SCHEDULE 141WFP
WILDFIRE PREVENTION TRACKER

(N)

APPLICABILITY: This Wildfire Prevention Tracker rate shall be applicable to the electric energy delivered to Customers under any applicable schedule contained in this tariff. This Wildfire Prevention Tracker rate shall be applicable to the electric energy delivered to Customers under any special contract unless specifically excluded by such special contract or Commission Order.

PURPOSE: This schedule implements surcharges to collect the costs incurred and investments associated with the Company's Wildfire Mitigation and Response Plan such as the electric investor owned utility presentations filed in Docket U-210254, and the Company's Wildfire Mitigation Plan filed in Docket UE-240832. This schedule will recover the costs associated with the Company's Wildfire Mitigation and Response Plan and the Company's Wildfire Mitigation Plan that are not recovered in other tariff schedules. Such costs included in this rate adjustment may include, but are not limited to: liability insurance premiums attributable to wildfire coverage; amortization of previous deferrals from Docket UE-231048; and O&M expense, depreciation and return on rate base for projects or services that enable Wildfire Mitigation and Response Plan or Wildfire Mitigation Plan implementation or wildfire-related costs.

COST RECOVERY PROCEDURE(S):
This tariff schedule is implemented to recover expected and incurred costs associated with the Company's Wildfire Mitigation and Response Plan and the Company's Wildfire Mitigation Plan implementation as outlined in the Purpose section. Such costs include liability insurance premiums attributable to wildfire coverage, amortization of previous deferrals from Docket UE-231048, depreciation and return on rate base, and O&M expenses for projects or services that enable the Company's Wildfire Mitigation and Response Plan and the Company's Wildfire Mitigation Plan. All these costs will be recovered through energy and demand component rates, as noted in this Schedule. For billing purposes the Schedule 141WFP rates will be added to the rates shown on each schedule for electric service.

The Company will submit annual filings at least 30 days prior to the requested effective date for rates effective each year. The rates will be based on operating costs and rate base items either on a forecast or historical basis.

TRUE-UP: Each year, the Company estimates the amount of costs to be included in this Schedule as well as to provide for a true-up of amounts from the prior rate period. Amounts to include in each year's true-up are:

a. A true-up equal to the actual plus a revised forecast if necessary for any remaining forecast months at the time of filing for operating expenses, including depreciation and amortization expenses, and return on rate base paid or incurred during the rate period minus the amounts set in rates for that rate period; and
b. A true-up to account for the difference between what was expected to be collected when rates were set in the prior rate period versus the amount actually collected.

MONTHLY RATE: The rate shown below and on the following sheets shall be added to the rate(s) shown on each schedule for electric service.
