SCHEDULE I-3

GENERAL SERVICE - INTERRUPTIBLE

APPLICABILITY

Applicable only under contract to customers receiving three-phase residential common use service, who request service on this schedule and whose Maximum Monthly Demand is expected to equal or exceed 20 kw, to existing Schedule A customers whose Maximum Monthly Demand is less than 20 kw who request service under this schedule on an optional basis, to any Schedule A customer whose monthly demand has been equal to or exceeded 20 kw for 12 consecutive months, and to existing Schedule AD customers whose Maximum Monthly Demand exceeds 500 kw for three consecutive months. Any customer whose Maximum Monthly Demand has fallen below 20 kw for three consecutive months may, at their option, elect to continue service under this schedule or be served under any other applicable schedule.

Non-profit group living facilities taking service under this schedule may be eligible for a 15% California Alternate Rates for Energy (CARE) discount on their bill, if such facilities qualify to receive service under the terms and conditions of Schedule E-LI.

Agricultural Employee Housing Facilities, as defined in Schedule E-LI, may qualify for a 15% CARE discount on the bill if all eligibility criteria set forth in Form 142-4032 is met.

TERRITORY

Within the entire territory served by the utility.

Notes: Transmission Energy charges include the Transmission Revenue Balancing Account Adjustment (TRBAA) of ($.00049) per kWh. Restructuring Implementation Rate is comprised of rates for internally Managed Costs (IMC) and Externally Managed Costs (EMC). Total Rate shown above excludes applicable PX charges and FTA charges, if any.

(Continued)

SCHEDULE I-3

GENERAL SERVICE - INTERRUPTIBLE

RATES (Continued)

Rate Components
The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Trust Transfer Amount (TTA), sometimes referred to as Fixed Transition Amount (FTA), (6) Restructuring Implementation Rate (Restruc) which is the sum of the rates for Internally Managed Costs and Externally Managed Costs, (7) Ongoing Competition Transition Charges (CTC), and (8) Reliability Must Run Generation Rates (RMR).

Energy charges associated with Schedule PX (Power Exchange Energy Cost) are in addition to the Utility Distribution Company Total Rates shown above.

Fixed Transition Amount Adjustment
For residential and small commercial customers as defined in Rule 1 – Definitions, and as described in Public Utilities Code Section 331(h), the rates shown above will be adjusted in accordance with the rates set forth in Schedule FTA.

Electric Energy Rate Adjustment
The Electric Energy Rate Adjustment (EERA) is a credit applied to monthly bills of eligible customers (see Rule 1 definition for Energy Rate Ceiling (ERC) to determine eligibility) that reflects the amount by which actual monthly energy charges (commodity charges) exceed the ERC established under Assembly Bill 265 and Decision 00-09-040. The ERC is calculated by multiplying $0.065 times total monthly kWh usage. The EERA will not increase customer bills when actual monthly energy charges are less than $0.065 per kWh. To the extent the total energy component including Purchased Electric Commodity Account (PECA) amortization is less than $0.065 per kWh, total rates for the applicable customers will be reduced accordingly. T T

Time Periods
All time periods listed are applicable to local time.
The definition of time will be based upon the date service is rendered.

	Summer May 1 - Sept 30	Winter All Other
On-Peak	11 a.m. - 6 p.m. Weekdays	5 p.m. - 8 p.m. Weekdays
Semi-Peak	6 a.m. - 11 a.m. Weekdays	6 a.m. - 5 p.m. Weekdays
	6 p.m. - 10 p.m. Weekdays	8 p.m. - 10 p.m. Weekdays
Off-Peak	10 p.m. - 6 a.m. Weekdays	10 p.m. - 6 a.m. Weekdays
	Plus Weekends & Holidays	Plus Weekends & Holidays

Where the billing month contains time from both April and May or September and October, the on-peak period demand charges will be based on the demands registered in each month, weighted by the number of days billed in each month. Energy will be billed on the basis of the time period and season in which the usage occurred.

Non-Standard Seasonal Changeover
Customers may select on an optional basis to start the summer billing period on the first Monday of May and to start the winter billing period on the first Monday of October. Customers electing this option will be charged an additional $100 per year for metering equipment and programming.

Franchise Fee Differential
A franchise fee differential of 1.9% will be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such franchise fee differential shall be so indicated and added as a separate item to bills rendered to such customers.

