SCHEDULE CSGT

COMMUNITY SOLAR GREEN TARIFF

SPECIAL CONDITIONS

1. Definitions: The Definitions of terms used in this Schedule are found either herein or in Rule 1. Unless otherwise stated, all references to "customer" in this rule will refer to Utility customers who have elected to participate in CSGT.

   a. Disadvantaged Community (DAC): A community that is identified, as a census tract receiving the top 25% of overall score in CalEnviroScreen (CES) 4.0, or census tracts lacking overall scores in CES 4.0 due to data gaps, but receiving the highest 5% of CES 4.0 cumulative pollution burden score, or census tracts identified in the highest 25% of overall scores in CSE 3.0, regardless of scores in CSE 4.0, or lands under the control of federally recognized tribes. CalEnviroScreen identifies California communities that are most effected by and vulnerable to sources of pollution. D,N D,N N N N

   b. Eligible Customer: A utility customer located within the Utility's service territory in a Disadvantaged Community as defined in Special Condition 1.a., and (i) is located in a census tract that is within 5 miles from the CSGT Renewable Generating Facility that is under contract with the Utility to supply generation to this Schedule CSGT; (ii) does not take service under Net Energy Metering, Virtual Net Metering or other renewable generation tariffs; (iii) is not participating in a utility pilot program nor (iv) can be the community sponsor for a designated CSGT Renewable Generating Facility that is under contract with the Utility to supply generation to this schedule CSGT. N N N N

      i. Community Choice Aggregator (CCA) & Direct Access (DA) Customers: If a CCA or Electric Service Provider (ESP) offers a CPUC-approved CSGT program, those enrolled in the CCA's or ESP's program will be eligible to receive the 20% discount on the SDG&E-portion of their bill, i.e., the Utility Distribution Company (UDC) charges. CCA customers cannot directly enroll in SDG&E's program.

      ii. Community Sponsor: A non-profit community-based organization or local government that is sponsoring a Utility approved CSGT Renewable Generating Facility on behalf of the community residents. Community Sponsors must meet eligibility criteria listed in Special Condition 1.b in order to receive bill credits, Community Sponsors that do not meet this criteria are not eligible for CSGT bill credits.

COMMUNITY SOLAR GREEN TARIFF

SPECIAL CONDITIONS (continued)

1. Definitions (continued)

   c. CSGT Renewable Generating Facility: A solar generation facility, located within Utility's service territory, as well as within a top 25% of disadvantaged communities in the highest 5% of CalEnviroScreen's Pollution Burden that do not have a CalEnviroScreen Score, or on land owned by federally recognized tribes which has contracted with Utility for the purpose of supplying renewable energy for CSGT. D,T N N

   d. CARE: California Alternative Rates for Energy program (SCHEDULE E-CARE)

   e. FERA: Family Electric Rate Assistance program (SCHEDULE FERA)

   f. CER: The rate schedule under which the customer is effectively enrolled for electric service.

   g. Nameplate Generating Capacity: The generation capacity rating of a Renewable generating Facility (in MWac), found on the system's nameplate.

2. Customer Enrollments: Eligible residential customers subscribing are required to have 100% of their electric usage supplied with renewable electricity provided by a CSGT Renewable Generating Facility.

   a. Program Availability: CSGT will be available to eligible customers on a first-come-first-serve basis, contingent upon the availability of electricity generated from CSGT Renewable Generating Facilities. Program capacity will be allocated based on the customers historical electric usage and the expected electric generation of the CSGT Renewable Generating Facilities.

   b. Application & Eligibility: Customers are required to complete a CSGT application and undergo eligibility verification to enroll in the CSGT program. Re-verification of a customer's eligibility may be required at the request of the utility.

   c. Verification: Information provided by the customer to the Utility is subject to verification. Refusal or failure to provide requested documentation of eligibility acceptable to the utility, upon request, shall result in denial or termination of CSGT enrollment.

   d. CARE / FERA Eligibility: CARE and FERA eligibility is verified when customers complete the CSGT application process.

      i. Eligible CSGT customers not participating in CARE or FERA at the time of enrollment may enroll in CARE or FERA during or after CSGT enrollment and receive the discounts associated with both programs.

COMMUNITY SOLAR GREEN TARIFF

SPECIAL CONDITIONS (continued)

3. Customer Subscription Cap: A single customer may not subscribe to more than 2MW of nameplate generating capacity of any CSGT project.

4. Project Subscription: Eligible customers may subscribe to a specific CSGT Renewable Generating Facility on a first-come-first-serve basis, to the extent that the CSGT Renewable Generating Facility meets the subscription levels outlined below. All eligible customers must be located within the Utility's service territory, and either within a census tract that is in the top 25% disadvantaged communities, or in the highest 5% of CalEnviroScreen's Pollution Burden that do not have a CalEnviroScreen Score, or on land owned by federally recognized tribes, and within 5 miles from the CSGT Renewable Generating Facility. D,T N N

   a. Project Availability: Each CSGT Renewable Generating Facility is required to subscribe 25% of the system's capacity to Low Income Customers prior to operation. Customer enrollments of each CSGT project will be effective upon the project reaching 25% subscription with Low Income Customers and receiving approval for operation. CSGT projects will be available to eligible customers until they have subscribed 100% of project capacity.

   b. Residential Customers: Eligible CSGT customers must be residential customers, with the exception of the community sponsors for each CSGT Renewable Generating Facility.

   c. Non-Residential Customers: Each CSGT Renewable Generating Facility may subscribe a community sponsor, who may be a non-residential customer. A community sponsor may subscribe up to 100% of their electric usage from the CSGT Renewable Generating Facility, not to exceed 25% of the projects expected generation. Community sponsors will be eligible for the CSGT 20% bill discount on the portion of generation which they are subscribed only when the project has met the 50% subscription requirement of low-income customers. Once a CSGT project has met the 50% low income requirement, eligible community sponsors may retain their project subscription and associated bill credits for the life of the project.

      i. Multiple eligible community sponsors may participate in a CSGT project, as long as their collective project subscription does not surpass 25% of the CSGT project's generation.

   d. Low Income Customers: CSGT Eligible low-income residential customers who meet criteria in SC 1.b. as well as the CARE or FERA eligibility criteria may subscribe to any CSGT Renewable Generating Facility on a first-come, first-served basis.

   e. Non-Low-Income Customers: Non-low-income customers who meet the location criteria listed in SC 1.b may be added to a waitlist until at least 50% of the project's generation has been subscribed to by low-income CARE or FERA eligible customers. Once a CSGT project has achieved 50% subscription with eligible low-income customers, eligible non-low-income customers can be enrolled.
