# SCHEDULE PEVSP2

 N

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2) N

APPLICABILITY N

This Schedule is applicable to Bundled Service customers on Residential, Commercial and Industrial rate schedules, and Community Choice Aggregation (CCA) customers, as defined in the Utility's Electric Rule 27, who charge a plug-in electric vehicle (PEV) where the connected PEV load is measured by a customer or third-party owned PEV Submeter (Submeter load) and subtracted from the customer's Primary Meter and billed on an applicable utility rate schedule.

This schedule implements the Phase 2 PEV Submetering Pilot (Phase 2 Pilot) to evaluate:

1. Customer demand for and benefits of a PEV submetering arrangement,

2. Billing integration and communication standards associated with submetered data. Phase 2 Pilot adds the option for Utility customers to participate as a Multiple Customers-of-Record (MCOR).

Customers must have a SDG&E Smart Meter or interval data recorder (IDR) type meter as their Primary Meter to participate in this Phase 2 Pilot.

The PEV Submeter must be used for the sole purpose of measuring electricity used to charge PEVs.

TERRITORY

Within the entire territory served.

RATES

All charges and provisions of the customer's otherwise applicable tariff (OAT) shall apply to the Primary Meter, except that the PEV usage, as measured by the Submeter, will be billed on an applicable rate schedule.

A. Where the Primary Meter qualifies for Residential Service:

   a. For Residential customers participating as a Single Customer-Of-Record (SCOR), all PEV Submeter usage will be billed on Schedule EV-TOU and the applicable Commodity schedule.
   b. For customers participating as a Multiple Customer-Of-Record (MCOR):
      i. If the PEV Submeter usage qualifies as Residential customer usage, then the PEV Submeter usage will be billed on Schedule EV-TOU and the applicable Commodity schedule.
      ii. If the PEV Submeter usage qualifies as non-residential customer usage, then the PEV Submeter usage will be billed on the applicable Commercial/Industrial Time-Of-Use rate schedule and the applicable Commodity schedule. N

(Continued)

# SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

RATES (Continued) N

B. Where the Primary Meter or Submeter qualifies for Commercial/Industrial Service:

a. PEV Submeter usage with a maximum demand below 20 kW will be billed on Schedule TOU-A: General Service - Time Of Use Service, and the applicable Commodity schedule.
b. PEV Submeter usage with a maximum demand equal to or exceeding 20 kW will be billed on Schedule AL-TOU: General Service - Time Metered, and the applicable Commodity schedule.

C. Customers taking service under this Schedule and Schedule NEM – Net Energy Metering, net energy is defined as the energy delivered to the customer less any exported energy back to the grid measured on the Primary Meter, less the submetered EV usage, and are subject to the cap described in Special Condition 2.

PLUG-IN ELECTRIC VEHICLE PILOT ENROLLMENT INCENTIVE PAYMENT

A one-time enrollment payment of $210 will be provided to the Submeter Meter Data Management Agent (Submeter MDMA) for each participant enrolled in this Phase 2 Pilot. This payment will be made by the Utility to the Submeter MDMA within 60 days after the participant's completed enrollment. Additionally, $17.50 per month per Submeter will be provided to the Submeter MDMA for performance of its data management and exchange responsibilities in compliance with Phase 2 Pilot requirements for each month the customer remains on the Phase 2 Pilot. These payments will be made by the Utility to the Submeter MDMA within 60 days of the first two successful billing cycles for a given customer, and within 30 days after receipt of the Submeter MDMA's final billing cycle invoice. The Utility may petition the CPUC's Energy Division to terminate this ongoing incentive, with no cost, liability, or further obligation, if a Submeter MDMA fails to meet its performance requirements. These incentive payments are applicable only for Phase 2 of the Pilot, which ends after 12 billing cycles for a customer participant, and no later than April 30, 2018. N

# SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

RATES (Continued)

B. Where the Primary Meter or Submeter qualifies for Commercial/Industrial Service:

a. PEV Submeter usage with a maximum demand below 20 kW will be billed on Schedule TOU-A: General Service - Time Of Use Service, and the applicable Commodity schedule.
b. PEV Submeter usage with a maximum demand equal to or exceeding 20 kW will be billed on Schedule AL-TOU: General Service - Time Metered, and the applicable Commodity schedule.