Fixed Transition Amount Adjustment D
For residential and small commercial customers as defined in Rule 1 – Definitions, and as described in Public Utilities Code Section 331(h), the rates shown above will be adjusted in accordance with the rates set forth in Schedule FTA.

Rate Components
The Utility Distribution Company Total Rates (UDC Total) shown above are comprised of the following components (if applicable): (1) Transmission (Trans) Charges, (2) Distribution (Distr) Charges, (3) Public Purpose Program (PPP) Charges, (4) Nuclear Decommissioning (ND) Charge, (5) Trust Transfer Amount (TTA), sometimes referred to as Fixed Transition Amount (FTA), (6) Restructuring Implementation Rate (Restruc) which is the sum of the rates for Internally Managed Costs and Externally Managed Costs, (7) Ongoing Competition Transition Charges (CTC), and (8) Reliability Must Run Generation Rates (RMR).

Energy charges associated with Schedule PX (Power Exchange Energy Cost) are in addition to the Utility Distribution Company Total Rates shown above.

Electric Energy Rate Adjustment N
The Electric Energy Rate Adjustment (EERA) is a credit applied to monthly bills of eligible customers (see Rule 1 definition for Energy Rate Ceiling (ERC) to determine eligibility) that reflects the amount by which actual monthly energy charges (commodity charges) exceed the ERC established under Assembly Bill 265 and Decision 00-09-040. The ERC is calculated by multiplying $0.065 times total monthly kWh usage. The EERA will not increase customer bills when actual monthly energy charges are less than $0.065 per kWh. To the extent the total energy component including PECA amortization is less than 6.5 cents per kWh, total rates for the applicable residential, small commercial, and lighting customers will be reduced accordingly. N

Franchise Fee Differential
A franchise fee differential of 1.9% will be applied to the monthly billings calculated under this schedule for all customers within the corporate limits of the City of San Diego. Such franchise fee differential shall be so indicated and added as a separate item to bills rendered to such customers.

SCHEDULE I-3

GENERAL SERVICE - INTERRUPTIBLE

SPECIAL CONDITIONS (Continued)

12. Guaranteed Interruptible Load. The amount of load designated by the customer as guaranteed to be reduced during the time period following notice of interruption. The customer shall agree to control its average maximum demand during the period of interruption such that its interruptible load is greater than or equal to its guaranteed interruptible load. The customer's Guaranteed Interruptible Load may not exceed the customer's average on-peak demand during the previous year, and if the customer's demand immediately preceding request for interruption during the previous year is known, a guaranteed interruptible load may not exceed such demands.

13. Determination of Interrupted Load. The difference in kilowatts of (a) minus (b) shall be designated as interrupted load, where (a) is the average maximum demand during the last full demand interval prior to each notice of interruption (when no period of interruption was in effect), and (b) is the average maximum demand registered during the period of interruption. The average maximum demand in any period is the sum of maximum demands in each full demand interval divided by the number of such full intervals within the periods.

14. Notice of Interruption. The customer may select a notification period of either 10 minutes or 30 minutes, and the utility will give the customer not less than the contracted notice before interruption is to be required. The utility will notify the customer at the end of the period of interruption under this schedule. This condition does not limit the utility's ability to curtail or interrupt service to any customer in response to the utility's emergency plans on file with the California Public Utilities Commission.

15. Period of Interruption. A Period of Interruption under this schedule will occur at any time, when, in the utility's sole judgement, the forced outage of a generating unit could require the interruption of customer load. In addition, a period of interruption will occur when any of the following conditions exist:

    a. The utility's on-system sendout exceeds 3722 MW*; or C

    b. The utility's total 12-month to date cumulative time period of interruption has not exceeded a minimum of five hours, then starting at 1:00 p.m. on the second Monday after September 1, the utility shall initiate a period of interruption for one hour on that and each subsequent weekday until the annual total equals the minimum.

    * For each year shall be the greater of the current value or as determined by the prior year on-system sales/8760/.55.

    A period of interruption may also be made by the utility, when, in the utility's sole judgement it is necessary. A period of interruption may be made at such time as, (a) the utility experiences a system frequency below 59.4 hertz, (b) the utility's on-system spinning reserves drop below 5%, or (c) a statewide Stage 2 alert is called.

    The utility shall endeavor not to have the above conditions occur more than 80 hours per year or 30 times per year except in extreme circumstances.
