billing and are subject to change as systems often evolve. Fields and format must be sent for proper billing account establishment. Required fields include, but are not limited to, the location of the street lights, their associated meter attributes and their bulb wattage. If data does not conform to the Utility requirements, the Utility may reject the data and delay account establishment until data is corrected.

d. Missing, erroneous or otherwise unusable Usage Data: If Customer data is not received, is wholly or in part missing, erroneous, or is unusable, the Utility shall estimate usage in a manner consistent with its applicable tariff rules and shall not perform any corrective billing for missing or unusable data.

e. Control Module/Node Hardware: Only metering control modules/nodes and associated hardware that has been tested and approved by the Utility can be used under this schedule. If a node is changed out or replaced with a newer version, the newer version must be tested by the Utility before it is installed to ensure the new node complies with Utility meter specifications.

f. Node Manufacturer: Prior to installing an approved street light node, the node manufacturer must perform an accuracy test and provide the results of that test to the Utility.

g. Data Requests/Random Sampling: All meters/nodes under this schedule are subject to data requests, in full or by random sample. Requests for data or random sample must be complied with and any excessive costs for such work shall be mutually agreed upon and paid by the Customer.

h. Node Management: Customers under this rate schedule assume full responsibility for the accurate and timely submission of nodes installed under this rate schedule. The Utility is not responsible for billing on an existing street light rate should customer or third party fail to notify the Utility of meter/node changes subject to this rate.

i. Release of Liability: By dimming streetlights, the Customer releases SDG&E of any liability associated with any damages or claims that result from such dimming. It is the Customer's sole responsibility to ensure adequate lighting levels are maintained and SDG&E shall not check or validate such levels. L

(Continued)

SPECIAL CONDITIONS (CONTINUED) L

6. Billing Process: The following billing process shall be used for this schedule.

    a. Electronic Data Interface (EDI) is the preferred billing mechanism.

    b. Non-EDI customers shall be billed using summary billing.

    c. The bill shall be comprised of one bill account per pole (one or more streetlights or devices on a single pole location) with limited exceptions and only as approved by the Utility.

    d. The Utility shall bill all lights under the applicable unmetered schedule until notice that a node has been installed, has been received.

    e. Nodes temporarily or permanently removed are subject to billing using estimated consumption under Section 5.d. above until SDG&E is advised of removal.

    f. New installs, (not pre-existing and converted from unmetered), shall be billed as described in section 5.d. until Customer provides the inventory information as outlined in Section 5.b above.

7. 60 Day Transitional Period: Customer has 60 days from the time of rate transition to switch back to the previous unmetered rate, otherwise Customer is subject to Rule 12 for any changes in rate schedule. If Customer elects to return to the previous unmetered rate before the end of the transitional period, Customer must communicate this selection to the Utility through e-mail or other mutually agreed upon method.

8. Adaptive Controlled Pilot Program Termination: This tariff replaces the Adaptive Controlled Streetlight Pilot Program approved in SDG&E Advice Letter 2883-E. The pilot is terminated when this tariff takes effect.

9. Definitions:

    a. Node: A node is the device that enables a street light to be dimmed, remotely controlled, and monitored. The node is also referred to as a control module in this and other documents.

    b. Consumption Data: Streetlight register reads and/or interval-level electricity usage that captures both the streetlight load and control module load.

    c. Inventory Data: Records that clearly identify which streetlight numbers correspond to which nodes. This data is used for account maintenance functions.

    d. Connected Devices: Those remote controlled devices typically allowed by the customer for service or security reasons, e.g., cell phone repeaters, security cameras, etc L