C. Customers taking service under this Schedule and Schedule NEM – Net Energy Metering, net energy is defined as the energy delivered to the customer less any exported energy back to the grid measured on the Primary Meter, less the submetered EV usage, and are subject to the cap described in Special Condition 2.

PLUG-IN ELECTRIC VEHICLE PILOT ENROLLMENT INCENTIVE PAYMENT

A one-time enrollment payment of $210 will be provided to the Submeter Meter Data Management Agent (Submeter MDMA) for each participant enrolled in this Phase 2 Pilot. This payment will be made by the Utility to the Submeter MDMA within 60 days after the participant's completed enrollment. Additionally, $17.50 per month per Submeter will be provided to the Submeter MDMA for performance of its data management and exchange responsibilities in compliance with Phase 2 Pilot requirements for each month the customer remains on the Phase 2 Pilot. These payments will be made by the Utility to the Submeter MDMA within 60 days of the first two successful billing cycles for a given customer, and within 30 days after receipt of the Submeter MDMA's final billing cycle invoice. The Utility may petition the CPUC's Energy Division to terminate this ongoing incentive, with no cost, liability, or further obligation, if a Submeter MDMA fails to meet its performance requirements. These incentive payments are applicable only for Phase 2 of the Pilot, which ends after 12 billing cycles for a customer participant, and no later than April 30, 2018.

COMMERCIAL/INDUSTRIAL TIME-OF-USE TARIFF CUSTOMER PAYMENT N

Commercial/Industrial customers with submeter usage billed under a Time-of-Use tariff, shall receive a payment applied as a bill credit of $20/month per submeter. SDG&E may petition the CPUC's Energy Division to terminate this ongoing customer payment, with no cost, liability, or further obligation, if Submeter MDMA fails to meet its performance requirements. These payments are applicable only for Phase 2 of the Pilot, which ends after 12 billing cycles for a customer participant and no later than April 30, 2018. N

(Continued)

# SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS

1. Pilot Term: Phase 2 duration is 18 months beginning November 1, 2016 and ending April 30, 2018.

2. Pilot Participation Cap: On a first-come, first-served basis, a maximum of 500 Submeters may be enrolled in Phase 2 of the Pilot. Of the 500 Submeters, a limit of 100 Submeters may be related to NEM accounts.

3. Pilot Participation Period: Customers may participate for up to 12 consecutive billing cycles. Customers may unenroll from the Pilot at any time, but may not reenroll in Phase 2 of the Pilot unless they are relocating in one of the IOU's service territories as discussed in Special Condition 12.

4. Customer Enrollment: Submeter MDMA is responsible for submitting a completed Form 183-4000, Single Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 183-5000, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, to enroll eligible customers in the Phase 2 Pilot. Such enrollments must be received by Utility at least 5 business days prior to the start date of the customer's next billing cycle to become effective on that date providing the volume of customer agreements in process at that time does not exceed an average of five (5) agreements per business day over any five (5) business day period. In that case, customers will become effective on the date of the customer's subsequent billing cycle.

5. Enrollment Period: Submeter MDMAs may enroll customers in the Phase 2 Pilot from November 1, 2016 to April 30, 2017 or until the maximum of 500 Submeters is reached, whichever is earlier (Enrollment Period). Once enrollment of 500 Submeters is reached, Phase 2 of this Pilot will be closed for enrollment. For the first three (3) months of the Enrollment Period (Exclusivity Period), each Submeter MDMA will have "Exclusivity Rights" to enroll a pre-determined number of Submeters into the Pilot. This number will be determined by dividing the Phase 2 Pilot's enrollment cap of 500 by the number of Submeter MDMAs participating in the Phase 2 Pilot. Exclusivity Rights expire at the end of the third month, January 31, 2017, which is followed by the first-come, first-served Open Enrollment Period for three months ending April 30, 2017, or when 500 Submeters have enrolled, whichever is earlier.

# SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS

1. Pilot Term**:** Phase 2 duration is 15.5 months beginning January 16, 2017 and ending April 30, 2018. T

2. Pilot Participation Cap: On a first-come, first-served basis, a maximum of 500 Submeters may be enrolled in Phase 2 of the Pilot. Of the 500 Submeters, a limit of 100 Submeters may be related to NEM accounts.

3. Pilot Participation Period: Customers may participate for up to 12 consecutive billing cycles. Customers may unenroll from the Pilot at any time, but may not reenroll in Phase 2 of the Pilot unless they are relocating in one of the IOU's service territories as discussed in Special Condition 12.

4. Customer Enrollment: Submeter MDMA is responsible for submitting a completed Form 183-4000, Single Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 183-5000, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, to enroll eligible customers in the Phase 2 Pilot. Such enrollments must be received by Utility at least 5 business days prior to the start date of the customer's next billing cycle to become effective on that date providing the volume of customer agreements in process at that time does not exceed an average of five (5) agreements per business day over any five (5) business day period. In that case, customers will become effective on the date of the customer's subsequent billing cycle.

5. Enrollment Period: Submeter MDMAs may enroll customers in the Phase 2 Pilot from January 16, 2017 to April 30, 2017 or until the maximum of 500 Submeters is reached, whichever is earlier (Enrollment Period). Once enrollment of 500 Submeters is reached, Phase 2 of this Pilot will be closed for enrollment. For the first month and a half of the Enrollment Period (Exclusivity Period), each Submeter MDMA will have "Exclusivity Rights" to enroll a pre-determined number of Submeters into the Pilot. This number will be determined by dividing the Phase 2 Pilot's enrollment cap of 500 by the number of Submeter MDMAs participating in the Phase 2 Pilot. Exclusivity Rights expire February 28, 2017, which is followed by the first-come, first-served Open Enrollment Period for two months ending April 30, 2017, or when 500 Submeters have enrolled, whichever is earlier. T T T T T

(Continued)

## SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS (Continued) N

6. MDMA Services for the PEV Submeter: Program participants or their Submeter MDMAs must provide, own, and maintain the Submeters used in this Phase 2 Pilot. The standards for qualified Submeters are contained in the Form 183-3000, Submeter MDMA Registration Agreement, Attachment 1: EV Submeter Pilot Phase 2 Performance Standards for Metering and Meter Data Management Agents. Additionally, Submeter accuracy requirements are set at ±1% for the Phase 2 Pilot. Submeter accuracy is the responsibility of the Submeter MDMA. For purposes of this Phase 2 Pilot, the Utility will bill participating customers as if the Submeters satisfied the Utility's accuracy requirements.

   Submeter MDMAs must perform meter data management services (Submeter MDMA services) to provide properly formatted, accurate, and timely (i.e. within three days of the close of the customer's billing cycle) data submission to the Utility. These requirements are listed in the EV Submeter Pilot Phase 2 Performance Standards for Metering and Meter Data Management Agents.

   The Submeter MDMA must submit a completed Form 183-3000, Plug-in Electric Vehicle Submetering Pilot Phase 2 Submeter MDMA Registration Agreement to the Energy Division by September 15, 2016 to receive preliminary approval to participate in this Phase 2 Pilot. This agreement requires the Submeter MDMA to state (1) the number of Submeters that have agreed to participate as of the date it submits the Agreement, and (2) the total number of Submeters that it plans to enroll, with the expected breakdown of customer class (Residential and Commercial) and NEM participation. Final approval to act as a Phase 2 Submeter MDMA will be granted by the Utility to Submeter MDMAs that satisfy all the requirements established in the Submeter MDMA Registration Agreement and attachments prior to the start of the Phase 2 Pilot on November 1, 2016.

