SCHEDULE EECC-CPP-VOL

ELECTRIC ENERGY COMMODITY COST
CRITICAL PEAK PRICING-VOLUNTARY

APPLICABILITY

This Schedule is closed to new customers effective December 31, 2007.

The Critical Peak Pricing—Voluntary (CPP-VOL) schedule is an optional commodity tariff that offers customers the opportunity to manage their electric costs by either reducing load during high cost pricing periods or shifting load from high cost pricing periods to lower cost pricing periods. This schedule is available to customers served under a time-of-use (TOU) rate schedule currently receiving bundled utility service and have an annual maximum demand of 20 kW or greater. Customers who choose to take service under this schedule will continue to be subject to the terms and provisions of their otherwise applicable UDC tariff, unless superseded by conditions herein. This schedule is not available to Direct Access customers or Community Choice Aggregation (CCA).

TERRITORY

Applicable throughout the entire territory served by the Utility.

RATES

Energy Rates	($/kWh)
