SCHEDULE PA-T-1

EXPERIMENTAL POWER - AGRICULTURAL - OPTIONAL TIME-OF-USE

APPLICABILITY

This is an optional schedule provided by the utility, on an experimental basis, for the purpose of evaluating time varying rates. Available to agricultural and water pumping customers whose Maximum Monthly Demand is expected to be above 500 kw and who are classified with one or more of the following North American Industry Classification (NAICS) Codes 11111-11116, 11131-11132, 11191-11194, 111191, 111199, 111211, 111219, 111331-111336, 111339, 111411, 111419, 111421, 111422, 111991-111992, 111998, 11212, 11221, 11221-11224, 11239, 11241-11242, 11291, 11299, 112111-112112, 112511-112512, 112519, 22131, or 22132. This schedule is also available to those agricultural and water pumping customers whose maximum demand is less than 500 kw who are installing or have installed facilities or procedures to reduce their annual on-peak energy consumption by 1,500 kwhrs and are also classified by the above NAICS Codes. Service under this schedule is subject to meter availability. Customers on this Schedule whose Monthly Maximum Demand is not less than 200 kW will also take commodity service on Schedule EECC-CPP-D-AG. Customers on this Schedule whose Monthly Maximum Demand is less than 200 kW must also take commodity service; their standard commodity schedule is EECC, they may optionally elect Schedule EECC-CPP-D-AG, or if they are less than 20 kW they may choose Schedule EECC-TOU-PA-P in which case their Utility Distribution Company service rate would be Schedule TOU-PA. In addition, customers may exercise the right to opt-out of the applicable dynamic rate (e.g., EECC-CPP-D-AG or EECC-TOU-PA-P) to their otherwise applicable Utility Distribution Company and commodity rates. For opt-out provisions, refer to the applicable commodity tariff.

Small Business Customers, as defined in Rule 1 and not identified by the California Air Resources Board as Emission Intensive, Trade-Exposed Entities (EITE), qualify for a semi-annual California Climate Credit of $(49.36), which will display as a separate line item per Schedule GHG-ARR.

CPUC Decision (D.)17-01-006 and D.17-10-018 permit certain eligible behind-the-meter solar customers to continue billing under grandfathered time-of-use (TOU) period definitions for a specific period of time. Customer eligibility and applicable TOU periods, rates, and conditions for TOU Period Grandfathering are defined in Special Condition 18. All terms and conditions in this Schedule apply to TOU grandfathering customers unless otherwise specified.

TERRITORY

Within the entire territory served by the Utility.

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of $(0.00304) per kWh and the Transmission Access Charge Balancing Account Adjustment (TACBAA) of $(0.00993) per kWh. R, I
PPP Energy charges includes Low Income PPP rate (LI-PPP) $0.01175/kWh, and Non-low Income PPP rate (Non-LI-PPP) $0.00495/kWh. I
R

*These rates are not applicable to TOU Period Grandfathering Eligible Customer Generators, please refer to SC 18 for applicable rates.

Minimum Charge

The minimum charge shall be the Basic Service Fee.

(Continued)

SCHEDULE PA-T-1

EXPERIMENTAL POWER - AGRICULTURAL - OPTIONAL TIME-OF-USE

Rate Components

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Ongoing Competition Transition Charges (CTC), (6) Local Generation Charge (LGC), (7) Reliability Services (RS), and (8) Total Rate Adjustment Component (TRAC).

Utility Distribution Company (UDC) Total Rate shown above excludes any applicable commodity charges associated with Schedule EECC, Schedule WF-NBC (Wildfire Fund Non-Bypassable Charge) and Schedule DWR-BC (Department of Water Resources Bond Charge).

Certain Direct Access customers are exempt from the TRAC, as defined in Rule 1 – Definitions.

Franchise Fee Differential

A Franchise Fee Differential of 5.78% will be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

Time Periods (Note: For Grandfathered TOU Periods, see SC 18)

All time periods listed are applicable to local time.

SCHEDULE PA-T-1

EXPERIMENTAL POWER - AGRICULTURAL - OPTIONAL TIME-OF-USE

SPECIAL CONDITIONS

1. Definitions: The Definitions of terms used in this schedule are found either herein or in Rule 1.

2. Voltage: Service under this schedule normally will be supplied at a standard available Voltage in accordance with Rule 2.

3. Voltage Regulators: Voltage Regulators, if required by the customer, shall be furnished, installed, owned, and maintained by the customer.

4. Reconnection Charge: Any customer resuming service within twelve months after such service was discontinued will be required to pay all charges which would have been billed if service had not been discontinued.

5. Time-of-Use (TOU) Demand Charge: The TOU Demand Charge, shall be based on the higher of the Maximum Monthly Demand measured during the On-Peak and Off-Peak time periods (i.e., Maximum Monthly Demand measured during the period 6 a.m. to Midnight Weekdays Excluding 10 a.m. to 2 p.m. in March and April Weekdays and 2 p.m. to Midnight, Weekends and Holidays) or 50% of the Maximum Annual Demand measured during the On-peak and Off-peak and time periods. D

6. Non-Coincident Demand Charge: The Non-Coincident Demand Charge shall be based on the higher of the Maximum Monthly Demand or 50% of the Maximum Annual Demand.

