PUGET SOUND ENERGY
Electric Tariff G

SCHEDULE 95A
FEDERAL INCENTIVE TRACKER

APPLICABILITY:

1. This Federal Incentive Tracker rate shall be applicable to the electric energy delivered to Customers under any schedule contained in this tariff except those Customers served on Schedules 448, 449, 458 and 459 or Customers served under any special contract unless specifically included by such special contract.
2. The rates in this schedule shall include the sum of: (i) Investment Tax Credits that the Company has received and that are eligible to be credited to Customers under Internal Revenue Code §48 and §48E, and the associated rate base return at the Company's after-tax authorized rate of return grossed up for federal income tax; (ii) Production Tax Credits that the Company has received and that are eligible to be credited to Customers under Internal Revenue Code §45 and §45Y, and associated interest at the Company's actual after-tax cost of debt, updated semi-annually ("Credits") and (iii) the pass back of previously deferred Credits and associated rate base return and interest through amortization, if so approved by the Commission. (D) (N)
3. Rates will be set in this schedule when there are Credits and/or deferral amortizations that are available to be passed through for the Schedule 95A rate period and that are not otherwise being passed back to customers in another manner. The rates in this schedule shall be adjusted annually or at such time as the Grants and/or deferral amortizations are included in other tariff schedules and as adjusted by any true-up described in the Purpose section below. (N) (D)

PURPOSE:

To pass the benefits associated with specific energy generation through to Customers. This rate will be adjusted in the manner discussed in the Applicability section, to include the Credits and/or deferral amortizations available to be passed through under this rate schedule to Customers for the rate period plus or minus any difference in the amount of Credits and deferral amortizations actually credited to Customers under this rate schedule during the preceding rate period, when compared to the amount estimated to be passed through under this rate schedule for that rate period. There will be further adjustments that will adjust the tracker due to actual load being different than the forecasted load used to set the rate. Finally, this schedule will be adjusted for the difference between the estimated rate period interest included in Schedule 95A rates and the actual interest accrued during the rate period on Production Tax Credits and/or deferral balances included in this rate schedule. This true-up may result in a Schedule 95A rate/charge being an increase to rates if no offsetting Credits or deferral amortizations are available. There will be no interest passed through under this rate schedule for the Grants governed by the Final Order. Following the January 2023 to December 2023 surcharge period there will be a residual amount either owed to or from Customers. The amount resulting on January 1, 2024 will be included in the electric Schedule 120 rates that become effective on May 1, 2024. (T) (C) (D) (D)

ADJUSTMENTS:
Rates in this schedule and those rates reflected in the schedules for electric service to which the Credits or Grants in the Applicability section above applies, are subject to adjustment by such other schedules in this tariff as may apply.

GENERAL RULES AND PROVISIONS:
Service under this schedule is subject to the General Rules and Provisions contained in this tariff (Schedule 80) as they may be modified from time to time and other schedules of such tariff that may from time to time apply as they may be modified from time to time.
