SCHEDULE 20/20

CALIFORNIA REBATE PROGRAM

APPLICABILITY

This Schedule is applicable to residential customers in combination with their otherwise applicable rate schedule, with the exception of Direct Access customers, un-metered electric service customers, and self-generation customers. T T T

TERRITORY

Within the entire territory served by the Utility.

RATES

A 20% rate reward (credit) will be applied to the Applicable Billing Portion for any month in which the current month's applicable usage is 15% less than the customer's Historical Baseline Usage for the year 2000. T

The rate reward (credit) will not be applied to the Utility users tax, if any, the fee to fund the California Public Utilities Commission or the California Energy Commission. T

SPECIAL CONDITIONS

1. Definitions: The Definitions of terms used in this schedule are found either herein or in Rule 1.

2. Applicable Billing Portion: For the four (4) billing periods ending on, or after, August 1, 2002 the Applicable Billing Portion is the entire electric bill. T T

3. Historical Baseline Usage: For customers that have received at least 1 day of service during the billing period for the same month of 2000 the Historical Baseline Usage shall be the average use per day, as measured in kWh, for the corresponding billing period in 2000. T

   For customers that have not had at least 1 day of service during the billing period for the same month of 2000 the Historical Baseline Usage shall be the customer's Baseline Allowance as set forth in their otherwise applicable rate schedule. Customers who have historical usage at a premises but are assigned Baseline Allowance because the Utility billing system was not able to locate their historical usage, may ask the Utility to research it to establish a different benchmark. T T T D

4. Historical Baseline Usage Adjustments: The Utility is not required to redevelop an adjusted Historical Baseline Usage for customers that have experienced an increased consumption due to occupancy increases during the current year or for customers who have implemented efficiency and conservation measures during the previous year to allow these customers to qualify for the credits during the current year. T

SCHEDULE 20/20

CALIFORNIA REBATE PROGRAM

SPECIAL CONDITIONS (Continued)

5. Weather Adjustments: No correction or normalization of the Historical Baseline Usage will be made for weather.

6. Rate Reward Adjustments: No provisions are to be made for significant observed energy and demand reductions that fall short of meeting the 15% qualification standard. A minimum reduction of 15% is required to receive the 20% rebate. Customers exceeding 15% reductions will only be rewarded a 20% credit. Calculations for percentage reductions will be rounded to the nearest whole number for purposes of determining who qualifies for the rebate. However, figures displayed at the bottom of customer bills under the heading “20/20 Rebate Program Comparison” will be displayed to one decimal place. For example, a customer whose percentage of reduction was 14.4% would see this figure and would not receive a rebate on their bill. A customer whose percentage reduction was 14.5% would see this figure and, additionally, would receive a 20% rebate as a line item credit titled "California 20/20 Rebate" in the "Other Account Charges" section of their bill. T T T

7. Multiple/Summary Accounts: For customers with multiple accounts, summary billings, or multiple meters at a premises, the 20% rate reward is calculated and applied, if applicable, to each individual service account.

8. Dispute Resolution: Any disputes arising from the provision of service under this Schedule or other aspects of the California 20/20 Rebate Program will be deemed disputes over amounts billed for electricity and will be handled as provided for in the Utility’s Rule 10, Disputes.

9. Self-Generation Exclusion: The self-generation exclusion applies to any customer who is a Departing Load customer as defined by Rule 23, a customer operating a generating facility or any customer served under Schedule S, Standby, or who receives Net Energy Metering. T T

10. Meter Reads: The Utility will normally read meters each month with minor exceptions. If, because of unusual conditions or for reasons beyond the Utility’s control, the customer’s meter cannot be read on the scheduled reading date, or if for any reason accurate meter data is not available, the Utility will make estimates in a manner consistent with its applicable tariff rules.

11. Conservation Programs: Customers participating in existing conservation programs will be eligible to participate in the California 20/20 Rebate Program and any benefits to such customers from such other programs shall be considered additive to the benefits of the California 20/20 Rebate Program. T

12. Master-Metered Customers: For master-metered customers, the 20% rebate shall be determined by usage measured by the master meter. Master-metered customers, including mobile home park owners with sub-metered tenants, receiving a rebate, shall distribute the rebate to sub-metered tenants consistent with Public Utilities Code Section 739.5(b).