7. Primary Meter and Submeter Bill Calculation: The customer's Primary Meter usage and demand, as applicable, are billed according to the customer's current tariff, and the customer's Submeter PEV usage and demand, as applicable, are billed according to the applicable Residential or Commercial rate schedule. The Primary Meter billed amount will subtract the PEV Submetered usage and demand, assuming the Submeter MDMA timely submits accurate Submetered usage information as described in Special Condition 8.

8. Submeter Bill Accuracy: The accuracy of the PEV submetered billed amount will be based upon the Utility receiving timely and accurate data delivered from the Submeter MDMA pursuant to the Submeter MDMA Registration Agreement, Attachment 1: Performance Standards for Metering and MDMAs and Attachment 2: Data Reporting and Transfer Requirements. Late, incomplete, or inaccurate EV submetered usage information will be disregarded [treated as if there was no EV usage for the time interval(s) involved] only where the Submeter MDMA action is the cause of the data transmission failure. As a result, any actual EV charging during these intervals will be billed at the primary customer's otherwise applicable tariff and will not be adjusted in any future bills if any EV usage data is subsequently received.

9. Dispute Resolution: Submeter MDMA will be the single point-of-contact for all Submeter data issues regardless of any agreement the Submeter MDMA may have with other organizations providing Submeter services on your behalf. The Utility will be the single point-of-contact for all Utility billing issues. N

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS (Continued)

6. MDMA Services for the PEV Submeter: Program participants or their Submeter MDMAs must provide, own, and maintain the Submeters used in this Phase 2 Pilot. The standards for qualified Submeters are contained in the Form 183-3000, Submeter MDMA Registration Agreement, Attachment 1: EV Submeter Pilot Phase 2 Performance Standards for Metering and Meter Data Management Agents. Additionally, Submeter accuracy requirements are set at ±1% for the Phase 2 Pilot. Submeter accuracy is the responsibility of the Submeter MDMA. For purposes of this Phase 2 Pilot, the Utility will bill participating customers as if the Submeters satisfied the Utility's accuracy requirements.

   Submeter MDMAs must perform meter data management services (Submeter MDMA services) to provide properly formatted, accurate, and timely (i.e. within three days of the close of the customer's billing cycle) data submission to the Utility. These requirements are listed in the EV Submeter Pilot Phase 2 Performance Standards for Metering and Meter Data Management Agents.

   The Submeter MDMA must submit a completed Form 183-3000, Plug-in Electric Vehicle Submetering Pilot Phase 2 Submeter MDMA Registration Agreement to the Energy Division to receive preliminary approval to participate in this Phase 2 Pilot. This agreement requires the Submeter MDMA to state (1) the number of Submeters that have agreed to participate as of the date it submits the Agreement, and (2) the total number of Submeters that it plans to enroll, with the expected breakdown of customer class (Residential and Commercial) and NEM participation. Final approval to act as a Phase 2 Submeter MDMA will be granted by the Utility to Submeter MDMAs that satisfy all the requirements established in the Submeter MDMA Registration Agreement and attachments prior to the start of the Phase 2 Pilot on January 16, 2017. T T

7. Primary Meter and Submeter Bill Calculation: The customer's Primary Meter usage and demand, as applicable, are billed according to the customer's current tariff, and the customer's Submeter PEV usage and demand, as applicable, are billed according to the applicable Residential or Commercial rate schedule. The Primary Meter billed amount will subtract the PEV Submetered usage and demand, assuming the Submeter MDMA timely submits accurate Submetered usage information as described in Special Condition 8.