7. On-Peak Demand Charge: The On-Peak Period Demand Charge shall be based on the appropriate Maximum On-Peak Period Demand.

8. Power Factor: The Power Factor rate shall apply to those customers that have a Power Factor test failure and will be based on the Maximum Kilovar Billing Demand. Those customers that have a Power Factor test failure will be required to pay for the Power Factor metering that the utility will install.

9. Terms of Service. This is a voluntary schedule and a customer receiving service under this schedule may choose a desired demand charge option subject to utility approval. A customer receiving service under this schedule may elect to change to another rate schedule at any time as provided in Rule 12. A customer may change demand charge options only with consent of the utility.

10. Demand Charge Option C through F. The Demand Charge will be based on kilowatts of maximum demand as measured each month during the On-Peak Period. The Maximum Demand during the On-Peak Period shall be the average kilowatt input during the fifteen-minute interval in which the consumption of electric energy is greater than in any other fifteen-minute interval during the respective Period, as indicated or recorded by instruments installed, owned and maintained by the utility

(Continued)

SCHEDULE PA-T-1

EXPERIMENTAL POWER - AGRICULTURAL - OPTIONAL TIME-OF-USE

SPECIAL CONDITIONS (Continued) L

11. Metering and Load Signals. The utility will supply, own, and maintain all necessary meters and associated equipment utilized for billings. In addition, and for purposes of monitoring customer load, the utility may install at its expense, load research metering. The customer shall supply at no expense to the utility, a suitable location for meters and associated equipment used for billing and for load research. The customer shall pay for all costs associated with providing a transmitted system load signal if the customer desires a signal.

12. Load Checks under 500 kw Demand. The utility has the right to monitor time-of-use load and make facility inspections to verify that permanently installed on-peak conservation equipment or procedures, for customers taking service whose maximum demand is less than 500 kw, is properly installed, and in operation, and does reduce annual on-peak energy consumption by 1,500 kwhrs. In the event that a customer is found, by inspection or other means, not to have, or be operating, the necessary equipment or under necessary procedures, the utility shall have the right to rebill the customer's previous 11 months based on his otherwise appropriate schedule.

13. Parallel Generation Limitation. This schedule is not applicable to standby, auxiliary service or service operated in parallel with a customer's generating plant, except as specified in Rule 1 under the definition of Parallel Generation Limitation. L

14. Incremental Non-Agricultural Usage: This schedule shall be available even if there is incidental usage (under 500 kwh/month) such as security or safety lighting.

15. Billing: A customer's bill is first calculated according to the total rates and conditions listed above. The following adjustments are made depending on the option applicable to the customer:

    a. **UDC Bundled Service Customers** receive supply and delivery services solely from the Utility. The customer's bill is based on the Total Rates set forth above. The EECC component is determined by multiplying the applicable EECC price for this schedule during the last month by the customer's total usage. T

    b. **Direct Access (DA) and Community Choice Aggregation (CCA) Customers** purchase energy from a non-utility provider and continue to receive delivery services from the Utility. The bills for a DA and CCA Customer will be calculated as if they were a UDC Bundled Service Customer, then crediting the bill by the amount of the applicable EECC component, as determined for a UDC Bundled Customer, and including the appropriate Cost Responsibility Surcharge (CRS), if applicable.

    Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

(Continued)

SCHEDULE PA-T-1

EXPERIMENTAL POWER - AGRICULTURAL - OPTIONAL TIME-OF-USE

SPECIAL CONDITIONS (Continued)

16. Other Applicable Tariffs: Rules 21, 23 and Schedule E-Depart apply to customers with generators.

17. Generator Operation: The operation of a non-utility generator unless expressly authorized by tariff is prohibited.

18. TOU Period Grandfathering: Pursuant to D.17-01-006 and D.17-10-018 TOU Period Grandfathering permits certain eligible behind-the-meter solar customers to continue billing under grandfathered TOU period definitions after new TOU Periods are implemented, for a specific period of time. T

TOU Period Grandfathering Eligible Customer Generator (Non-Residential): a non-residential customer with an on-site solar system, who has filed an initial interconnection application by January 31, 2017. The on-site solar system must be designed to offset at least 15% of the customer's current annual load. For Public Agency customers, defined here as public schools, colleges and universities; federal, state, county and city government agencies; municipal utilities; public water and/or sanitation agencies; and joint powers authorities -- the non-residential account must have filed an initial interconnection application by December 31, 2017.

TOU Period Grandfathering Term (Non-Residential): Upon SDG&E's implementation of updated TOU periods adopted in D.17-08-030, TOU Grandfathering Eligible Customer Generators will continue to be billed under prior existing TOU periods and resulting rates for the remainder of their applicable TOU Grandfathering Term, which begins upon issuance of a permission to operate customer's on-site solar system and continues for 10 years. In no event shall the duration a customer's grandfathering term extend beyond July 31, 2027 (December 31, 2027 for schools). Upon expiration of a customer's TOU Period Grandfathering Term, the customer will be billed using his otherwise applicable TOU periods and associated rates beginning with the customer's next billing cycle.
