SCHEDULE AO-TOU

GENERAL SERVICE - TIME METERED - OPTIONAL

APPLICABILITY

Applicable to all metered non-residential customers who request service under this schedule. Optionally available to three-phase residential common use service.

Non-profit group living facilities taking service under this schedule may be eligible for a 15% low-income rate discount on their bill, if such facilities qualify to receive service under the terms and conditions of Schedule E-LI.

Agricultural Employee Housing Facilities, as defined in Schedule E-LI, may qualify for a 15% CARE discount on the bill if all eligibility criteria set forth in Form 142-4032 is met.

Pursuant to D.00-12-058, this schedule will be closed to additional customers effective 01-01-01. Existing AO-TOU customers who discontinue service under this schedule after 01-01-01 cannot subsequently return to AO-TOU. Effective 01-01-02, this schedule will be cancelled. N N N

TERRITORY

Within the entire territory served by the utility.

D

R

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of ($.00152) per kWh. Restructuring Implementation Rate is comprised of rates for Internally Managed Costs (IMC) and Externally Managed Costs (EMC). Total Rate shown above excludes applicable PX charges and FTA charges, if any.

Rate Components

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Trust Transfer Amount (TTA), sometimes referred to as Fixed Transition Amount (FTA), (6) Restructuring Implementation Rate (Restruc) which is the sum of the rates for Internally Managed Costs and Externally Managed Costs (7) Ongoing Competition Transition Charges (CTC), and (8) Reliability Must Run Generation Rates (RMR).

Energy charges associated with Schedule PX (Power Exchange Energy Cost) are in addition to the Utility Distribution Company Total Rates shown above.

Fixed Transition Amount Adjustment

For residential and small commercial customers as defined in Rule 1 – Definitions, and as described in Public Utilities Code Section 331(h), the rates shown above will be adjusted in accordance with the rates set forth in Schedule FTA.

Primary Substation	(0.00097)		.00302	.00065		.00123	.00292	.00011	**.00699**
Transmission	(0.00097)		.00302	.00065		.00123	.00290	.00011	**.00697**

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of ($.00152) per kWh the Transmission Access Charge Balancing Account Adjustment (TACBAA) of ($.00004) per kWh and a Supplemental Surcharge (SS) of $.00003 per kWh. Restructuring Implementation Rate is comprised of rates for Internally Managed Costs (IMC) and Externally Managed Costs (EMC). T

Rate Components

The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Trust Transfer Amount (TTA), sometimes referred to as Fixed Transition Amount (FTA), (6) Restructuring Implementation Rate (Restruc) which is the sum of the rates for Internally Managed Costs and Externally Managed Costs (7) Ongoing Competition Transition Charges (CTC), and (8) Reliability Must Run Generation Rates (RMR).

Utility Distribution Company (UDC) Total Rate shown above excludes any applicable commodity charges associated with Schedule EECC. T T

Fixed Transition Amount Adjustment

For residential and small commercial customers as defined in Rule 1 – Definitions, and as described in Public Utilities Code Section 331(h), the rates shown above will be adjusted in accordance with the rates set forth in Schedule FTA.

GENERAL SERVICE - TIME METERED - OPTIONAL

RATES (Continued)

Electric Energy Rate Adjustment

The Electric Energy Rate Adjustment (EERA) reflects the amount by which the actual monthly energy costs is greater or less than the SDG&E Electric Energy Charge. The Electric Energy Charge is equal to the 6.5 cents per kWh Energy Rate Ceiling (ERC), or Initial Frozen Rate (IFR) set under Assembly Bill (AB) 265 and Assembly Bill (AB) X1 43, respectively. For AB 265 customers, the ERC and IFR are calculated by multiplying 6.5 cents per kWh and the total monthly kWh usage (combined baseline and non-baseline usage). For AB X1 43 customers, the EERA will be recorded in the Large Customer Revenue Shortfall Memorandum Account (LCRSMA). T

Non-Standard Seasonal Changeover

Customers may select on an optional basis to start the summer billing period on the first Monday of May and to start the winter billing period on the first Monday of October. Customers electing this option will be charged an additional $100 per year for metering equipment and programming.

Time Periods

All time periods listed are applicable to local time.
The definition of time will be based upon the date service is rendered.

	Summer May 1 - Sept 30	Winter All Other
On-Peak	11 a.m. - 6 p.m. Weekdays	5 p.m. - 8 p.m. Weekdays
Semi-Peak	6 a.m. - 11 a.m. Weekdays	6 a.m. - 5 p.m. Weekdays
	6 p.m. - 10 p.m. Weekdays	8 p.m. - 10 p.m. Weekdays
Off-Peak	10 p.m. - 6 a.m. Weekdays	10 p.m. - 6 a.m. Weekdays
	Plus Weekends & Holidays	Plus Weekends & Holidays

Where the billing month contains time from both April and May or September and October, the on-peak period demand charges will be based on the demands registered in each month, weighted by the number of days billed in each month. Energy will be billed on the basis of the time period and season in which the usage occurred.