8. Submeter Bill Accuracy: The accuracy of the PEV submetered billed amount will be based upon the Utility receiving timely and accurate data delivered from the Submeter MDMA pursuant to the Submeter MDMA Registration Agreement, Attachment 1: Performance Standards for Metering and MDMAs and Attachment 2: Data Reporting and Transfer Requirements. Late, incomplete, or inaccurate EV submetered usage information will be disregarded [treated as if there was no EV usage for the time interval(s) involved] only where the Submeter MDMA action is the cause of the data transmission failure. As a result, any actual EV charging during these intervals will be billed at the primary customer's otherwise applicable tariff and will not be adjusted in any future bills if any EV usage data is subsequently received.

9. Dispute Resolution: Submeter MDMA will be the single point-of-contact for all Submeter data issues regardless of any agreement the Submeter MDMA may have with other organizations providing Submeter services on your behalf. The Utility will be the single point-of-contact for all Utility billing issues.

(Continued)

## SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS (Continued) N

10. Bill Payment: The Primary Meter customer is jointly responsible for all Submeter customer outstanding balances related to the Submeter service regardless of any agreement between the Primary Meter customer and the Submeter MDMA. In the event that a Submeter customer fails to pay for the Submetering service, the Submeter service will be terminated, and all uncollected usage and usage after termination will be the responsibility of the Primary Meter customer. In the event a Primary Meter customer fails to pay for service, the Primary Meter service will be terminated resulting in a disconnection of service to the Submeter.

11. Billing Adjustments: Billing adjustments will not be made pursuant to Electric Rule 18 on either the Primary Meter or submeter account due to revisions or adjustments provided by the Submeter MDMA.

12. Disenrollment, Changes of Address: The customer must contact the Utility to request an early voluntary termination from the Phase 2 Pilot. As of the effective date of the voluntary termination, the Utility will default to using the current tariff of the Primary Meter for all load at that premises.

    For customers that are involuntarily disenrolled due to termination of Submeter service, the Utility will notify the customers of the involuntary termination and allow the customers to complete the remainder of their Phase 2 Pilot Participation Period subject to completing the requirements to reenroll with an alternative Submeter MDMA. The Utility will effectuate any required rate and billing changes coincident with the start of the next billing cycle. Customers who disenroll from the Phase 2 Pilot will continue to be counted against the enrollment cap.

    For a customer that relocates within the Utility service territory: 1) the relocating customer must notify the Utility of the relocation; 2) the relocating customer's Submeter MDMA must submit a separate Form 183-4000, Single Customer of Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 183-5000, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, for the customer's new service address at least five days before the end of the current billing period; and 3) the customer is eligible to reenroll in the Phase 2 Pilot after the Enrollment Period for the remainder of customer's Phase 2 Pilot Participation Period. The Utility will effectuate any required rate and billing changes coincident with the start of the next billing cycle, subject to the exceptions described in Special Condition 4. Similarly, customers that relocate to another IOU's service territory may reenroll if the IOU's 500 Submeter limit has not been met.

13. Programs Availability: 1) Programs such as My Account, Green Button, Energy Use Alerts, and on-line rate comparison tools may be available to customers participating in the Phase 2 Pilot, but the accuracy of data may be affected. 2)Peak Time Rebate (PTR), also known as Reduce Your Use Rewards, and Level Pay Plan (LPP) are not available to customers participating in this Phase 2 Pilot. If the participating customer is already enrolled in PTR or LPP, the customer must unenroll for the duration of their participation in the Phase 2 Pilot. Customers participating in the Phase 2 Pilot are not eligible to participate in the California Independent System Operator (CAISO)-sponsored demand response programs facilitated through Rule 32. N

(Continued)

## SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS (Continued) N

14. Submeter: The Submeter may be embedded within the EVSE (as defined below) or may be stand-alone. The Submeter must be located at a fixed point anywhere between the Primary Meter and the PEV. Customers may not have more than 19 submeters per primary meter or use multiple levels of submeters.