Franchise Fee Differential

A Franchise Fee Differential of 1.9% will be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such Franchise Fee Differential shall be so indicated and added as a separate item to bills rendered to such customers.

SPECIAL CONDITIONS

1. Definitions: The Definitions of terms used in this schedule are found either herein or in Rule 1.

2. Voltage: Service under this schedule normally will be supplied at a standard available Voltage in accordance with Rule 2.

3. Voltage Regulators: Voltage Regulators, if required by the customer, shall be furnished, installed, owned, and maintained by the customer.

4. Reconnection Charge: In the event that a customer terminates service under this schedule and re-initiates service under this or any other schedule at the same location within 12 months, there will be reconnection charge equal to the minimum charge which would have been billed had the customer not terminated service.

5. Non-Coincident Demand Charge: The Non-Coincident Demand Charge shall be based on the higher of the Maximum Monthly Demand or 50% of the Maximum Annual Demand.

6. On-Peak Period Demand Charge: The On-Peak Period Demand Charge shall be based on the Maximum On-Peak Period Demand.

7. Power Factor: The Power Factor rate shall apply to those customers that have a Power Factor Test Failure and will be based on the Maximum Kilovar Billing Demand. Those customers that have a Power Factor Test Failure will be required to pay for the Power Factor Metering that the utility will install.

8. Parallel Generation Limitation. This schedule is not applicable to standby, auxiliary service, or service operated in parallel with a customer's generating plant, except as specified in Rule 1 under the definition of Parallel Generation Limitation. D T

9. Seasonal Changeover Switching Limitation. Customers who elect the nonstandard seasonal changeover option of this schedule will be prohibited from switching service to the regular seasonal changeover for a 12-month period. L T

10. Limitation on Non-Standard Seasonal Changeover Availability. At the utility's sole option, the optional non-standard seasonal changeover provision is available to no more than ten additional Schedule AO-TOU, Schedule AL-TOU, and Schedule A6-TOU customers annually and; service will be provided in the order in which requests are received. T L

SCHEDULE AO-TOU

GENERAL SERVICE - TIME METERED - OPTIONAL

SPECIAL CONDITIONS (Continued) L

11. Basic Service Fee Determination. A customer whose Maximum Monthly Demand has exceeded 500 kW for three consecutive months in the most recent 12-month period is determined to be greater than 500 kW. Otherwise, a customer is determined to be less than or equal to 500 kW. A customer determined to be greater than 500 kW will be reassigned to less than or equal to 500 kW status only when the Maximum Monthly Demand remains less than or equal to 500 kW for 12 or more consecutive months. Differentiation of greater than or less than 10,000 kW will be based on the customer's Maximum Annual Demand. T T

12. Billing. A customer's bill is first calculated according to the total rates and conditions listed above. The following adjustments are made depending on the option applicable to the customer: T

    a. **UDC Bundled Service Customers** receive supply and delivery services solely from SDG&E. The customer's bill is based on the Total Rates set forth above. The PX (supply) component is determined by multiplying the average PX cost for this schedule during the last month by the customer's total usage.

    b. **Direct Access Customers** purchase energy from an energy service provider (ESP) and continue to receive delivery services from SDG&E. The bill for a Direct Access Customer will be calculated as if it were a UDC Bundled Service Customer, then crediting the bill by the amount of the PX component, as determined for a UDC Bundled Customer.

    c. **Virtual Direct Access Customers** receive supply and delivery services solely from SDG&E. A customer taking Virtual Direct Access service must have a real-time meter installed at its premises to record hourly usage, since PX costs change hourly. The bill for a Virtual Direct Access Customer will be calculated as if it were a UDC Bundled Service Customer, then crediting the bill by the amount of the PX component, as determined for a UDC Bundled Customer, then adding the hourly PX component, which is determined by multiplying the hourly energy used in the billing period by the hourly cost of energy from the PX.

    Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

    Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

13. Electric Emergency Load Curtailment Plan: As set forth in CPUC Decision 01-04-006, all transmission level customers except essential use customers, OBMC participants, net suppliers to the electrical grid, or others exempt by the Commission, are to be included in rotating outages in the event of an emergency. A transmission level customer who refuses or fails to drop load shall be added to the next curtailment block so that the customer does not escape curtailment. If the transmission level customer fails to cooperate and drop load at SDG&E's request, automatic equipment controlled by SDG&E will be installed at the customer's expense per Electric Rule 2. A transmission level customer who refuses to drop load before installation of the equipment shall be subject to a penalty of $6/kWh for all load requested to be curtailed that is not curtailed. The $6/kWh penalty shall not apply if the customer's generation suffers a verified, forced outage and during times of scheduled maintenance. The scheduled maintenance must be approved by both the ISO and SDG&E, but approval may not be unreasonably withheld. N | | | | | | | | | | N