    Any Electric Vehicle Supply Equipment (EVSE) with embedded submeter, and/or stand-alone submeter installed prior to the Phase 2 Pilot must have been certified by an Occupational Safety & Health Administration (OSHA)-approved Nationally Recognized Testing Laboratory (NRTL). Any EVSE, EVSE with embedded submeter, stand-alone submeter, except a plug-in EVSE or plug-in EVSE with embedded submeter, and related PEV charging circuits, must have been installed by a person or entity with a general electrical contractor's license issued by the California Contractors State License Board and obtained any required inspection and approval by the local Authority Having Jurisdiction (AHJ). The OSHA-approved list of NRTLs is maintained at: https://www.osha.gov/dts/otpca/nrtl/.

    Any EVSE, EVSE with embedded submeter, and/or stand-alone submeter installed as part of the Phase 2 Pilot must be certified to Underwriters Laboratories (UL) standards by OSHA-approved NRTL. Any EVSE, EVSE with embedded submeter, and/or stand-alone submeter, except a plug-in EVSE or plug-in EVSE with embedded submeter, and related PEV charging circuits must have been installed by a person or entity with a general electrical contractor's license issued by the California Contractors State License Board and obtained any required inspection and approval by the local AHJ.

15. Submeter Meter Data Management Agent (Submeter MDMA): The Submeter MDMA is the entity that retrieves, processes, and submits PEV data using validation, editing and estimating methods, as determined by the Utility and MDMAs, and provides this information to the Utility for billing purposes. Whether the Submeter MDMA, the Customer, or another third party owns the Submeter, the Submeter MDMA is responsible for obtaining authorization from the Customer to access and submit this information on the Customer's behalf. The Submeter MDMA must submit a completed Form 183-4000, Single Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2, or Form 183-5000, Multiple Customer-of-Record Enrollment Agreement Plug-in Electric Vehicle Submetering Pilot Phase 2 to the Utility. The Submeter MDMA can be the Customer-of-Record under a Multiple Customers-of-Record scenario. Examples of such scenarios can be found in Attachment 1 of the Multiple Customer-of-Record Enrollment Agreement. N

(Continued)

# SCHEDULE PEVSP2

PLUG-IN ELECTRIC VEHICLE SUBMETERING PILOT (PHASE 2)

SPECIAL CONDITIONS (Continued) N

16. Definitions:

a) Electric Vehicle Service Equipment (EVSE): The conductors, including the ungrounded, grounded, and equipment grounding conductors, the electric vehicle connectors, attachment plugs, and all other fittings, devices, power outlets or apparatuses installed specifically for the purpose of delivering energy from the premises wiring to the electric vehicle and may include an embedded submeter.

b) Primary Meter: The interval data recorder meter type owned by the Utility which registers all electricity usage associated with the premises.

c) Submeter: Submeter in this Schedule only references the meter owned by the customer or a third party, which measures the electrical load associated with charging the electric vehicle only.

d) Primary Meter Billed Amount: The Primary Meter charges billed to the customer for its non-PEV related usage and demand, as applicable, metered at its premises and billed in accordance with the customer's current tariff.

e) Submeter Billed Amount: The Submeter charges billed to the customer for its PEV usage and demand, as applicable, submetered at its premises, billed as a separate service account and presented as a Summary Bill to the customer.

f) Customer of Record (COR): The person in whose name service is rendered as evidenced by the signature on the application, contract, or agreement for that service, or, in the absence of a signed instrument, by the receipt and payment of bills or Summary Bills regularly issued in his/her name regardless of the identity of the actual user of the service. A customer may also be a party with whom the Utility is doing business with or without a billing relationship. The entire bill is the responsibility of the Utility's COR.

a. Single Customer-of-Record (SCOR): The Primary Meter customer is the COR for the Primary Meter and the EV Submeter.
b. Multiple Customers-of-Record (MCOR): The Primary Meter customer is not the COR for the Submeter. The Submeter and its load are the responsibility of a third party (e.g. Submeter MDMA or PEV owner) and that third party is a separate COR of the Utility. The Primary Meter load less the EV charges are the responsibility of the Primary Meter COR, subject to Special Condition 10.

N
